4 **SEC. 1670. REVIEW BY COMPTROLLER GENERAL OF THE**
5 **UNITED STATES OF RECOMMENDATIONS RE-**
6 **LATING TO NUCLEAR ENTERPRISE OF DE-**
7 **PARTMENT OF DEFENSE.**

8 (a) IN GENERAL.—During each of fiscal years 2017
9 through 2021, the Comptroller General of the United
10 States shall conduct a review of the following:

11 (1) The processes of the Department of Defense
12 for addressing the recommendations of the Depart-
13 ment of Defense Internal Nuclear Enterprise Re-
14 view, the Independent Review of the Department of
15 Defense Nuclear Enterprise, and other recommenda-
16 tions affecting the health of the nuclear enterprise of
17 the Department of Defense identified or tracked by
18 the Nuclear Deterrence Enterprise Review Group,
19 including the process used by the Director of Cost
20 Assessment and Program Evaluation to evaluate the
21 implementation of such recommendations.

22 (2) The processes used to implement rec-
23 ommendations from other assessments of the nuclear
24 enterprise of the Department of Defense, including
25 the National Leadership Command Capability and

1 Nuclear Command, Control, and Communications
2 Enterprise Review.

3 (b) BRIEFING.—After conducting each review under
4 subsection (a), the Comptroller General shall provide to
5 the congressional defense committees a briefing on the re-
6 view.

7 (c) CONFORMING REPEAL.—Section 1658 of the Na-
8 tional Defense Authorization Act for Fiscal Year 2016
9 (Public Law 114–92; 129 Stat. 1125) is repealed.

10 **SEC. 1671. SENSE OF CONGRESS ON NUCLEAR DETER-**
11 **RENCE.**

12 It is the sense of Congress that—

13 (1) the nuclear forces of the United States con-
14 tinue to play a fundamental role in deterring aggres-
15 sion against the interests of the United States and
16 the allies of the United States in an increasingly
17 dangerous world in which foreign adversaries, in-
18 cluding the Russian Federation, are making explicit
19 nuclear threats against the United States and such
20 allies;

21 (2) strong United States nuclear forces assure
22 the allies of the United States that the extended de-
23 terrence guarantees of the United States are credible
24 and that the resolve of the United States remains

1 strong even in the face of nuclear provocations, in-
2 cluding nuclear coercion and blackmail;

3 (3) the prevention of war through effective de-
4 terrence requires survivable and flexible nuclear
5 forces that are well exercised and ready to respond
6 to nuclear escalation if necessary;

7 (4) possessing a range of capabilities and op-
8 tions to counter nuclear threats assures the allies of
9 the United States and enhances the credibility of
10 United States nuclear deterrence by reinforcing the
11 resolve of the United States in the minds of such al-
12 lies and potential adversaries;

13 (5) the declared policy of the United States
14 with respect to the use of nuclear weapons must be
15 coordinated and communicate clearly that the use of
16 nuclear weapons against the United States or its
17 vital interests would ultimately fail and subject the
18 aggressor to incalculable consequences;

19 (6) in support of a strong and credible nuclear
20 deterrent, the United States must—

21 (A) maintain a nuclear force with a di-
22 verse, flexible range of nuclear yield and deliv-
23 ery modes that are ready, capable, and credible;

24 (B) afford the highest priority to the mod-
25 ernization of the nuclear triad, dual-capable air-

1 craft, and related command and control ele-
2 ments; and

3 (C) ensure the broadest participation of al-
4 lies of the United States in nuclear defense
5 planning, training, and exercises to demonstrate
6 the commitment of the United States and such
7 allies and their solidarity against nuclear
8 threats and coercion; and

9 (7) with respect to the North Atlantic Treaty
10 Organization (NATO)—

11 (A) NATO has made it clear at the NATO
12 summit in Warsaw, Poland, in July 2018,
13 that—

14 (i) “the fundamental purpose of
15 NATO’s nuclear capability is to preserve
16 peace, prevent coercion, and deter aggres-
17 sion”; and

18 (ii) “Nuclear weapons are unique. Any
19 employment of nuclear weapons against
20 NATO would fundamentally alter the na-
21 ture of a conflict. The circumstances in
22 which NATO might have to use nuclear
23 weapons are extremely remote. If the fun-
24 damental security of any of its members
25 were to be threatened however, NATO has

1 the capabilities and resolve to impose costs
2 on an adversary that would be unaccept-
3 able and far outweigh the benefits that an
4 adversary could hope to achieve.”; and

5 (B) accordingly, effective deterrence re-
6 quires that NATO conduct realistic nuclear
7 planning and exercises, and modernize the full
8 suite of dual-capable aircraft and associated
9 command and control networks and facilities.

10 **SEC. 1672. SENSE OF CONGRESS ON IMPORTANCE OF INDE-**
11 **PENDENT NUCLEAR DETERRENT OF UNITED**
12 **KINGDOM.**

13 It is the sense of Congress that—

14 (1) the United States believes that the inde-
15 pendent nuclear deterrent and decision-making of
16 the United Kingdom provides a crucial contribution
17 to international stability, the North Atlantic Treaty
18 Organization alliance, and the national security of
19 the United States;

20 (2) nuclear deterrence is and will continue to be
21 the highest priority mission of the Department of
22 Defense and the United States benefits when the
23 closest ally of the United States clearly and un-
24 equivocally sets similar priorities;

1 (3) the United States sees the nuclear deterrent
2 of the United Kingdom as central to trans-Atlantic
3 security and to the commitment of the United King-
4 dom to NATO to spend two percent of gross domes-
5 tic product on defense;

6 (4) the commitment of the United Kingdom to
7 maintain a continuous at-sea deterrence posture
8 today and in the future complements the deterrent
9 capabilities of the United States and provides a
10 credible “second center of decision making” which
11 ensures potential attackers cannot discount the soli-
12 darity of the mutual relationship of the United
13 States and the United Kingdom;

14 (5) the United States Navy must execute the
15 Ohio-class replacement submarine program on time
16 and within budget, seeking efficiencies and cost sav-
17 ings wherever possible, to ensure that the program
18 delivers a Common Missile Compartment, the Tri-
19 dent II (D5) Strategic Weapon System, and associ-
20 ated equipment and production capabilities, that
21 support the successful development and deployment
22 of the Dreadnought submarines of the United King-
23 dom; and

24 (6) the close technical collaboration, especially
25 expert mutual scientific peer review, provides valu-

1 able resilience and cost effectiveness to the respec-
2 tive deterrence programs of the United States and
3 the United Kingdom.

4 **Subtitle E—Missile Defense**

6 **SEC. 1681. NATIONAL MISSILE DEFENSE POLICY.**

10 United States, allies, deployed forces, and capabilities
11 against the developing and increasingly complex ballistic
12 missile threat with funding subject to the annual author-
13 ization of appropriations and the annual appropriation of
14 funds for National Missile Defense.

15 (b) **CONFORMING REPEAL.**—Section 2 of the Na-

8 expended to integrate a missile defense system of the Rus-
9 sian Federation or a missile defense system of the People’s
10 Republic of China into any missile defense system of the
11 United States.”; and

4 SEC. 1801. PLAIN LANGUAGE REWRITE OF REQUIREMENTS
5 FOR SMALL BUSINESS PROCUREMENTS.

6 Section 15(a) of the Small Business Act (15 U.S.C.
7 644(a)) is amended to read as follows:

8 “(a) SMALL BUSINESS PROCUREMENTS.—

9 “(1) IN GENERAL.—For purposes of this Act,
10 small business concerns shall receive any award or
11 contract if such award or contract is, in the deter-

1 mination of the Administrator and the contracting
2 agency, in the interest of—

3 “(A) maintaining or mobilizing the full
4 productive capacity of the United States;

5 “(B) war or national defense programs; or

6 “(C) assuring that a fair proportion of the
7 total purchase and contracts for goods and
8 services of the Government in each industry
9 category (as defined under paragraph (2)) are
10 awarded to small business concerns.

11 “(2) INDUSTRY CATEGORY DEFINED.—

12 “(A) IN GENERAL.—In this subsection, the
13 term ‘industry category’ means a discrete group
14 of similar goods and services, as determined by
15 the Administrator in accordance with the North
16 American Industry Classification System codes
17 used to establish small business size standards,
18 except that the Administrator shall limit an in-
19 dustry category to a greater extent than pro-
20 vided under the North American Industry Clas-
21 sification System codes if the Administrator re-
22 ceives evidence indicating that further seg-
23 mentation of the industry category is war-
24 ranted—

1 “(i) due to special capital equipment
2 needs;

3 “(ii) due to special labor require-
4 ments;

5 “(iii) due to special geographic re-
6 quirements, except as provided in subpara-
7 graph (B);

8 “(iv) due to unique Federal buying
9 patterns or requirements; or

10 “(v) to recognize a new industry.

11 “(B) EXCEPTION FOR GEOGRAPHIC RE-
12 QUIREMENTS.—The Administrator may not fur-
13 ther segment an industry category based on ge-
14 ographic requirements unless—

15 “(i) the Government typically des-
16 ignates the geographic area where work for
17 contracts for goods or services is to be per-
18 formed;

19 “(ii) Government purchases comprise
20 the major portion of the entire domestic
21 market for such goods or services; and

22 “(iii) it is unreasonable to expect com-
23 petition from business concerns located
24 outside of the general geographic area due
25 to the fixed location of facilities, high mo-

1 bilization costs, or similar economic fac-
2 tors.

3 “(3) DETERMINATIONS WITH RESPECT TO
4 AWARDS OR CONTRACTS.—Determinations made
5 pursuant to paragraph (1) may be made for indi-
6 vidual awards or contracts, any part of an award or
7 contract or task order, or for classes of awards or
8 contracts or task orders.

9 “(4) INCREASING PRIME CONTRACTING OPPOR-
10 TUNITIES FOR SMALL BUSINESS CONCERNS.—

11 “(A) DESCRIPTION OF COVERED PRO-
12 POSED PROCUREMENTS.—The requirements of
13 this paragraph shall apply to a proposed pro-
14 curement that includes in its statement of work
15 goods or services currently being supplied or
16 performed by a small business concern and, as
17 determined by the Administrator—

18 “(i) is in a quantity or of an esti-
19 mated dollar value which makes the par-
20 ticipation of a small business concern as a
21 prime contractor unlikely;

22 “(ii) in the case of a proposed pro-
23 curement for construction, seeks to bundle
24 or consolidate discrete construction
25 projects; or

1 “(iii) is a solicitation that involves an
2 unnecessary or unjustified bundling of con-
3 tract requirements.

4 “(B) NOTICE TO PROCUREMENT CENTER
5 REPRESENTATIVES.—With respect to proposed
6 procurements described in subparagraph (A), at
7 least 30 days before issuing a solicitation and
8 concurrent with other processing steps required
9 before issuing the solicitation, the contracting
10 agency shall provide a copy of the proposed pro-
11 curement to the procurement center representa-
12 tive of the contracting agency (as described in
13 subsection (l)) along with a statement explain-
14 ing—

15 “(i) why the proposed procurement
16 cannot be divided into reasonably small
17 lots (not less than economic production
18 runs) to permit offers on quantities less
19 than the total requirement;

20 “(ii) why delivery schedules cannot be
21 established on a realistic basis that will en-
22 courage the participation of small business
23 concerns in a manner consistent with the
24 actual requirements of the Government;

1 “(iii) why the proposed procurement
2 cannot be offered to increase the likelihood
3 of the participation of small business con-
4 cerns;

5 “(iv) in the case of a proposed pro-
6 curement for construction, why the pro-
7 posed procurement cannot be offered as
8 separate discrete projects; or

9 “(v) why the contracting agency has
10 determined that the bundling of contract
11 requirements is necessary and justified.

12 “(C) ALTERNATIVES TO INCREASE PRIME
13 CONTRACTING OPPORTUNITIES FOR SMALL
14 BUSINESS CONCERNS.—If the procurement cen-
15 ter representative believes that the proposed
16 procurement will make the participation of
17 small business concerns as prime contractors
18 unlikely, the procurement center representative,
19 within 15 days after receiving the statement de-
20 scribed in subparagraph (B), shall recommend
21 to the contracting agency alternative procure-
22 ment methods for increasing prime contracting
23 opportunities for small business concerns.

24 “(D) FAILURE TO AGREE ON AN ALTER-
25 NATIVE PROCUREMENT METHOD.—If the pro-

1 curement center representative and the con-
2 tracting agency fail to agree on an alternative
3 procurement method, the Administrator shall
4 submit the matter to the head of the appro-
5 priate department or agency for a determina-
6 tion.

7 “(5) CONTRACTS FOR SALE OF GOVERNMENT
8 PROPERTY.—With respect to a contract for the sale
9 of Government property, small business concerns
10 shall receive any such contract if, in the determina-
11 tion of the Administrator and the disposal agency,
12 the award of such contract is in the interest of as-
13 suring that a fair proportion of the total sales of
14 Government property be made to small business con-
15 cerns.

16 “(6) SALE OF ELECTRICAL POWER OR OTHER
17 PROPERTY.—Nothing in this subsection shall be con-
18 strued to change any preferences or priorities estab-
19 lished by law with respect to the sale of electrical
20 power or other property by the Federal Government.

21 “(7) COSTS EXCEEDING FAIR MARKET PRICE.—
22 A contract may not be awarded under this sub-
23 section if the cost of the contract to the awarding
24 agency exceeds a fair market price.”.

1 **SEC. 1802. TRANSPARENCY IN SMALL BUSINESS GOALS.**

2 Section 15(h)(3) of the Small Business Act (15
3 U.S.C. 644(h)(3)) is amended to read as follows:

4 “(3) PROCUREMENT DATA.—

5 “(A) FEDERAL PROCUREMENT DATA SYS-
6 TEM.—

7 “(i) IN GENERAL.—To assist in the
8 implementation of this section, the Admin-
9 istrator shall have access to information
10 collected through the Federal Procurement
11 Data System, Federal Subcontracting Re-
12 porting System, or any new or successor
13 system.

14 “(ii) GSA REPORT.—On the date that
15 the Administrator makes available the re-
16 port required under paragraph (2), the Ad-
17 ministrator of the General Services Admin-
18 istration shall submit to the President and
19 Congress, and shall make available on a
20 public website, a report in the same form
21 and manner, and including the same infor-
22 mation, as the report required under para-
23 graph (2). The report shall include all pro-
24 curements made for the period covered by
25 the report and may not exclude any con-

3 this section, the head of each contracting agen-
4 cy shall provide, upon request of the Adminis-
5 trator, procurement information collected
6 through agency data collection sources in exist-
7 ence at the time of the request. Contracting
8 agencies shall not be required to establish new

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 2943), to authorize appropriations for fiscal year 2017 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment that is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Compliance with rules of the House of Representatives and Senate regarding earmarks and congressionally directed spending items

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives and Rule XLIV(3) of the Standing Rules of the Senate, neither this conference report nor the accompanying joint statement of managers contains any congressional earmarks, congressionally directed spending items, limited tax benefits, or limited tariff benefits, as defined in such rules.

Summary of discretionary authorizations and budget authority implication

The budget request for national defense discretionary programs within the jurisdiction of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2017 was \$608.0 billion. Of this amount, \$524.0 billion was requested for base Department of Defense programs, \$64.6 billion was requested for overseas contingency operations of which \$5.1 billion was for base requirements, \$19.2 billion was requested for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$0.2 billion for the Maritime Security Program.

The conference agreement would authorize \$611.2 billion in fiscal year 2017, including \$523.7 billion for base Department of Defense programs, \$67.8 billion for overseas contingency operations of which \$8.3 billion was for base requirements, \$19.4 billion for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$0.3 billion for the Maritime Security Program.

The two tables preceding the detailed program adjustments in Division D of the accompanying joint statement of managers summarize the discretionary authorizations in the agreement and the equivalent budget authority levels for fiscal year 2017 defense programs.

The House amendment contained no similar provision.
The House recedes.

The Senate recedes.

The Senate bill contained a provision (sec. 111) that would require the Secretary of the Army to improve and tailor training for units equipped with the Distributed Common Ground System- Army Increment 1. (1) AH-64-equipped Attack Reconnaissance Battalion capacity to meet future needs;

(2) Air defense artillery (ADA) capacity, responsiveness, and the capability of short range ADA to meet existing and emerging threats (including unmanned aerial systems, cruise missiles, and manned aircraft), including an assessment of the potential for commercial-off-the-shelf solutions;

(3) Chemical, biological, radiological, and nuclear capabilities and modernization;

(4) Field artillery capabilities and the changes in doctrine and war plans resulting from the memorandum of the Secretary of Defense dated June 19, 2008, regarding the Department of Defense policy on cluster munitions and unintended harm to civilians, as well as required modernization or munition inventory shortfalls;

(5) Fuel distribution and water purification capacity and responsiveness;

(6) Army watercraft and port opening capabilities and responsiveness;

(7) Transportation (fuel, water, and cargo) capacity and responsiveness;

(8) Military police capacity; and
(9) Tactical mobility and tactical wheeled vehicle capacity and capability, to include adequacy of heavy equipment prime movers.

The Senate bill contained no similar provision.

The Senate recesses.

SUBTITLE C—NAVY PROGRAMS

Subject to the availability of appropriations, funds for payments under the contract may be provided from amounts authorized to be appropriated for the Department of Defense for Shipbuilding and Conversion, Navy, for fiscal years 2017 and 2018.

The House amendment contained a similar provision (sec. 123).

The House recesses.

Littoral Combat Ship (sec. 123)

The Senate bill contained a provision (sec. 122) that would require an annual report on Littoral Combat Ship (LCS) mission packages, a certification on the acquisition inventory objective of LCS mission packages, a limitation on the use of funds to revise or deviate from revision three of the LCS acquisition strategy, and a repeal of a reporting requirement related to LCS mission modules.

The House amendment contained a similar provision (sec. 126).

The House recesses with an amendment that would:

(1) Replace the limitation on the use of funds to revise or deviate from revision three of the LCS acquisition strategy with a requirement that the Secretary of Defense provide a certification to the congressional defense committees prior to a revision or deviation from revision three of the LCS acquisition strategy. The conferees' intent is this subsection be limited to those revisions or deviations that would result in a change to: the acquisition inventory objective of 40 ships, annual procurement quantities through fiscal year 2021, or the planned down-select to a single LCS prime contractor no later than fiscal year 2019; and

(2) Prohibit the Secretary of Defense from selecting a single contractor for the LCS or frigate program unless such selection is conducted using competitive procedures, performed for the purpose of constructing a frigate class ship, and occurs only after a frigate design has reached sufficient maturity and completeness.

The provision would also direct the Secretary of Defense to deem the 2009 AAG acquisition program baseline as the original baseline estimate and to execute the requirements of sections 2433 and 2433a of title 10, United States Code, as though the Department had submitted a Selected Acquisition Report with this baseline estimate included. This action would provide clarity on the original baseline estimate, which is a necessary element of a Nunn-McCurdy review.

The House amendment contained no similar provision.

The House recedes with an amendment that would:

(1) Require the Navy to report on the AAG program in accordance with section 2432 of title 10, United States Code, which deals with Selected Acquisition Reports, instead of reporting in accordance with section 2433a(c)(2) which deals with critical cost growth in major defense acquisition programs;

(2) Add a limitation of funds for the AAG to be installed on USS *John F. Kennedy* (CVN-79) unless the Milestone Decision Authority (MDA) determines that AAG should be installed on that ship, and the MDA submits notification of such determination to the congressional defense committees;

(3) Establish the original baseline estimate for the AAG program and require the Secretary of Defense to execute the requirements of sections 2433 and 2433a of title 10, United States Code, but exempt the Department from having to rescind the milestone decision approval for the AAG program during the review required by those provisions; and

(4) During the review required by section 2433a of title 10, United States Code, allow the Secretary of Defense to approve contract action or actions to enter a new contract, exercise an option under an existing contract, or otherwise extend the scope of an existing contract under the AAG program for CVN-80 only if the MDA, on a non-delegable basis, were to determine that such action would be needed to appropriately restructure the program as intended by the Secretary of Defense.

The conferees note that, although the AAG program is now being managed as a Major Defense Acquisition Program, it began more than 10 years ago as an Acquisition Category II program, which limited transparency and insight of the Navy's acquisition and contract management. In 2015, the Comptroller General reported that the Department of Defense needed a better approach to manage Acquisition Category II programs, particularly those programs that have the potential to become Major Defense Acquisition Programs.

Therefore, the conferees direct the Comptroller General to review no fewer than five Navy aircraft launch and recovery equipment (ALRE) Acquisition Category II programs to determine:

(1) The roles and responsibilities for acquiring ALRE systems for major ship programs, and the relationship of these programs to the Navy's overall acquisition of the ship platform;

(2) How the acquisition and contracting practices for these programs compare to guidance, regulations, and best practices for acquisition management;

(3) How the Navy manages cost, schedule, and performance to meet ship delivery schedules, and what

mechanisms, if any, are in place to periodically reassess assignment of such programs to a particular acquisition category;

(4) Recommendations to improve the Navy's performance in managing ALRE and other Acquisition Category II programs; and

(5) Any other observations of the Comptroller General.

The conferees request a briefing to the congressional defense committees no later than June 1, 2017, to be followed by a report.

Limitation on availability of funds for procurement of U.S.S. Enterprise (CVN-80) (sec. 126)

The Senate bill contained a provision (sec. 126) that would limit more than 25 percent of funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2017 for advance procurement or procurement of USS *John F. Kennedy* (CVN-79) or USS *Enterprise* (CVN-80) from being obligated or expended until the Secretary of the Navy and Chief of Naval Operations submit a report to the congressional defense committees.

The House amendment contained no similar provision.

The House recedes with an amendment that would remove the limitation of funds on CVN-79 and terminate this section on September 30, 2021.

Sense of Congress on aircraft carrier procurement schedules (sec. 127)

The House amendment contained a provision (sec. 122) that would provide the sense of Congress that the Secretary of the Navy's schedule to procure 1 aircraft carrier every 5 years will reduce the overall aircraft carrier inventory to 10 aircraft carriers, a level insufficient to meet peacetime and war plan requirements. The section would also recommend that the Secretary begin construction for the *Ford*-class aircraft carrier designated CVN-81 in fiscal year 2022 and align advance procurement activities with this accelerated programming.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would remove the reference to CVN-81.

Report on P-8 Poseidon aircraft (sec. 128)

The House amendment contained a provision that would require the Secretary of the Navy to submit to the congressional defense committees a report regarding future capabilities for the P-8 Poseidon aircraft.

The Senate bill contained no similar provision.

The Senate recesses.

Design and construction of replacement dock landing ship designated LX(R) or amphibious transport dock designated LPD-29 (sec. 129)

The House amendment contained a provision (sec. 124) that would authorize the Secretary of the Navy to enter into and incrementally fund a contract for design and construction of the replacement dock landing ship designated LX(R) or the amphibious transport dock designated LPD-29.

The Senate bill contained no similar provision.

The Senate recesses.

SUBTITLE D—AIR FORCE PROGRAMS

EC-130H Compass Call recapitalization program (sec. 131)

The Senate bill contained a provision (Sec. 145) that would prohibit the availability of funds for the Air Force EC-130H Compass Call recapitalization program unless the Air Force conducts a full and open competition to acquire the replacement aircraft platform.

The House amendment contained no similar provision.

The House recesses with an amendment that strikes the full and open competition requirement, and authorizes the Secretary of the Air Force to obligate and expend fiscal year 2017 funds for the purpose of re-hosting the primary mission equipment of the current EC-130H Compass Call aircraft fleet on to a more operationally effective and survivable airborne platform to meet combatant commander requirements. The amendment limits procurement to the first two aircraft of the planned ten aircraft fleet until the Secretary determines there is a high likelihood the program will meet the requirements of the combatant commands.

The conferees agree the restructured EC-130H Compass Call program shall be implemented consistent with existing authorities, including Federal Acquisition Regulation Part 6.3 and Department of Defense Instruction 5000.02, "Operation of the Defense Acquisition System."

The conferees note the fiscal year 2017 funding adjustments to allow the Secretary of the Air Force to proceed with the program are outlined in Division D.

Repeal of requirement to preserve certain retired C-5 aircraft (sec. 132)

The Senate bill contained a provision (Sec. 143) that would repeal the requirement in Section 141 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) for the Secretary of the Air Force to preserve certain retired C-5 aircraft.

The House amendment contained a similar provision (Sec. 132).

The Senate recedes.

Repeal of requirement to preserve F-117 aircraft in recallable condition (sec. 133)

The Senate bill contained a provision (Sec. 144) that would repeal the requirement in Section 136 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364; 120 Stat. 2114) to preserve F-117 aircraft in recallable condition.

The House amendment contained a similar provision (Sec. 133).

The House recedes.

Prohibition on availability of funds for retirement of A-10 aircraft (sec. 134)

The Senate bill contained a provision (Sec. 141) that would amend section 142 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) by extending the prohibition on obligation or expenditure of funds to retire or prepare to retire A-10 aircraft until the Secretary of the Air Force and Chief of Staff of the Air Force submit a report to the congressional defense committees describing their views on the results of an F-35A initial operational test and evaluation (IOT&E). The provision would also ensure the F-35A IOT&E includes comparison tests and evaluation of the F-35A and A-10C in conducting close air support, combat search and rescue, and airborne forward air controller missions. The provision would also require the Comptroller General of the United States to provide an independent assessment of the report from the Secretary and Chief of Staff.

The House amendment contained a similar provision (Sec. 134) that would prevent retirements of A-10 aircraft, but would allow the Secretary of the Air Force to transition the A-10 unit at Fort Wayne Air National Guard Base, Indiana, to an F-16 unit in fiscal year 2018, as the Secretary had proposed in the budget of the President for fiscal year 2017.

The Senate recedes.

The conferees agree that section (f)(2) of the House provision explicitly prevents the divestment of any A-10 aircraft if the special rule were to be invoked.

The conferees also agree the Comptroller General of the United States shall assess the conclusions and assertions contained in the Secretary's and Chief of Staff's report on the F-35A IOT&E, and submit a report to the congressional defense committees of such assessment not later than 90 days after the Secretary's and Chief of Staff's report is submitted.

The conferees also agree the Comptroller General's report shall include the following:

(1) An assessment of whether the conclusions and assertions included in the report submitted by the Secretary and Chief of Staff are comprehensive, fully supported, and sufficiently detailed; and

(2) An identification of any shortcomings, limitations, or other matters that affect the quality of the report's findings or conclusions.

Limitation on availability of funds for destruction of A-10 aircraft in storage status (sec. 135)

The Senate bill contained a provision (Sec. 142) that would prohibit the availability of funds authorized to be appropriated by this Act or otherwise made available for the Air Force to be obligated for the purpose of scrapping, destroying, or otherwise disposing of any A-10 aircraft in any storage status in the Aerospace Maintenance and Regeneration Group (AMARG) that have serviceable wings or other components that could be used to prevent total active inventory A-10 aircraft from being permanently removed from flyable status due to unserviceable wings or other components.

The House amendment contained no similar provision.

The House recedes with minor technical corrections.

The conferees agree the provision does not prevent the Air Force from reclaiming any usable parts or components on A-10 aircraft in any storage status for the purpose of keeping active inventory A-10 aircraft in flyable and mission capable condition.

Prohibition on availability of funds for retirement of Joint Surveillance Target Attack Radar System aircraft (sec. 136)

The House amendment contained a provision (Sec. 135) that would prohibit the availability of funds for retirement of Joint Surveillance Target Attack Radar System aircraft in fiscal year 2018.

The Senate bill contained no similar provision.
The Senate recedes.

Elimination of annual report on aircraft inventory (sec. 137)

The House amendment contained a provision (Sec. 131) that would strike the requirement in Section 231a of title 10, United States Code, for the Secretary of Defense to deliver an annual report on the military services' aircraft inventory to the congressional defense committees.

The Senate bill contained no similar provision.
The Senate recedes.

SUBTITLE E—DEFENSE-WIDE, JOINT, AND MULTISERVICE MATTERS

Standardization of 5.56mm rifle ammunition (sec. 141)

The House amendment contained a provision (sec. 146) that would require the Secretary of Defense to ensure that the Army and the Marine Corps are using in combat one standard type of enhanced 5.56mm rifle ammunition not later than one year after the date of the enactment of this Act with exceptions that require the Secretary of Defense to certify to the congressional defense committees the reasons why there are different 5.56mm rounds being used in combat.

The Senate bill contained no similar provision.
The Senate recedes.

Fire suppressant and fuel containment standards for certain vehicles (sec. 142)

The House amendment contained a provision (Sec. 142) that would require the Secretary of the Army, or his designee, and the Secretary of the Navy, or his designee, to establish and maintain policy guidance regarding the establishment of, and updates to, fire suppressant and fuel containment standards that meet survivability requirements across various classes of vehicles, including light tactical vehicles, medium tactical

vehicles, heavy tactical vehicles, and ground combat vehicles for the Army and Marine Corps. This section would also require the Secretary of the Army and the Secretary of the Navy to provide a report to the congressional defense committees, not later than 180 days after the date of the enactment of this Act, that contains policy guidance for each class of vehicle including armor, fire suppression systems, self-sealing material and containment technologies, and any other information as determined by the Secretaries.

The Senate bill contained no similar provision.

The Senate recedes.

Limitation on availability of funds for destruction of certain cluster munitions (sec. 143)

The Senate bill contained a provision (section 152) that would limit the funds available for the destruction of cluster munitions until the Secretary of Defense submits a report on the Department's policy on, and plan for, cluster munitions.

The House amendment contained no similar provision.

The House recedes with an amendment that would limit the funds for the destruction of serviceable cluster munitions, but would allow the demilitarization of cluster munitions determined to be unserviceable due to a significant failure to meet performance or logistics requirements. Cluster munitions categorized as unserviceable solely due to current or amended Department of Defense policy related to cluster munitions would not meet this definition of unserviceable and would be subject to the limitation in this provision.

Report on Department of Defense munitions strategy for the combatant commands (sec. 144)

The House amendment contained a provision that would require the Secretary of Defense to submit to the congressional defense committees a report on the munitions strategy of the combatant commands.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would reduce the time horizon for the strategy and modify the elements of the required report.

Modifications to reporting on use of combat mission requirements funds (sec. 145)

The House amendment contained a provision (sec. 141) that would amend the quarterly report requirement in section 123 of

the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383), to sunset the requirement for such reports on September 30, 2018.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would change from quarterly to annually the requirement for the commander of U.S. Special Operations Command to submit a report on use of Combat Mission Requirements funds.

Report on alternative management structures for the F-35 joint strike fighter program (sec. 146)

The Senate bill contained a provision that would disestablish the F-35 Joint Program Office (JPO) and devolve relevant responsibilities to the Air Force and the Navy.

The House amendment contained no similar provision.

The House recedes with an amendment that would remove the requirement to disestablish the JPO and require the Secretary of Defense, no later than March 31, 2017, to submit to the congressional defense committees a report on potential options for the future management of the Joint Strike Fighter program.

Comptroller General review of F-35 Lightning II aircraft sustainment support (sec. 147)

The House amendment contained a provision (Sec. 144) that would direct the Comptroller General of the United States to conduct an analysis of the sustainment support strategy for the F-35 Joint Strike Fighter program.

The Senate bill contained no similar provision.

The Senate recedes.

Briefing on acquisition strategy for Ground Mobility Vehicle (sec. 148)

The House amendment contained a provision (Sec. 145) that would direct the Under Secretary of Defense for Acquisition, Technology, and Logistics, in consultation with the Secretary of the Army, to provide a briefing to the congressional defense committees on the acquisition strategy for the ground mobility vehicle.

The Senate bill contained no similar provision.

The Senate recedes.

Study and report on optimal mix of aircraft capabilities for the Armed Forces (sec. 149)

The Senate bill contained a provision (Sec. 151) that would direct the Secretary of Defense to obtain an independent study on the future mix of aircraft platforms for the Armed Forces.

The House amendment contained no similar provision.

The House recedes with an amendment changing the study to be conducted by the Secretary of Defense rather than by an independent entity, adds the congressional intelligence committees as recipients of the study report, and includes other minor technical corrections.

LEGISLATIVE PROVISIONS NOT ADOPTED

Funding for surface-to-air missile system

The House amendment contained a provision (Section 114) that would authorize an increase in funding for Missile Procurement, Army line 002, MSE missile, by \$84.2 million and decrease funding for Defense Nuclear Nonproliferation Research and Development, material management and minimization, by an equal \$84.2 million.

The Senate bill contained no similar provision.

The House recedes.

The outcome is reflected in sections 4101 and 4701 of the Act.

Procurement authority for aircraft carrier programs

The House amendment contained a provision (sec. 121) that would provide economic order quantity authority for the construction of two *Ford*-class aircraft carriers and incremental funding authority for the nuclear refueling and complex overhaul of five *Nimitz*-class aircraft carriers.

The Senate bill contained no similar provision.

The House recedes.

Ship to shore connector program

The House amendment contained a provision (sec. 125) that would authorize the Secretary of the Navy to enter into a contract for the procurement of up to 45 Ship to Shore Connector vessels.

The Senate bill contained no similar provision.

The House recedes.

Limitation on availability of funds for Tactical Combat Training System Increment II

The Senate bill contained a provision (sec. 127) that would limit the obligation or expenditure of 25 percent of funds for the Tactical Combat Training Systems (TCTS) Increment II program until 60 days after the Secretary of the Navy submitted the report required by section 235 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

The House amendment contained a similar provision (sec. 218) that would limit the obligation or expenditure of 20 percent of the funds for TCTS Increment II until the Secretary of the Navy and Secretary of the Air Force provided the required report.

The conference agreement includes neither provision. Because the Secretary of the Navy submitted the required report in May 2016, the limitation on availability of funds within these provisions is no longer applicable.

However, the conferees remain concerned about training gaps, both in live and simulated environments, for pilots in fourth and fifth-generation aircraft. Pilots will have to operate these aircraft with advanced weapon systems in highly complex anti-access, area denial environments. The conferees recognize the importance of developing higher fidelity interoperable training for combat pilots using live-virtual-constructive (LVC) exercises. Such exercises should allow the Department to simulate a broader range of threat system capabilities that enable training aircraft pilots under more realistic combat conditions.

Therefore, the conferees expect the Department of Defense to apply the necessary focus and resources to develop and support LVC training as soon as possible.

Prohibition on availability of funds for retirement of U-2 aircraft

The House amendment contained a provision (Sec. 137) that would prohibit the availability of funds for the retirement of U-2 aircraft.

The Senate bill contained no similar provision.

The House recedes. Section 133 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) prohibits the Secretary of the Air Force from taking any action that would prevent the Air Force from maintaining the U-2 aircraft fleet in its current configuration and capability beyond fiscal year 2016. The conferees agree that this provision remains in full force and effect.

Medium Altitude Intelligence, Surveillance, and Reconnaissance Aircraft

The Senate bill contained a provision (sec. 153) that would prohibit the obligation or expenditure of funds for the acquisition of Medium Altitude Intelligence, Surveillance, and Reconnaissance (MAISR) aircraft in fiscal year 2017 until the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD SOLIC), in consultation with the Commander of U.S. Special Operations Command (SOCOM), provides the congressional defense committees with a report on the manned ISR requirements of the command and how such an acquisition aligns with the SOCOM ISR Roadmap.

The House amendment contained no similar provision.

The Senate recedes.

The conferees understand that a SOCOM analysis determined that the cost avoidance of acquiring versus leasing MAISR aircraft is approximately \$1.3 million per month with a break even return on investment of approximately 11 months. However, the conferees believe that procurement of ISR aircraft should not be ad hoc, but instead be a deliberate acquisition informed by an analysis of alternatives that fully considers changing requirements, threats, capabilities, tactics, and resource constraints. Therefore, the conferees direct ASD SOLIC and SOCOM to provide an interim briefing on the scope, methodology and timeline for the Next Generation Manned ISR Study and Analysis of Alternatives no later than 90 days after enactment of this Act.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Authorization of appropriations (sec. 201)

The Senate bill contained a provision (sec. 201) that would authorize appropriations for Research, Development, Test, and Evaluation at the levels identified in section 4201 of division D of this Act.

The House amendment contained an identical provision (sec. 201).

The conference agreement includes this provision.

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

Laboratory quality enhancement program (sec. 211)

The House amendment contained a provision (sec. 211) that would require the establishment of a Laboratory Quality Enhancement Program to support the analysis and implementation of current policies, as well as make recommendations for new initiatives to support the improvement and enhancement of the Department of Defense's Science and Technology Reinvention Laboratories. The House provision would also align management of the laboratory demonstration program with the Assistant Secretary of Defense for Research and Engineering.

The Senate bill contained a provision (sec. 1126) that would align management of the laboratory demonstration program with the Under Secretary of Defense for Acquisition, Technology, and Logistics.

The Senate recedes with an amendment to adjust the membership of the panel and to emphasize that the goal of the laboratory personnel system should be to support the efficient operations of those institutions.

Modification of mechanisms to provide funds for defense laboratories for research and development of technologies for military missions (sec. 212)

The Senate bill contained a provision (sec. 211) that would raise the limit of funds authorized under Section 219 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417) up to four percent of all funds available to a laboratory. The provision would also eliminate the sunset date for authorization of this authority.

The House amendment contained a similar provision (sec. 212) that would set the level of funding at three percent, eliminate the sunset date, and allow certain federally funded research and development centers to use this authority.

The House recedes with an amendment that would set the level of Section 219 funding at between two and four percent.

Making permanent authority for defense research and development rapid innovation program (sec. 213)

The Senate bill contained a provision (sec. 212) that would repeal the sunset provision of the Rapid Innovation Program and make the authorization of the program permanent.

The House amendment contained no similar provision.
The House recedes.

Authorization for National Defense University and Defense Acquisition University to enter into cooperative research and development agreements (sec. 214)

The Senate bill contained a provision (sec. 213) that would authorize the Defense Acquisition University and the National Defense University to enter into cooperative agreements, which involve the provision of grant money, and cooperative research and development agreements with universities, not-for-profit institutions, and other entities to support their designated missions.

The House amendment contained no similar provision.
The House recedes.

Manufacturing Engineering Education Grant Program (sec. 215)

The Senate bill contained a provision (sec. 214) that would allow the Department of Defense to provide grants to institutions of higher education, including technical and community colleges, for the purposes of enhancing education in manufacturing engineering.

The House amendment contained no similar provision.

The House recedes with technical amendments to clarify several aspects of the grant program.

Notification requirement for certain rapid prototyping, experimentation, and demonstration activities (sec. 216)

The House amendment contained a provision (sec. 213) that would require the Secretary of the Navy to provide written notification to the congressional defense committees within 10 days before initiating a rapid prototyping, experimentation, or demonstration activity using funds from PE 63382N (Navy Advanced Combat Systems Technology).

The Senate bill contained no similar provision.
The Senate recedes.

Increased micro-purchase threshold for research programs and entities (sec. 217)

The Senate bill contained a provision (sec. 215) that would increase the micro-purchase threshold in Department of Defense research and laboratories activities from \$3,000 to \$10,000. In raising the limit, this provision would allow

appropriate organizations, such as universities, defense labs, and other performers, to facilitate easy and administratively efficient purchasing of small dollar items.

The House amendment contained no similar provision.

The House recesses with an amendment to extend the increase in micro-purchase threshold to all research activities government-wide.

Improved biosafety for handling of select agents and toxins (sec. 218)

The House amendment contained a provision (sec. 214) that would direct the Department of Defense to implement several improvements for handling of select agents and toxins, as recommended from an Army 15-6 investigative report on the individual and institutional accountability for the shipment of viable *Bacillus Anthracis* from Dugway Proving Ground. This section would require the Department to implement a quality assurance and quality control program for any facility producing biological select agents and toxins, and for the Secretary of Defense to submit a report to the congressional defense committees by February 1, 2017, on the potential consolidation of facilities that work with biological select agents and toxins. This section would also require the Comptroller General of the United States to submit a report to the congressional defense committees by September 1, 2017, on the effectiveness and completeness of the Department of Defense's actions taken to address the findings and recommendations of the Army 15-6 investigation.

The Senate bill contained no similar provision.

The Senate recesses with a technical amendment.

Designation of Department of Defense senior official with principal responsibility for directed energy weapons (sec. 219)

The Senate bill contained a provision (sec. 216) that would grant rapid acquisition authorities for directed energy weapons systems to accelerate the development and fielding of directed energy technology and to help offset the gains of potential adversaries. The Senate provision would also establish a joint directed energy program office at the Department of Defense.

The House amendment contained a provision (sec. 220) that would require the Secretary of Defense to designate a senior official already serving within the Department of Defense as a senior official with principal responsibility for the

development and demonstration of directed energy weapons for the Department.

The Senate recedes with an amendment that would require the senior designated official to develop a strategic roadmap for the development and fielding of directed energy technology and to accelerate such development and fielding. The amendment would also rename the joint technology office for high energy lasers to the joint directed energy transition office, and would expand its mission to work with the senior designated official to push the demonstration and transition of directed energy systems, as well as the development of key technologies.

The conferees expect and encourage the Department of Defense to use rapid acquisition authorities authorized to the department in Section 806 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107-314; 10 U.S.C. 2302 note) to speed the development and deployment of operational directed energy capabilities. The committee believes that this provision allows the Secretary of Defense to better use the range of acquisition authorities already at the disposal of the department for the purposes of directed energy weapons system acquisition, including:

- (1) Rapid acquisition authority provided under Section 806;
- (2) Use of other transactions authority provided under section 2371 of Title 10, United States Code;
- (3) Simplified acquisition procedures for the acquisition of commercial items; and
- (4) Authority for procurement for experimental purposes provided under section 2373 of Title 10, United States Code.

Restructuring of the distributed common ground system of the Army (sec. 220)

The House amendment contained a provision (sec. 219) that would require the Secretary of the Army to restructure versions of the distributed common ground system of the Army after Increment 1. The Secretary of the Army shall discontinue development of new software code of any component of the system for which there is commercial, open source, or Government off the self software that is capable of fulfilling at least 80 percent of the system requirements; and conduct a review of the acquisition strategy for the program to ensure that procurement of commercial software is the preferred method of meeting program requirements. The Secretary of the Army shall not award any contract for the development of a new component software capability if such a capability is already a commercial item.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conferees expect the Secretary of the Army to rapidly execute this acquisition so as to quickly improve the field performance of the existing distributed common ground system for the Army, which we do not believe is adequately serving the needs of units at division, brigade and battalion levels.

Limitation on availability of funds for countering weapons of mass destruction system Constellation (sec. 221)

The House amendment contained a provision (sec. 216) that would prohibit the Department of Defense from obligating or expending any funds in fiscal year 2017 for research, development, and prototyping of the countering weapons of mass destruction situational awareness information system, known as "Constellation."

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would limit half the funds available for Constellation until the Secretary of Defense provides an independent review and assessment of the requirements and implementation plan for this system. In addition congressional defense committees shall receive periodic updates prior to the completion of the review.

Limitation on availability of funds for Defense Innovation Unit Experimental (sec. 222)

The House amendment contained a provision (sec. 217) that would limit the amount of authorized funds available to be obligated or expended for the Defense Innovation Unit Experimental (DIUx) to no more than 80 percent until the Secretary of Defense provides a report the congressional defense committees on the charter for and the use of funds to establish and expand DIUx.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would alter the amount of funds subject to limitation and add additional specificity to the reporting requirement.

The conferees remain cautiously optimistic that the changes to the organizational structure and functions of DIUx could become important tools for the Department of Defense (DoD) to engage with new and non-traditional commercial sources of innovation, as well as rapidly identify and integrate new technologies into defense systems. The conferees believe that outreach to commercial companies, small businesses and other

non-traditional defense contractors, in Silicon Valley and across the nation, will be a key element in all efforts at modernizing defense systems and pursuing offsetting technology strategies. However, the conferees are concerned that investments made by DIUx to-date were not focused on rapid delivery of much needed game-changing technologies. Additionally, DIUx's customer base is not as diverse as expected and includes organizations, such U.S. Special Operations Command, with their own acquisition authority and entity established to leverage innovation. Although the conferees are not opposed to any organization partnering with DIUx, the conferees encourage DIUx to establish relationships with services and other Department of Defense organizations that do not have their own funding, authorities, and innovation hubs.

Additionally, the conferees remain concerned that in the Department's rush to try something new, defense leaders have not taken the time to determine how effective recent organizational and management changes are before seeking a rapid expansion of resources. Nor do the conferees believe that the Department has postured DIUx to be successful in the innovation ecosystem with partners across the Department, finding ways to multiply the effectiveness and networking potential of DIUx by leveraging the personnel, expertise, authorities, and resources of existing successful research, development, innovation, and tech transfer mechanisms. These existing mechanisms include the Small Business Innovative Research and Small Business Technology Transition programs, the Department of Defense research laboratories, and other entities that look at technology in classified settings.

Additionally, the conferees are concerned that the Department has found useful mechanisms to identify and engage with new commercial entities, without making demonstrable progress in reducing the acquisition and contractual barriers of entry for these non-traditional providers, as well as all commercial entities wishing to do business with the Department. Without such progress, the conferees are concerned that these non-traditional vendors will become frustrated over time, as has happened in the past, and will revert back to a posture that, at best, reluctantly partners in defense work, and at worst, actively rejects all work with the Department of Defense because the acquisition system is too burdensome and bureaucratic.

Limitation on availability of funds for Joint Surveillance Target Attack Radar System (JSTARS) Recapitalization Program (sec. 223)

The Senate bill contained a provision (Sec. 146) that would limit the availability of fiscal year 2017 and beyond

funds for the Joint Surveillance Target Attack Radar System recapitalization program unless the contract for engineering and manufacturing development uses a firm fixed price contract structure.

The House amendment contained no similar provision.

The House recedes with an amendment that provides the Secretary of Defense with authority to waive the limitation in the provision if the Secretary determines the waiver is in the national security interests of the United States, and includes other minor technical corrections.

The conferees note that to ensure the integrity of the full and open competition nature of this program, they caution the Air Force to guard against the potential prejudicing of this source selection by other Air Force recapitalization programs.

Acquisition program baseline and annual reports on follow-on modernization program for F-35 Joint Strike Fighter (sec. 224)

The Senate bill contained a provision (sec. 1087) that would require the Department of Defense to treat the F-35 Follow-on Modernization program as a separate Major Defense Acquisition Program (MDAP).

The House amendment contained no similar provision.

The House recedes with an amendment that would remove the requirement to treat the Follow-on Modernization program as a separate MDAP and require the Secretary of Defense, not later than March 31, 2017, to submit to the congressional defense committees a report that contains the basic elements of an acquisition program baseline for Block 4 modernization.

SUBTITLE C—REPORTS AND OTHER MATTERS

TITLE V—MILITARY PERSONNEL POLICY

SUBTITLE A—OFFICER PERSONNEL POLICY

Reduction in number of general and flag officers on active duty and authorized end strength after December 31, 2022, of such general and flag officers (sec. 501)

The Senate bill contained a provision (sec. 501) that would add a new section 525a to title 10, United States Code, to establish the authorized distribution of general and flag officers for the Army, Navy, Marine Corps, and Air Force and to require a 25 percent reduction in the number of general and flag officers in the military departments. The provision would also sunset the authorized distribution of general and flag officers in section 525 of title 10, after December 31, 2017.

The amendment would add a new section 526a to title 10, United States Code, to limit the number of general and flag

officers on Active Duty in the military departments and to exclude from those limits the specified number of general and flag officers serving in joint duty assignments and to require a 25 percent reduction in the number of general and flag officers in the military departments and the joint pool. The provision would also sunset the authorized distribution of general and flag officers in section 526 of title 10, after December 31, 2017.

The amendment would add a new section 12004a to title 10 United States Code, to require a 25 percent reduction in the number of general and flag officers in active status in the reserve component, including general officers of the National Guard of the States and territories and general officers serving in the National Guard Bureau, but excluding officers serving as adjutants general or assistant adjutants general of a state. The provision would also sunset the authorized distribution of general and flag officers in section 12004 of title 10, after December 31, 2017.

The House amendment included a provision (sec. 910) that would amend section 164(e) of title 10, United States Code, to specify that the grade of an officer serving as commander of a service or functional component command shall be no higher than lieutenant general or vice admiral. The provision would further require that the total number of officers in the grade of general or admiral on active duty be reduced by five positions, and to require a report to the congressional defense committees on the Department's plan to implement those reductions.

The House recedes with an amendment that would create a new section 526a of title 10, United States Code, to establish authorized end strength of general and flag officers, to reflect a reduction of 110 general and flag officers on active duty by not later than December 31, 2022, and to redistribute authorized general and flag officers across the military departments and the joint pool.

The amendment would require the Secretary of Defense to conduct a study of general and flag officer requirements with a goal of identifying and justifying each general or flag officer position in terms of overall force structure, scope of responsibility, command and control requirements, and force readiness execution and to identify an additional 10 percent reduction in the number of general and flag offices above the reduction of 110 billets. The results of the study shall be submitted to the Committees on Armed Services of the Senate and the House of Representatives no later than April 1, 2017. If practicable, an interim report shall be submitted to the Committees on Armed Forces of the Senate and the House of Representatives on the progress of the completion of the study

and recommendations for achieving the additional 10% reductions in the number of general and flag officer positions.

The provision would also require the Secretary of Defense to submit to Congress with the budget for the Department of Defense for fiscal year 2019 a plan to achieve the reduction of 110 general and flag officers and the proposed distribution of authorized general and flag officer positions to achieve prescribed levels by December 31, 2022. Progress reports on implementing the required plan for reductions would be required with the budget of the Department of Defense for fiscal years 2020, 2021, and 2022. The provision would require the Secretary of Defense to revise applicable guidance of the Department of Defense on general and flag officer authorizations not later than 120 days after completion of the plan to ensure that the reductions required under this provision are incorporated into the planning for executing promotions by the military departments, to ensure that resulting grades for general and flag officers are uniformly applied to positions of similar duties and responsibilities across the military departments and the joint pool, and that planning achieves a reduction in headquarters functions and administrative and support activities and staff of the Department of Defense and the military departments.

The provision would provide for an orderly transition for officers recently assigned to positions that would be eliminated and to require notification to Congress for any affected officer who, by December 31, 2022, has not completed 24 months in a position to be eliminated who may be allowed to complete at least 24 months in such position. The provision would also require certification to accompany all nominations of officers to a grade above O-6, forwarded by the President to the Senate for appointment, by and with advice and consent of the Senate, that the appointment will not interfere with achieving the reduction of 110 general and flag officers required by the provision.

The conferees note that despite two decades of Congressional concern the Department of Defense and the military departments have not demonstrated the willingness to implement even the reduction in the number of general and flag officer positions directed by the Secretary of Defense's Track Four Efficiencies Initiatives decision of March 14, 2011. In the context of the Department of Defense's continued requests to reduce military end strength, especially in the Army and the Marine Corps, reductions that Congress has cautiously considered and authorized, the time has come for the Department to rigorously evaluate and validate every general and flag officer position. The conferees believe that an additional 10%

reduction in the number of general and flag officer positions may be appropriate by downgrading or eliminating positions in addition to the 110 positions required to be eliminated under this provision are achieved. The conferees expect that the Department of Defense and the military departments will improve efficiency by eliminating bloated headquarters and staffs while preserving the necessary number and grades of positions for general and flag officers who are responsible to train and lead our Nation's forces in battle and to bring them safely home again. The conferees expect that the leadership of the Department of Defense and the military departments will approach this effort with the seriousness of conviction that our men and women in uniform, and the American people deserve.

Repeal of statutory specification of general or flag officer grade for various positions in the Armed Forces (sec. 502)

The amendment would also remove the entitlement of the Assistant Judge Advocate Generals of the Navy to receive retired pay for the grade of rear admiral (lower half) unless the officer is authorized the pay under another provision of law.

The conferees note that the provision would not affect the grade of an officer currently serving in the positions and would not prohibit the positions from being filled by an officer with the same, or a higher, or lower grade than the law currently requires.

The House amendment contained a provision (sec. 501) that would amend sections 525 and 526 of title 10, United States Code, to authorize an increase in the number of general officers in the grade above major general from 15 to 17, decrease the number of general officers in the grade of major general from 23 to 22, and increase the number of deputy commandants within the Marine Corps from 6 to 7.

SUBTITLE C—GENERAL SERVICE AUTHORITIES

Matters relating to provision of leave for members of the Armed Forces, including prohibition on leave not expressly authorized by law (sec. 521)

The Senate bill contained a provision (sec. 532) that would modify section 701 of title 10, United States Code, to

authorize up to 12 weeks of leave to be allowed in the case of a servicemember who is the primary caregiver in the case of the birth of a child or the adoption of a child. In the case of leave taken following the birth of a child, the availability of primary caregiver leave would commence after completion of medical convalescent leave resulting from the birth of such child. The provision would also increase the amount of uncharged leave authorized for a secondary caregiver in the case of the birth of a child or the adoption of child. The provision would authorize 21 days of uncharged leave for a birth parent or an adoptive parent who is the secondary caregiver. The provision would repeal subsections of section 701 relating to spouse and adoption leave as obsolete. The provision would require the Secretary of Defense to prescribe in regulation definitions of eligible primary and secondary caregivers for the purposes of this benefit, and to establish regulations for requesting and approving uncharged leave associated with births to a military family, and with adoptions by a military family, and would allow a military member to accept a 1-week extension of a servicemember's military service obligation for every week of such leave approved and taken. The implementing regulations would authorize the secretary concerned to waive service obligation extensions related to this leave as an incentive for re-enlistments.

The provision would also create a new section 704a of title 10, United States Code, which would prohibit leave to be authorized, granted or assigned, including uncharged leave, unless expressly authorized by law. The committee considers this provision necessary to clarify that military leave is established by law and may not be created without express congressional authority.

The House amendment contained a provision (sec. 529) that would amend chapter 40 of title 10, United States Code, by adding a new section 701a which would authorize 14 days of leave to a member of the Armed Forces who becomes a parent when that member's spouse gives birth. The provision would also amend section 701 of title 10, United States Code, to authorize 36 days of leave, to be shared between two members of the Armed Forces who are married to each other and adopt a child.

The House amendment contained a provision (sec. 522) that would amend section 701(i) of title 10, United States Code, to provide one servicemember up to 21 days of leave and another servicemember up to 14 days of leave for the adoption of a child for dual-military couples of the Armed Forces.

The House recedes with an amendment that would authorize up to 12 weeks of total leave, including up to six weeks of medical convalescent leave, to be used by a servicemember who is

the primary caregiver in connection with the birth of a child. The provision would authorize additional medical convalescent leave when specifically recommended, in writing, by the medical provider of the servicemember to address a diagnosed medical condition and when approved by the servicemember's commander. The provision would authorize up to six weeks of leave for the primary caregiver in the case of the adoption of a child, to be used in connection with the adoption. The provision would authorize up to 21 days of leave for the secondary caregiver in the case of the birth of a child or adoption. The provision would require the Secretary of Defense to prescribe in regulation definitions of eligible primary and secondary caregivers for the purposes of this benefit, and to establish regulations for requesting and approving uncharged leave associated with births to a military family, and with adoptions by a military family, and would allow a military member to accept a 1-week extension of a servicemember's military service obligation for every week of such leave approved and taken. The implementing regulations would authorize the secretary concerned to waive service obligation extensions related to this leave as an incentive for re-enlistments. The provision would also create a new section 704a of title 10, United States Code, that would prohibit leave to be authorized, granted, or assigned, including uncharged leave, unless expressly authorized by law.

Transfer of provision relating to expenses incurred in connection with leave canceled due to contingency operations (sec. 522)

The Senate bill contained a provision (sec. 533) that would relocate the authority to reimburse members of the Armed Forces for expenses incurred in connection with leave cancelled due to contingency operations from section 453 of title 37, United States Code, to title 10, United States Code.

The House amendment contained no similar provision.

The House recedes.

The provision would also clarify the scope of sexual assaults covered by the report to include all reported sexual assaults, regardless of the age of the offender or victim or the relationship status between the offender and victim, including, at a minimum, all sexual assault reports received by the Sexual Assault Prevention and Response Program, or equivalent, and the Family Advocacy Program, or equivalent, of each Armed Force.

The Senate bill contained a provision (sec. 550) that would amend section 1561(i) of title 10, United States Code, to modify the definition of sexual harassment. The provision would require a similar report by any member of the Armed Forces in a profession described by subsection 226(b) of the Victims of Child Abuse Act of 1990 (42 U.S.C. 13031) who has reason to suspect that a child in the family or home of a servicemember has suffered an incident of child abuse.

The House amendment contained a provision (sec. 573) that would amend section 8003(a)(5)(A) of the Elementary and Secondary Education Act of 1965 (most recently amended by Public Law 114-95) to authorize a provision that counts all military-connected students living in military housing equally to take effect immediately.

The conferees further intend that if a local educational agency is not eligible for a basic support payment under subclause (IV) of section 7003(b)(2)(B)(i) as amended by this section and the Every Student Succeeds Act but

is eligible under section 7003(b)(2) then the local educational agency may apply under that section.

Air Force Cross, and in those cases where the Secretary concerned determines that the service records of those veterans support the award of the Medal of Honor, this section would also waive the statutory time limitations for award of the Medal of Honor.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretaries of the military departments to review the service records of former members of the Armed Forces whose service records identify them as an Asian American or Native American Pacific Islander war veteran who was previously awarded the Distinguished Service Cross, the Navy Cross, and the Air Force Cross and in those cases where the Secretary concerned determines that the service records of those veterans support the award of the Medal of Honor, this section would also waive the statutory time limitations for award of the Medal of Honor.

SUBTITLE J—MISCELLANEOUS REPORTS AND OTHER MATTERS

Repeal of requirement for a chaplain at the United States Air Force Academy appointed by the President (sec. 591)

The Senate bill contained a provision (sec. 595) that would repeal section 9337 of title 10, United States Code, that requires a chaplain at the United States Air Force Academy appointed by the President. The House recedes.

The House amendment contained a provision (sec. 515) that would require the Secretary of Defense to establish electronic means for reserve component members to track qualifying operational active-duty service that would enable early receipt of reserve retired pay under section 12731(f) of title 10, United States Code.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to assess the feasibility of such an electronic tracking system, and to provide a report to the Committees on Armed Services of the Senate and House of Representatives by no later than May 1, 2017.

The House amendment contained no similar provision.

The House recedes.

Body mass index test (sec. 596)

The House amendment contained a provision (sec. 593) that would require the Secretary of Defense to review the current body mass index test procedure used by the Armed Forces and to determine the best methods to assess body fat percentages to improve the accuracy of body fat measurements.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the service secretaries to conduct the review of current body mass index test procedures and other methods to measure body fat with a more holistic health and wellness approach.

Report on career progression tracks of the Armed Forces for women in combat arms units (sec. 597)

The Senate bill contained a provision (sec. 594) that would require the Secretary of Defense to submit a description of the career progression track for entry level and laterally moved female service members, both officer and enlisted, of each Armed Force for positions that have been opened as a result of the December 3, 2015, decision by the Secretary to open all previously closed military occupations to women.

The House amendment contained no similar provision.

The House recedes.

LEGISLATIVE PROVISIONS NOT ADOPTED

Temporary suspension of officer grade strength tables

The Senate bill contained a provision (sec. 503) that would amend sections 523(a) and 12011(a) of title 10, United States Code, to remove the limitations on the total number of commissioned officers authorized to serve on Active Duty or on full-time reserve component duty in the pay grades of O-4 through O-6 as of the end of the fiscal year for fiscal years 2017 through 2021.

The House amendment contained no similar provision.

The Senate recedes.

The conferees believe that providing relief from statutory caps on the numbers of officers of the active and reserve components serving in pay grades from O-4 to O-6, for an appropriate trial period, may allow the secretaries of the military departments to adjust the shape of their officer corps to affect talent management-based promotion systems and more quickly adapt to changing war fighting requirements and available talent supply. The conferees are concerned that such

statutory flexibility must be exercised in a manner that would promote lean, efficient, and highly effective officer corps and must not result in bloated senior officer ranks that impede the proper administration of the officer personnel management system. Therefore, the conferees modify the reporting requirement directed in the Senate report accompanying section 503 of S.2943 (S. Rept. 114-255) to require the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than March 1, 2017, describing how the military departments would propose to use the authority described in section 503 of the Senate-passed bill, a description of the specific categories of adjustments in control grades and the number and percentages of such adjustments desired, and an assessment of the impact of the authority, if implemented, on the desired officer grade composition of the military departments. The report shall specifically address the proposed use of this authority for military intelligence officers, foreign area specialists, judge advocates with a military justice skill identifier, and officers with expertise in cyber matters.

Enhanced authority for service credit for experience or advanced education upon original appointment as a commissioned officer

The Senate bill contained a provision (sec. 504) that would amend section 533 of title 10, United States Code, to authorize service secretaries to credit an applicant for an original appointment in a commissioned grade with an amount of constructive credit limited to the amount required for an original appointment in the grade of colonel in the Army, Air Force, or Marine Corps, or in the grade of captain in the Navy. The provision would authorize the secretary concerned to award constructive credit for leadership experience, professional credentials, and technical expertise to directly commission officers up to the grade of O-6.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that another provision of this Act would authorize the military departments to conduct pilot programs to commission cyber professionals. The conferees recognize that the use of similar authorities to commission professionals such as doctors, lawyers, and chaplains continues to have great utility in providing trained professionals for the military departments. It may be useful to extend such authorities to branches, career fields, and occupational specialties that may be designated by the services as having technical or warfighter status. The conferees encourage the

Department of Defense to provide detailed information to the Committees on Armed Services of the Senate and of the House of Representatives on how the expanded use of such authorities may be utilized.

Authority of promotion boards to recommend officers of particular merit be placed at the top of the promotion list

The Senate bill contained a provision (sec. 505) that would amend section 616 of title 10, United States Code, to authorize an officer promotion board to recommend Active-Duty officers of particular merit to be placed at the top of the promotion list.

The House amendment contained no similar provision.
The Senate recedes.

The conferees remind the Department of Defense that the Joint Explanatory Statement accompanying the National Defense Authorization Act for Fiscal Year 2016 (P.L. 114-92) identified the need to review and modernize procedures to select officers for promotion. The Department of Defense was encouraged to develop recommendations to enhance the flexibility of selection boards to identify and select officers of particular merit for early promotion, using procedures that all stakeholders would view as objective and fair. Despite the Department's much-touted Force of the Future studies, the last year saw no recommendations to Congress that would provide the flexibility the Department claims to need to recruit, commission, promote, and retain the high quality all-volunteer force the Nation requires.

Limitations on ordering selected reserve to active duty for preplanned missions in support of the combatant commands

The House amendment contained a provision (sec. 513) that would amend section 12304(b) of title 10, United States Code, to authorize the Secretary of Defense to order any unit of the Selected Reserve to Active Duty during the year of execution if the Secretary identifies manpower and associated costs as an emerging requirement in the year of execution and provides a 30-day notice to the congressional defense committees.

The Senate bill contained no similar provision.
The House recedes.

The conferees note that the authority to order Selected Reserve units to Active Duty under section 12304(b) of title 10, United States Code, is designed to incentivize deliberate planning for the use of the Selective Reserve as part of the operational force by requiring missions to be planned in advance

and included in annual budget submissions. Other provisions of title 10, United States Code, provide authority to order members and units of the reserve components to Active Duty to address emerging requirements arising during the year of execution.

Exemption of military technicians (dual status) from civilian employee furloughs

The House amendment contained a provision (sec. 514) that would amend section 10216(b)(3) of title 10, United States Code, to exempt military dual-status technicians from civilian employee furloughs.

The Senate bill contained no similar provision.

The House recedes.

Authority to designate certain Reserve officers as not to be considered for selection for promotion

The Senate bill contained a provision (sec. 522) that would amend section 14301 of title 10, United States Code, to authorize the secretaries of the military departments to defer promotion consideration for reserve component officers in a non-participatory (membership points only) status.

The House amendment contained no similar provision.

The Senate recedes.

Responsibility of Chiefs of Staff of the Armed Forces for standards and qualifications for military specialties within the Armed Forces

The Senate bill contained a provision (sec. 531) that would vest in the Chief of Staff of each of the Armed Forces the responsibility for establishing, approving, and modifying the criteria, standards, and qualifications for military specialty codes within that Armed Force. The Secretary of Defense would retain oversight authority.

The House amendment contained no similar provision.

The Senate recedes.

The conferees expect service secretaries to consult with and receive the advice of the Chiefs of Staff of each of the Armed Forces when making decisions on military standards and qualifications.

Reconciliation of contradictory provisions relating to qualifications for enlistment in the reserve components of the Armed Forces

The Senate bill contained a provision (sec. 537) that would amend section 12102(b) of title 10, United States Code, to align the requirements for enlistment in the reserve components of the Armed Forces with the requirements for enlistment in the active components.

The House amendment contained no similar provision.

The Senate recedes.

Burdens of proof applicable to investigations and reviews related to protected communications of members of the armed forces and prohibited retaliatory actions.

The House amendment contained a provision (sec. 545) that would amend section 1034 of title 10, United States Code, to establish the burden of proof under this section for military retaliation investigations to be the same as the burden of proof applicable to retaliation investigations under section 1221(e) of title 5, United States Code.

The Senate bill contained no similar provision.

The House recedes.

The conferees included a number of provisions in this Act that will provide necessary tools to allow military victims of retaliation to be provided full, fair, and expeditious investigation and relief, when appropriate, in response to alleged retaliation. The conferees are mindful however that the requirements, hardships, and sacrifices of military service are unique and unlike those of the federal civilian workplace that section 1221(e) of title 5 is intended to address. We consider the burden of proof standards under section 1221(e) to be properly tailored to the federal civilian workforce. However, the conferees concluded that the burden of proof standards that properly apply in a civilian context are not amenable to the unique demands of military service. The conferees remain concerned about reports from military personnel who indicate they have been subjected to retaliation after making protected communications. The conferees intend to remain seized of this issue and will assess the impact of the provisions in this bill to reducing the prevalence of retaliation in the military.

Discretionary authority for military judges to designate an individual to assume the rights of the victim of an offense under the Uniform Code of Military Justice when the victim is a minor, incompetent, incapacitated, or deceased

The Senate bill contained a provision (sec. 546) that would amend section 806b(c) of title 10, United States Code (Article 6b(c), Uniform Code of Military Justice (UCMJ)) to

authorize military judges to decide on a case-by-case basis whether it is appropriate to appoint an individual to assume the victim's rights in all cases under the UCMJ in which the victim of an offense is under 18 years of age (unless the victim is a member of the Armed Forces) or is incompetent, incapacitated, or deceased.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that a similar provision is included in the Military Justice Act of 2016 which is enacted elsewhere in this Act.

Appellate standing of victims in enforcing rights of victims under the Uniform Code of Military Justice

The Senate bill contained a provision (sec. 547) that would amend section 806b of title 10, United States Code (article 6b of the Uniform Code of Military Justice(UCMJ)) to authorize victims to file pleadings as a real party in interest when the Government files appellate pleadings implicating the victim's rights relating to Military Rule of Evidence (MRE) 412, relating to the admission of evidence regarding a victim's sexual background; MRE 513, relating to the psychotherapist-patient privilege; or MRE 514, relating to the victim advocate-patient privilege. The provision would also amend section 806b of title 10, United States Code (article 6b of the UCMJ) to afford a victim with the right to reasonable, accurate, and timely notice of any appellate matters.

The House contained no similar provision.

The Senate recedes.

The conferees understand that the Judicial Proceedings Panel (JPP) established by section 576 of the National Defense Authorization Act for Fiscal Year 20 13 (Public Law 112-239) will receive testimony and address this issue in future public meetings of the JPP. The conferees will reconsider this issue after receipt of the JPP recommendations.

Limitation on tuition assistance for off-duty training or education

The Senate bill contained a provision (sec. 561) that would amend section 2007 of title 10, United States Code, to limit the tuition assistant program for off-duty training and education to education programs likely to contribute to the professional development of the servicemember.

The House amendment contained no similar provision.

The Senate recedes.

The conferees support Department of Defense and military service efforts over the past several years to ensure the integrity of the tuition assistance program, and the educational success of servicemembers utilizing the benefit, through implementation of common-sense restrictions on premature use by servicemembers still adjusting to military life and who are still learning their military occupations, as well as restrictions on those who would inappropriately use the benefit to acquire additional degrees at the same level of attainment.

Establishment of ROTC cyber institutes at senior military colleges

The House amendment contained a provision (sec. 562) that would amend chapter 103 of title 10, United States Code, to authorize the Secretary of Defense to carry out a program to establish ROTC Cyber Institutes at the six Senior Military Colleges for purposes of accelerating the development of foundational expertise in critical cyber operational skills for future military and civilian leaders of the Armed Forces and Department of Defense, to include such leaders of the Reserve Components.

The Senate bill contained no similar provision.

The House recedes.

The conferees note that many ROTC programs are beginning to implement cyber training for critical cyber operational skills. The conferees encourage these and other ROTC programs to continue building and teaching a cyber framework for future military and civilian leaders of the Armed Forces and Department of Defense.

Access to Department of Defense installations of institutions of higher education providing certain advising and student support services

The Senate bill contained a provision (sec. 563) that would amend chapter 101 of title 10, United States Code, to require the Secretary of Defense to grant access to all Department of Defense installations any institution of higher education that has a Voluntary Education Partnership Memorandum of Understanding with the Department for the purposes of student advising and support services.

The House amendment contained no similar provision.

The Senate recedes.

Employment authority for civilian faculty at certain military department schools

The House amendment contained a provision (sec. 564) that would amend section 4021 of title 10, United States Code, to authorize the Secretary concerned to hire staff for professional military education courses regardless of course length.

The Senate bill contained no similar provision.

The House recesses.

Revision of name on military service record to reflect change in name of a member of the Army, Navy, Air Force, or Marine Corps, after separation from the Armed Forces

The House amendment contained a provision (sec. 565) that would amend section 1551 of title 10, United States Code, to allow persons who legally change their name to reflect their gender identity after separation from the Armed Forces to receive a new certificate of discharge or acceptance of resignation order under that new name.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that former service members currently have a process to request their name be changed on official service discharge documents to reflect a legal name change, by submitting a request to the appropriate service board for correction of military or naval records. Effective October 1, 2016, the Department of Defense (DoD) and the Military Departments will implement DoD Instruction 1300.28, that requires the services to provide servicemembers a process by which, while serving, they may change their gender. The conferees expect the Department to make the necessary changes to regulations to provide former members a simplified process to reflect a name change in military personnel records due to change in gender identity or other lawful purpose.

Direct employment pilot program for members of the National Guard and Reserve

The House amendment contained a provision (sec. 566) that would authorize the Secretary of Defense to carry out a pilot program to enhance efforts of the Department of Defense to provide job placement assistance and related employment services directly to members of the National Guard and Reserves. This section would also require the Secretary to submit a report on the program to the Committees on Armed Services of the Senate and the House of Representatives by January 31, 2021.

The Senate bill contained no similar provision.

The House recesses.

The conferees note that the South Carolina and California National Guards conduct state employment programs that have seen success in recent years and serve as a model for other states and territories to set up similar state employment programs. The conferees note the numerous employment assistance programs for transitioning servicemembers coordinated by the military services, the Department of Defense, the Department of Labor, and the Department of Veterans Affairs, such as the Department of Labor's Veterans' Employment and Training Service and the Department of Veterans Affairs' VA for Vets program and Feds Hire Vets employment tool. The conferees encourage the Chief of the National Guard Bureau to work with the Secretary of Defense to coordinate with the Secretary of Labor and the Secretary of Veterans Affairs to leverage these preexisting Federal employment programs.

Prohibition on establishment, maintenance, or support of Senior Reserve Officers' Training Corps units at educational institutions that display the Confederate battle flag

The House amendment contained a provision (sec. 567) that would amend section 2102 of title 10, United States Code, to prohibit the secretary concerned from establishing, maintaining, or supporting a Senior Reserve Officers' Training Corps unit at an educational institution that displays the Confederate battle flag except where the board of visitors has voted to take down the flag described.

The Senate bill contained no similar provision.

The House recedes.

Report on composition of service academies

The House amendment contained a provision (sec. 568) that would require the Comptroller General of the United States to submit a report on the demographic composition of the service academies.

The Senate bill contained no similar provision.

The House recedes.

Enhanced flexibility in provision of relocation assistance to members of the Armed Forces and their families

The Senate bill contained a provision (sec. 576) that would amend section 1056 of title 10, United States Code, to permit enhanced flexibility in giving relocation assistance to members of the Armed Forces and their families. The provision would allow the Department of Defense to adapt the delivery of

relocation assistance to meet the evolving needs of military servicemembers and their families by leveraging technology to improve access, efficiency, and responsiveness of the relocation assistance program, especially in situations where servicemembers reside overseas or away from a military installation with a relocation assistance program. Finally, the provision would establish the position of Program Manager of Military Relocation Assistance in the office of the Assistant Secretary of Defense for Manpower and Reserve Affairs.

The House amendment contained no similar provision.

The Senate recedes.

Background checks for employees of agencies and schools providing elementary and secondary education for Department of Defense dependents

The Senate bill contained a provision (sec. 578) that would require certain local educational agencies receiving impact aid under subchapter VII of chapter 70 of title 20, United States Code, and each Department of Defense (DOD) domestic dependent elementary and secondary school, within 2 years of enactment of this Act, to establish policies and procedures requiring a criminal background check for each school employee of the agency or school.

The House amendment contained no similar provision.

The Senate recedes.

The conferees believe the protection of school children from would-be predators is of paramount importance. Children of military personnel, who by virtue of a parent's military service are more transient with fewer community ties and relationships, may be more vulnerable to such predators. The conferees believe it is important that appropriate criminal background checks be conducted of school employees in Department of Defense (DOD) schools and local educational activities that educate military family members. Despite the requirement in every state that background checks be conducted, and recently-enacted prohibitions in the Every Student Succeeds Act that restrict the movement and reemployment of predators in other states, there were still 496 arrests of school employees in the United States last year for sexual misconduct with children, according to press reports. Clearly, the problem of child predation and abuse remains in our local school systems. The conferees note that DOD schools conduct thorough criminal background checks on their employees, and the conferees are committed to subjecting DOD schools to the oversight required to ensure that they conduct thorough criminal background checks on their employees. Given the critical importance of this issue and the defense

authorizing committees' continuing concern that children at risk are adequately protected, the conferees strongly urge DOD to work as closely as possible with local school districts that educate military family members to share best practices to help those districts develop and improve comprehensive employment screening policies to ensure the safety of military children. The conferees direct the Department to provide a report to the Committees on Armed Services of the Senate and the House of Representatives, not later than 1 year after the date of enactment of this Act, on the Department's efforts to: 1) identify, to the extent practicable, any shortfalls in employee screening processes in local school districts educating military family members; and 2) provide recommendations to help address those shortfalls in the future.

Sense of Congress regarding plight of male victims of military sexual assault

The House amendment contained a provision (sec. 596) that would express the sense of Congress that the Secretary of Defense should enhance access to intensive medical and mental health treatment of male victims of sexual assault, look for opportunities to use male victims as presenters at prevention training, and ensure medical and mental health providers are trained to meet the needs of male victims.

The Senate bill contained no similar provision.

The House recedes.

The conferees remain concerned that more must be done to address the unique issues and concerns affecting male victims of sexual assault. For that reason, section 538 of the National Defense Authorization Act for Fiscal Year 2016 (P.L. 114-92) requires the Secretary of Defense, in collaboration with the secretaries of the military departments, to develop a comprehensive plan to improve Department of Defense prevention and response to sexual assaults in which the victim is a male member of the armed forces. The conferees look forward to receiving the plan from the Secretary of Defense and intend to monitor the efficacy of the plan.

TITLE VI—COMPENSATION AND OTHER PERSONNEL BENEFITS

SUBTITLE A—PAY AND ALLOWANCES

Fiscal year 2017 increase in military basic pay (sec. 601)

The Senate bill contained a provision (sec. 601) that would authorize a pay raise of 1.6 percent for all members of the uniformed services effective January 1, 2017.

The House amendment contained a provision (sec. 601) that would direct that the rates of basic pay under section 203(a) of title 37, United States Code, be increased in accordance with section 1009 of title 37, United States Code, notwithstanding a determination made by the President under subsection (e) of such section 1009.

The Senate recedes.

The Senate bill contained a provision (sec. 602) that would direct the Department of Defense to ensure that pay tables of basic pay for members of the uniformed services published by

the Department reflect the operation of the pay cap contained in section 203(a)(2) of title 37, United States Code, to more accurately reflect the rates of basic pay that may actually be received by service members whose basic pay is affected by that cap.

The House amendment contained no similar provision.

Extension of authority to provide temporary increase in rates of basic allowance for housing under certain circumstances (sec. 603)

Reports on a new single-salary pay system for members of the Armed Forces (sec. 604)

The Senate bill contained a provision (sec. 604) that would reform the basic allowance for housing (BAH) benefit for members of the uniformed services, applicable January 1, 2018. The provision would require a system that utilizes actual costs up to a maximum allowable amount. No service member will see a change in their allowance until such time as they undergo a permanent change of duty station outside their military housing area after January 1, 2018.

The House amendment contained no similar provision.

The Senate recedes with an amendment that would require the Department of Defense to report back with revised pay tables and a plan to transition to a salary system by no later than January 1, 2018. An initial assessment and progress report will be due to the Committees on Armed Services of the Senate and the House of Representatives no later than March 1, 2017, to contain the military pay tables as of January 1, 2017, that reflect the Regular Military Compensation of members of the Armed Forces as of that date in the range of grades, dependency statuses, and assignment locations.

The conferees note that the BAH, as an entitlement, and the perception of BAH among servicemembers, has evolved over the past 20 years. BAH, and the iterations of the benefit that came before, was intended to provide a housing benefit for service

members to offset the cost of housing in high cost housing areas where adequate government-provided quarters was not available and in recognition of the transient nature of military service and the impact it has on military members and their families. Indeed, that the housing allowance was and is intended as primarily a housing benefit is demonstrated by its tax-free nature, the differentiation based on dependency status, and the fact that junior enlisted personnel required to reside in barracks or on a ship are ineligible to receive BAH. Accordingly, the conferees direct the Secretary of Defense to begin planning for a transition to a salary system that better aligns the payment of the allowance with the Department's use of the housing allowance as compensation rather than its intended purpose as an allowance.

The House amendment contained an identical provision (sec. 615).

The conference agreement includes this provision.

Aviation incentive pay and bonus matters (sec. 616)

The House amendment contained a provision (sec. 616) that would amend section 334(c)(1) of title 37, United States Code, to increase the statutory limits for the aviation incentive pay and retention bonus to \$1,000 per month and \$60,000 per year, respectively, and would allow the Secretary concerned the flexibility to increase the aviation incentive pay limit set forth in regulations issued by the Secretary of Defense under section 374 of title 37, United States Code.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would authorize a maximum aviation bonus of \$35,000 for each 12-month period of obligated service, and requires the appropriate Service Secretary to submit a justification with each fiscal year's budget request for the aviation bonus amounts by aircraft type category, the business case supporting the amount requested, and a description by the Secretary concerned on how they will address manning shortfalls by non-monetary means.

The conferees note the current Chief of Staff of the Air Force stated in response to advance policy questions in preparation for his confirmation hearing, "We will tailor any potential bonus based upon specific platform and overall Air Force requirements. The requested increase is not a set amount. If approved, this will give us the flexibility to tailor bonus amounts and contract terms by platform." The conferees strongly agree with targeting aviation bonuses toward the most critical manning shortfalls by aircraft type category as a way to incentivize retention behavior, and strongly support this method for use across the Department of Defense.

The conferees also expect the Services to continue developing and implementing policies to tackle non-monetary reasons for low aviator retention rates, and to use these

incentive and bonus authorities to incentivize needed retention levels using a business case rather than as a reward or entitlement, to correct both the undermanning of certain aircraft type categories and the overmanning of others.

Conforming amendment to consolidation of special pay, incentive pay, and bonus authorities (sec. 617)

The Senate bill contained a provision (sec. 616) that would amend section 332 of title 10, United States Code, to correct an inequity that will exist when the Department transitions to a general bonus authority on October 1, 2017. This amendment will increase the maximum bonus authority under the new general bonus authority to \$20,000 to match the maximum bonus level under the old authority. Maintaining the current bonus level will enable the Services to retain the ability to recruit and retain reserve component officers.

The House amendment contained an identical provision (sec. 617).

The conference agreement includes this provision.

Technical amendments relating to 2008 consolidation of certain special pay authorities (sec. 618)

The House amendment contained a provision (sec. 618) that would make technical and clerical corrections to titles 10, 20, 24, 36, 37, and 42, United States Code, as well as section 586 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), section 362 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364), and section 112(c)(5)(B) of the Internal Revenue Code of 1986, as part of the Department of Defense's transition to the consolidated authorities in sections 661 and 662 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), which consolidated statutory special and incentive pay authorities for members of the uniformed services. This section is consistent with the purpose and intent of the consolidated special and incentive pay reform contained in the 2008 defense bill.

The Senate bill contained a similar provision (sec. 634).

The House recedes.

PART II—OTHER MATTERS

Use of member's current pay grade and years of service and retired pay cost-of-living adjustments, rather than final retirement pay grade and years of service, in a division of property involving disposable retired pay (sec. 641)

The Senate bill contained a provision (sec. 642) that would amend section 1408 of title 10, United States Code, to modify the division of military retired pay in a divorce decree to the amount the member would be entitled based upon the member's pay grade and years of service at the time of the divorce rather than at the time of retirement with the spousal share of the retired pay computed on the retired pay as adjusted by the annual increases in military pay.

The House amendment contained a similar provision (sec. 625) that would amend section 1408 of title 10, United States Code, to modify the division of military retired pay in a divorce decree to the amount the member would be entitled based upon the member's pay grade and years of service at the time of the divorce.

The House recedes with an amendment that would modify the division of military retired pay in a divorce decree to the amount the member would be entitled based upon the member's pay grade and years of service at the time of the divorce as adjusted by the annual retired pay cost-of-living adjustments between the date of the divorce decree and the date of retirement. The conferees note that this provision is prospective only and would not affect existing divorce settlements.

**SUBTITLE E—COMMISSARY AND NON-APPROPRIATED
FUND INSTRUMENTALITY BENEFITS AND
OPERATIONS**

*Protection and enhancement of access to and savings at
commissaries and exchanges (sec. 661)*

The Senate bill contained a provision (sec. 661) that would amend sections 2481, 2483, 2484, and 2487 of title 10, United States Code, to require the Secretary of Defense to develop and implement a comprehensive strategy to optimize management practices across the defense commissary system and the exchange system that reduces their reliance on appropriated funding without reducing benefits to commissary patrons or revenues generated by non-appropriated fund entities. This provision would authorize the Secretary to carry out an alternative pricing program, evaluated against specific, measurable benchmarks and a documented baseline level of savings, within the defense commissary system to establish prices for goods and services in response to market conditions and customer demand. Furthermore, the provision would authorize the Secretary to convert the commissary system to a non-appropriated fund entity or instrumentality if the Secretary determines that the alternative pricing program met established benchmarks for success for a period of at least 6 months. If conversion to a non-appropriated fund entity or instrumentality occurs, the Secretary would ensure that no employee of the defense commissary system, as of the date of enactment of this Act, would incur a loss or decrease in pay resulting from the conversion. This provision would also authorize the Secretary of Defense to establish common business processes, practices, and systems to optimize the operations of the entire defense resale system, including authorizing the use of appropriated and non-appropriated funds on contracts or agreements for the acquisition of common systems. Finally, the provision would authorize the Secretary to supplement appropriated funds for

defense commissary system operations with additional funds derived from improved management practices and the alternative pricing program.

The House amendment contained a provision (sec. 631) that would amend sections 2481(a) and (c), 2483(c), 2484, 2485, and 2487 of title 10, United States Code, to authorize the Secretary of Defense to develop and implement a comprehensive strategy to: 1) optimize practices across the commissary and exchange systems to reduce the reliance of those systems on appropriated funds without reducing benefits to patrons or any revenues generated by non-appropriated fund entities or instrumentalities of the Department for the morale, welfare, and recreation of servicemembers; 2) authorize use of additional funds derived from improved management practices to supplement appropriated funds for commissary operations; 3) authorize a variable pricing program whereby commissary prices may be established in response to market conditions and customer demand; 4) authorize conversion of the commissary system to a non-appropriated fund entity or instrumentality if the Secretary determines that the variable pricing program meets established benchmarks for success for a period of at least 6 months; and 5) authorize the Secretary to contract with an entity to obtain expert commercial advice, assistance, or other services not otherwise carried out by the Defense Commissary Agency.

The Senate recedes.

The conferees believe this provision will significantly improve the business operations of the commissary system and lead to greater efficiency in the delivery of high quality grocery products and services to commissary patrons without diminishing the current level of patron savings. The conferees remain concerned, however, that the current senior management of the Defense Commissary Agency may lack the necessary talent and skills to transform the commissary system into an efficient, high-performing purveyor of grocery products and services. The conferees strongly urge the Department to engage experts in the commercial grocery industry to assist the Defense Commissary Agency in the transformation of the commissary system into a high-performing grocery operation.

Acceptance of Military Star Card at commissaries (sec. 662)

The House amendment contained a provision (sec. 632) that would require the Secretary of Defense to ensure that commissary stores accept the Military Star Card as payment for goods and services. States relating to acceptance of the Military Star Card as payment for goods and services at commissary stores.

The Senate bill contained no similar provision.

The Senate recedes.

SUBTITLE F—OTHER MATTERS

The House amendment contained a provision (sec. 642) that would amend section 1007(c)(3) of title 37, United States Code, to establish a 10-year statute of limitations on the authority of the government to collect an indebtedness to the government owed by a servicemember if the indebtedness occurred through no fault of the member. The statute of limitations established under this provision would apply to indebtedness incurred on or after October 1, 2027. The provision would require the Director of the Defense Finance and Accounting Service to provide an annual report, commencing on January 1, 2017 and each year through 2027, on cases in which recovery of indebtedness commenced after the end of the 10-year period beginning on the date when the indebtedness was incurred, or in which the member was not notified of the indebtedness during such 10-year period.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would direct the Secretary of Defense to conduct a review of all bonus pays, special pays, student loan repayments, and similar special payments paid to members of the California National Guard between January 1, 2004 and December 31, 2015. The review is required to be completed by July 30, 2017. The provision requires a board of review designated by the Secretary of Defense to determine whether the special pay to these members and former members was unwarranted and, if so, to recommend to the Secretary concerned whether to recoup the payment, waive the recoupment, or in the case of recoupments that were previously collected but were unwarranted by the evidence, to recommend whether the payments should be repaid to the member or former member. The provision would authorize the Secretary concerned to waive collection of overpayments or to repay previously recouped payments that were unwarranted. The provision would require the Secretary concerned to notify consumer credit reporting agencies if the review determines that an indebtedness previously reported to the credit reporting agency was invalid. The funding for activities associated with the review, including repayments to members and former members, shall be paid from amounts available for the National Guard of the United States

for the State of California. The provision requires the Secretary of Defense to submit a report on the results of the review to the Committees on Armed Services of the Senate and of the House of Representatives not later than August 1, 2017. The provision also requires the Comptroller General of the United States to report, not later than one year after the date of enactment of this Act, on the actions of the National Guard of the State of California related to the bonus pays, special pays, student loan repayments, and other special pays from 2004 through 2015.

Modification of flat rate per diem requirement for personnel on long-term temporary duty assignments (sec. 672)

The Senate bill contained a provision (sec. 1151) that would require the Secretary of Defense to take such action as may be necessary to provide that, to the extent that regulations implementing travel and transportation authorities for military and civilian personnel of the Department of Defense impose a flat rate per diem for meals and incidental expenses for authorized travelers on long term temporary duty (TDY) assignments that is at a reduced rate compared to the per diem rate otherwise applicable, the Service Secretary concerned may waive the applicability of such reduced rate and pay such travelers actual expenses up to the full per diem rate for such travel in any case when the Secretary concerned determines that the reduced flat rate per diem for meals and incidental expenses is not sufficient under the circumstances of the TDY assignment.

The House amendment contained a provision (sec. 603) that would prohibit the Secretary concerned from altering the per diem allowance for the duration of a temporary duty assignment of a member of the Armed Forces or an employee of the Department of Defense.

The House recedes with a clarifying amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Sense of the Congress on Roth contributions as default contributions of members of the Armed Forces participating in the Thrift Savings Plan under retired pay reform

The Senate bill contained a provision (sec. 635) that would state the sense of the Congress that the Department of Defense should explore making the default contributions of a full Thrift Savings Plan member under the new military retirement plan enacted in the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to be designated as

Roth contributions until the member elects not to designate such contributions as Roth contributions.

The House amendment contained no similar provision.

The Senate recedes.

Sense of the Congress on options for members of the Armed Forces to designate payment of the death gratuity to a trust for a special needs individual

The Senate bill contained a provision (sec. 645) that would express the Sense of the Congress that the Department of Defense should explore options to allow servicemembers to designate that, upon their death, the death gratuity may be paid to a trust that is legally established under any federal, state, or territorial law.

The House amendment contained no similar provision.

The Senate recedes.

Period for relocation of spouses and dependents of certain members of the Armed Forces undergoing a permanent change of station

The Senate bill contained a provision (sec. 622) that would add a new section 1784b of title 10, United States Code, to provide greater flexibility for families to determine the sequencing of permanent change of station moves under certain circumstances.

The House amendment contained no similar provision.

The Senate recedes.

The conferees direct the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives no later than six months after the date of enactment of this Act on actions taken by the Department of Defense to enhance the stability of military families undergoing a permanent change of station (PCS). The report shall include an analysis of the current extent of family disruption associated with PCS moves of members of the Armed Forces, a description of the actions taken by the Department of Defense to minimize such disruptions, and further actions recommended by the Secretary of Defense to alleviate family disruption associated with a PCS move.

TITLE VII—HEALTH CARE PROVISIONS

SUBTITLE A—REFORM OF TRICARE AND MILITARY HEALTH SYSTEM

TRICARE Select and other TRICARE Reform (sec. 701)

The Senate bill contained a provision (sec. 701) that would amend chapter 55 of title 10, United States Code, to reform health care plans available under the TRICARE program. The provision would establish three health plan choices for families of Active-Duty servicemembers, and retired military members and their families: 1) TRICARE Prime, a managed care option; 2) TRICARE Choice, a self-managed option; and 3) TRICARE Supplemental, an option for retired members and their families, other than TRICARE-For-Life beneficiaries, who have other health insurance. Beneficiaries would be required to enroll in one of the TRICARE options during an annual open enrollment period in order to obtain care through the TRICARE Program.

Under this provision, the Department would offer TRICARE Prime in areas near military treatment facilities (MTFs). Active-Duty family members would be authorized to enroll in TRICARE Prime, and there would be no cost shares. Retirees and their family members would be authorized to enroll in TRICARE Prime in areas where an MTF has a significant number of health care providers, including specialty providers, and sufficient capability to support efficient operations of the MTF. A TRICARE Prime enrollee would be required to obtain a referral for care from a designated primary care manager prior to obtaining care under the TRICARE program. A referral to network providers for specialty care services would not require a beneficiary to obtain a pre-authorization. The provision would require the Secretary to ensure that beneficiaries have the same level of access to care within timelines that meet or exceed those of high-performing health systems in the private sector. The provision would establish TRICARE Choice in other locations in the country, and beneficiaries may receive care from any health care provider selected by the member subject to any restrictions established by the Secretary.

This provision would include a cost-share table for calendar year 2018 for both TRICARE Prime and TRICARE Choice that would establish rates for annual enrollment fees, annual deductibles, annual catastrophic caps, and co-payments for inpatient visits, outpatient visits, and other services. The provision would gradually increase the annual enrollment fee for military retirees and their families under TRICARE Choice over a period of 5 years through 2023. Subsequently, annual enrollment fees for military retirees and their families in TRICARE Choice

after 2023, and for military retirees and their families under TRICARE Prime after 2018, would increase by the annual percent of the Consumer Price Index for Health Care Services, published by the Bureau of Labor Statistics. Additionally, the provision would increase the deductible, co-payment, and annual catastrophic cap amounts after 2018, by the annual cost of living adjustment for military retired pay. The provision would authorize the Secretary to adopt special coverage and reimbursement methods, amounts, and procedures to encourage the use of high-value services and products and to discourage the use of low-value services and products.

Under this provision, retirees and their family members with other health insurance would be authorized to enroll in the TRICARE Supplemental option. The provision would establish an annual enrollment fee that would be one-half of the fee for the TRICARE Choice option. Under TRICARE Supplemental, TRICARE would pay the deductible and co-payment amounts under the beneficiary's primary health plan, not to exceed the amount TRICARE would have paid as primary payer to an out-of-network provider.

A number of existing TRICARE programs would remain unchanged under this provision: 1) Extended Health Care Option Program; 2) TRICARE Reserve Select; 3) TRICARE Retired Reserve; 4) TRICARE Dental Program; and 5) the Continued Health Care Benefits Program. This provision would not affect the required cost-shares under the TRICARE Pharmacy Benefits Program, but the annual enrollment fee, annual deductible, and annual catastrophic cap established in this section would apply to the pharmacy program. With this provision, the cost-share requirements for remote area dependents would be the same as those established under the TRICARE Prime Option but without a referral requirement.

The House amendment contained a provision (sec. 701) that would amend chapter 55 of title 10, United States Code, to establish TRICARE Preferred as the self-managed, preferred provider option in the TRICARE program, replacing TRICARE Standard and Extra. The provision would establish annual enrollment fees and fixed dollar co-payments for Active-Duty family members and retirees who join the Armed Services on or after January 1, 2018, and enroll in TRICARE Preferred or TRICARE Prime, the managed care option. In addition, the provision would authorize an annual enrollment fee for TRICARE Preferred for beneficiaries who were in either the Active-Duty or retired beneficiary categories prior to January 1, 2018. However, the provision would prohibit the Secretary from establishing this annual enrollment fee until 90 days after the Comptroller General of the United States submits a report, not

later than February 1, 2020, to the Committees on Armed Services of the Senate and the House of Representatives on access to care, network adequacy, and beneficiary satisfaction under TRICARE Preferred. The provision would also require the Comptroller General, not later than September 1, 2017, to submit to the committees a report on the assessment of network adequacy and beneficiaries' access to care under the TRICARE health care provider network. Finally, the provision would require the Secretary to submit an implementation plan, not later than June 1, 2017, to the committees to improve access for TRICARE beneficiaries. The Comptroller General would be required to submit to the committees, not later than December 1, 2017, a review of the implementation plan submitted by the Secretary.

The Senate recedes with an amendment that would: 1) rename the TRICARE Preferred health plan option to TRICARE Select; 2) modify the tables prescribing enrollment fees, deductibles, catastrophic caps, and co-payments for beneficiaries in the retired category who join the military on or after January 1, 2018, and to establish a calendar year enrollment period for those fees; 3) require the Secretary to establish an open enrollment period, with a grace period during the first year of open enrollment, and to allow enrollment for qualifying events for annual participation in either TRICARE Prime or TRICARE Select; 4) prescribe certain requirements for pre-authorization for referrals under TRICARE Prime; and 5) require a pilot program on incorporation of value-based health care methodology in the purchased care component of the TRICARE program.

Reform of administration of the Defense Health Agency and military medical treatment facilities (sec. 702)

The Senate bill contained a provision (sec. 721) that would require the Secretary of Defense to disestablish the medical departments of the Armed Forces and consolidate all activities of those departments into the Defense Health Agency. The Secretary could not undertake this action until 60 days after submission of the Department's consolidation plan to the Committees on Armed Services of the Senate and the House of Representatives. The provision would also require the Comptroller General of the United States to review the consolidation plan and submit that review to the Committees on Armed Services of the Senate and the House of Representatives within 180 days after the Secretary submits the plan to the committees. Under this provision, the Defense Health Agency would be led by an officer of the Armed Forces holding the grade of lieutenant general or vice admiral and be responsible for the medical operations of the Department of Defense. The resultant

Defense Health Agency would consist of four subordinate organizations: 1) an organization responsible for all military medical treatment facilities (MTFs); 2) an organization responsible for medical professional recruitment and retention activities, medical education and training, research and development activities, and executive agencies for medical operations or activities; 3) an organization responsible for activities and duties of the current Defense Health Agency; and 4) an organization responsible for activities and duties to improve and maintain operational medical force readiness capabilities and to ensure sustainment of combat casualty care and trauma readiness of military health care providers. A major general or rear admiral upper half would serve as head of each subordinate organization. The provision would give broad authorities to the Director of the Defense Health Agency, under the supervision and control of the Assistant Secretary of Defense for Health Affairs, to conduct the medical operations functions of the Department. In addition, the provision would amend sections 3036, 5137, and 8036 of title 10, United States Code, to establish the duties and responsibilities of the Surgeons General of the Services as principal adviser to the service secretary and service chief as well as chief medical adviser of that service to the Defense Health Agency. Finally, the provision would require the Secretary of Defense to submit a report on consolidation, by January 1, 2017, to the Committees on Armed Services of the Senate and the House of Representatives.

The House amendment contained a provision (sec. 702) that would amend chapter 55 of title 10, United States Code, to require the Defense Health Agency to become responsible for management of MTFs throughout the Department of Defense, while preserving the responsibility of MTF commanders for ensuring the readiness of members of the Armed Forces and civilian employees at MTFs and for providing health care services at MTFs. In carrying out this provision, the Defense Health Agency would establish an executive-level management office consisting of professional health care administrators to manage health care operations, finance and budget, information technology, and medical affairs across all MTFs. This provision would direct the Secretary of Defense to submit an interim report to the congressional defense committees by March 1, 2017, on the preliminary plan to implement these changes, and a final report by March 1, 2018. Finally, this provision would require the Comptroller General of the United States to review each of the Department's plans and to submit an assessment of those plans to the congressional defense committees by September 1, 2017, and September 1, 2018, respectively.

The Senate recedes with an amendment that would require the Director of the Defense Health Agency, beginning October 1, 2018, to take responsibility for the administration of each MTF, including all matters with respect to: 1) budget; 2) information technology; 3) health care administration and management; 4) administrative policy and procedure; 5) military medical construction and 6) any other matters the Secretary determines appropriate. The amendment would require the establishment of a professional staff within the Defense Health Agency to provide policy, oversight, and direction of all matters related to the administration of MTFs. In addition, the amendment would codify the roles and responsibilities of the Services' Surgeons General. The amendment would require the Secretary to develop an implementation plan and to submit: 1) an interim report providing a preliminary draft of the plan to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2017; and 2) a final report to the committees by March 1, 2018, containing a final version of the plan. Finally, the amendment would require the Comptroller General of the United States to submit to the committees a review of the Department's preliminary draft of the plan by September 1, 2017, and a review of the final version of the plan by September 1, 2018.

After careful study and deliberation, the conferees conclude that a single agency responsible for the administration of all MTFs would best improve and sustain operational medical force readiness and the medical readiness of the Armed Forces, improve beneficiaries' access to care and the experience of care, improve health outcomes, and lower the total management cost of the military health system. The conferees believe that the current organizational structure of the military health system - essentially three separate health systems each managed by one of the three Services - paralyzes rapid decision-making and stifles innovation in producing a modern health care delivery system that would better serve all beneficiaries. A streamlined military health system management structure would eliminate redundancy and generate greater efficiency, yielding monetary savings to the Department while leading to true reform of the military health system and improving the experience of care for beneficiaries.

Military medical treatment facilities (sec. 703)

The Senate bill contained a provision (sec. 725) that would authorize the secretary of a military department to realign the infrastructure of or modify the health care services provided by a military treatment facility (MTF) if a realignment or modification would better: 1) ensure the delivery of safe,

high quality health care services; 2) adapt the delivery of health care in a facility to rapid changes in private sector health care delivery models; or 3) maintain the medical force readiness skills and core competencies of health care providers in a facility. Before taking any action under this provision, the Secretary of Defense would be required to submit a report to the Committees on Armed Services of the Senate and the House of Representatives on proposed realignments of infrastructure or modifications of health care services at MTFs. Within 60 days after the Secretary submits a report under this provision, the Comptroller General of the United States would submit a review of such report to the Committees on Armed Services of the Senate and the House of Representatives.

The Senate bill also contained a provision (sec. 729) that would require the Secretary of Defense to establish regional centers of excellence for the provision of specialty care to covered beneficiaries at major medical centers of the Department of Defense. The provision would authorize the Secretary to establish satellite centers, when and where appropriate, particularly to provide specialty care for post-traumatic stress and traumatic brain injury. Furthermore, the provision would specify the types of centers of excellence that the Secretary could establish while allowing for the establishment of additional centers when appropriate. The centers of excellence established under this provision would serve as the primary sources for specialty care within the direct care health system, and health care providers throughout the system would refer beneficiaries to those facilities. The provision would require the Secretary to submit a report to the Committees on Armed Services of the Senate and the House of Representatives, within 180 days of the date of enactment of this Act, which provides a plan to establish specialty care centers of excellence in the military health system.

The House amendment contained a provision (sec. 703) that would amend chapter 55 of title 10, United States Code, to establish the requirements for the types of MTFs needed to support the medical readiness of the Armed Forces and the readiness of medical personnel. The provision would require the Secretary of Defense, in collaboration with the secretaries of the military departments, to submit an updated Military Health System Modernization Study report to the congressional defense committees within 270 days after the date of enactment of this Act. In addition, the provision would require the Secretary to submit, within 2 years after the date of enactment of this Act, an implementation plan to restructure or realign the MTFs in accordance with section 1079d of title 10, United States Code.

The Senate recedes with an amendment that would combine these provisions.

Access to urgent and primary care under TRICARE program (sec. 704)

The House amendment contained a provision (sec. 704) that would amend chapter 55 of title 10, United States Code, to require the Secretary of Defense, within 1 year of the date of enactment of this Act, to improve access to urgent care services in both military medical treatment facilities (MTFs) and the private sector. The provision would ensure that covered beneficiaries have access to urgent care services through the health care provider network under the TRICARE program, without the need for preauthorization, in areas where no MTFs exist for those services. Finally, this provision would require the Secretary of Defense to ensure that the nurse advice line of the Department directs covered beneficiaries seeking access to health care services to the most appropriate level of care required to treat medical conditions of beneficiaries, including urgent care services.

The House amendment also contained a provision (sec. 705) that would amend section 1077a of title 10, United States Code, to require the Secretary of Defense, within 180 days of the date of enactment of this Act, to ensure the availability of primary care services for members of the Armed Forces and covered beneficiaries during expanded business hours on weekdays and weekends, based on the needs of the MTF to meet access standards under the TRICARE Prime program and the primary care utilization patterns at the MTF.

The Senate bill contained no similar provisions.

The Senate recedes with an amendment that would combine these provisions.

Value-based purchasing and acquisition of managed care support contracts for TRICARE program (sec. 705)

The Senate bill contained a provision (sec. 726) that would require the Secretary of Defense to conduct a new competition of all medical support contracts, except the overseas medical support contract, with private sector entities under the TRICARE program by January 1, 2018, upon expiration of each such contract. New contracts would be competitively procured and automatically renewable for a period of not more than 10 years unless notice for termination is provided by either party not later than 180 days before contract termination. The Department would award contracts with a

combination of local, regional and national private sector entities to develop individual and institutional networks of high-performing health care providers. The Secretary could not exercise an option to extend an existing medical support contract with a private sector entity that would delay the award of a new contract. Within 1 year of the award of new medical support contracts, the Secretary would be required to issue an open broad agency announcement to allow potential contractors to propose innovative ideas and solutions to meet the medical support contract needs of the Department. A medical support contract awarded through the open broad agency announcement would be deemed to meet the requirements under section 2304 of title 10, United States Code, relating to use of competitive procedures to procure services. For new medical support contracts, the Department would be required to include, to the extent practicable: 1) maximum flexibility in network design and development; 2) integrated medical management between military medical treatment facilities and network providers; 3) maximum use of the full range of telehealth services; 4) use of value-based reimbursement methods that transfer financial risk to health care providers and medical support contractors; 5) use of prevention and wellness incentives to encourage beneficiaries to seek health care services from high-value providers; 6) a streamlined enrollment process and timely assignment of primary care managers; 7) elimination of the requirement to seek authorization of referrals for specialty care services; 8) the use of incentives to encourage certain beneficiaries to engage in medical and lifestyle intervention programs; and 9) the use of financial incentives for contractors and health care providers to receive an equitable share in cost savings resulting from improvement in health outcomes and the experience of care for beneficiaries. In establishing new medical support contracts, the provision would require the Secretary to: 1) assess the unique characteristics of providing health care services in rural, remote, or isolated locations, such as Alaska, Hawaii, and locations in the contiguous 48 states; 2) consider the various challenges inherent in developing robust provider networks in those locations; and 3) develop a provider reimbursement rate structure in those locations that ensures timely access to care, high quality primary and specialty care, and improvement in health outcomes. Additionally, the Secretary could not modify existing medical support contracts or enter into new contracts in rural, remote, or isolated locations until the Secretary certifies to the Committees on Armed Services of the Senate and the House of Representatives that those contracts would ensure timely access to care, high quality care, better health outcomes, and a better experience of care. The provision

would also require the Comptroller General of the United States to submit a report, by January 1, 2019, that assesses the compliance of the Secretary with the requirements of this section.

The Senate bill contained another provision (sec. 727) that would authorize the Secretary of Defense to enter into contracts to provide health care, including behavioral health care, to covered beneficiaries under the TRICARE program with any of the following: 1) the Department of Veterans Affairs; 2) an Indian tribe or tribal organization that is party to the Alaska Native Health Compact with the Indian Health Service; and 3) an Indian tribe or tribal organization that has entered into a contract with the Indian Health Service to provide health care in rural Alaska or other locations in the United States.

The House amendment contained a provision (sec. 706) that would authorize the Secretary of Defense to develop and implement value-based incentive programs as part of TRICARE contracts to encourage health care providers under the TRICARE program to improve the quality of care and the experience of care for covered beneficiaries. The provision would require the Secretary to brief the Committees on Armed Services of the Senate and the House of Representatives on the implementation plan not later than 60 days before the Secretary modifies a TRICARE contract to implement a value-based incentive program. Furthermore, the provision would require the Secretary to brief the committees, and any other appropriate congressional committees, within 1 year after implementation and annually through 2022, on the quality performance metrics and expenditures related to the incentive program.

The House recedes with an amendment that would require the Secretary of Defense to develop and implement value-based incentive programs as part of any contract awarded under chapter 55 of title 10, United States Code, for the provision of health care services to covered beneficiaries. The amendment would transfer contracting responsibility for the acquisition of managed care support contracts under the TRICARE program, initiated after the date of enactment of this Act, from the Defense Health Agency to the Under Secretary of Defense for Acquisition, Technology, and Logistics. The amendment would require the Secretary to develop and implement, by January 1, 2018, a new acquisition strategy for managed care support contracts under the TRICARE program and to modify contracts existing prior to implementation of this strategy to ensure consistency with the strategy.

The conferees remain concerned about the current acquisition strategy for managed care support contracts under the TRICARE program. The Department's current contract strategy

results in routine bid protests, implementation delays, high management costs, and costly contract extensions. Under those contracts, the Department remains solely at risk for the cost of all healthcare services provided, and the adherence to fee-for-service provider reimbursement fails to encourage individual and institutional network providers to provide higher quality care, better access to care, and higher patient satisfaction at lower costs to the Department. As a result, the conferees believe it is necessary to transfer contracting responsibility for the acquisition of managed care support contracts under the TRICARE program to the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Establishment of high performance military-civilian integrated health delivery systems (sec. 706)

The Senate bill contained a provision (sec. 736) that would require the Secretary of Defense, by January 1, 2018, to establish high performance military-civilian integrated health delivery systems through partnerships with other health systems, including local or regional health systems in the private sector, and the Veterans Health Administration. The Department of Defense would accomplish these partnerships either through memoranda of understanding or contracts between military treatment facilities and private sector health systems, such as health maintenance organizations, regional health organizations, integrated health systems, and health care centers of excellence, or the Veterans Health Administration. Under this provision, covered beneficiaries would be eligible to enroll in and receive medical services in the private sector component of established military-civilian integrated health networks. The Secretary of Defense would be required to incorporate value-based reimbursement methodologies into any memoranda of understanding or contracts to reimburse private sector entities for medical services provided to covered beneficiaries.

The House amendment contained a provision (sec. 707) that would amend section 1096 of title 10, United States Code, to authorize the Secretary of Defense to enter into partnership agreements between military treatment facilities and local or regional health care systems to deliver health care to beneficiaries in a more effective, efficient, or economical manner and provide members of the Armed Forces with additional training opportunities to maintain operational medical force readiness.

The House recedes with a clarifying amendment.

Joint Trauma System (sec. 707)

The House amendment contained a provision (sec. 708) that would require the Secretary of Defense to submit an implementation plan, within 180 days of enactment of this Act, to the Committees on Armed Services of the Senate and the House of Representatives to establish a Joint Trauma System within the Defense Health Agency that promotes improved trauma care to members of the Armed Forces and other individuals eligible for trauma care at a military medical treatment facility (MTF). The Secretary would not implement this plan until a 90-day period has elapsed following the date that the Comptroller General of the United States provides a review of the plan to the committees. The Comptroller General would have 120 days to review the plan. Under this provision, the Joint Trauma System would: 1) serve as the reference body for all trauma care provided across the military health system; 2) establish standards of care for trauma services provided at MTFs; 3) coordinate the translation of research from centers of excellence of the Department into clinical trauma care standards; and 4) coordinate the incorporation of lessons learned from military-civilian trauma education and training partnerships into clinical practice. The provision would also authorize the Secretary to seek to enter into an agreement with a nongovernmental entity to conduct a system-wide review of the military trauma system.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

Joint Trauma Education and Training Directorate (sec. 708)

The Senate bill contained a provision (sec. 734) that would require the Secretary of Defense to implement measures to improve and maintain the combat casualty care and trauma care skills for health care providers of the Department of Defense by January 1, 2018. The provision would require the Secretary to: 1) conduct a comprehensive review of combat casualty care and wartime trauma systems from January 1, 2001, to the present time; 2) expand military-civilian trauma training sites to provide enhanced training for integrated combat trauma teams; 3) establish a personnel management plan for important wartime medical specialties; 4) develop standardized tactical combat casualty care instructions and training for all servicemembers; 5) develop a comprehensive trauma care registry; 6) develop quality of care outcome measures for combat casualty care; and 7) conduct research to understand better the causes of morbidity and mortality of servicemembers in combat.

The House amendment contained a provision (Sec. 709) that would require the Secretary of Defense to establish a Joint

Trauma Education and Training Directorate to ensure military traumatologists maintain readiness skills and can be rapidly deployed in future armed conflicts. Under this provision, the Secretary would establish enduring partnerships with civilian academic medical centers and large metropolitan teaching hospitals with level one trauma centers to embed combat casualty care teams, led by military traumatologists, within trauma centers of medical centers and hospitals. The provision would require the Secretary to conduct an analysis to determine the number of military traumatologists, by specialty, that the Department of Defense needs to meet combatant commander requirements. Finally, this provision would require the Secretary to submit an implementation plan to the Committees on Armed Services of the Senate and the House of Representatives by July 1, 2017.

The Senate recedes with an amendment that would combine these two provisions.

Standardized system for scheduling medical appointments at military treatment facilities (sec. 709)

The Senate bill contained a provision (sec. 732) that would require the Secretary of Defense to implement, by January 1, 2018, a standardized medical appointment scheduling system at military treatment facilities (MTFs) throughout the military health system. Under this provision, no MTF would have the authority to use an appointment scheduling system other than the standardized system. Each MTF would make available a centralized appointment system that allows beneficiaries to make appointments, either by telephone or by an internet-connected device, including by smartphone application, through an online scheduling system available 24 hours per day, 7 days per week. The online appointment system would be able to send automated email and text message reminders to patients.

The House amendment contained a provision (sec. 710) that would require the Secretary of Defense to ensure that military treatment facilities implement: 1) first call resolution for beneficiaries contacting the facility by telephone; 2) standardized appointment scheduling that includes capabilities to schedule follow-up appointments within a 6-month period or longer from the date of the appointment request and to remind beneficiaries of future appointments; 3) increased provider productivity standards to improve access to care and medical readiness requirements; and 4) maximum use of telehealth and secure messaging between beneficiaries and health care providers. This provision would require the Secretary to implement the requirements by February 1, 2017, and provide a

briefing on implementation to the Committees on Armed Services of the Senate and the House of Representatives by March 1, 2017.

The House recedes with an amendment that would require the Secretary of Defense to: 1) implement a standardized appointment system in the military health system by January 1, 2018, and provide to the Committees on Armed Services of the Senate and the House of Representatives, by January 1, 2017, a comprehensive plan to implement the system; 2) implement standards for productivity of health care providers at MTFs; and 3) submit a report to the committees, by March 1 of each year, on the total number of missed appointments at MTFs for which a covered beneficiary failed to appear without prior notification during the 1-year period preceding the submission of the report. Additionally, the provision would require the Secretary to brief the committees on implementation of the standardized appointment system and health care provider productivity standards by February 1, 2018.

SUBTITLE B—OTHER HEALTH CARE BENEFITS

Extended TRICARE program coverage for certain members of the National Guard and dependents during certain disaster response duty (sec. 711)

The House amendment contained a provision (sec. 722) that would amend chapter 55 of title 10, United States Code, to extend TRICARE program coverage for certain members of the National Guard and dependents performing certain disaster response duty if the period immediately follows a period of full-time National Guard duty. Under this provision, a member would not receive extended TRICARE program coverage if a governor of a state or the mayor of the District of Columbia (DC) determines that such coverage is not in the best interest of the member, state, or DC. This provision would authorize the Secretary of Defense to charge a state or DC for the costs of providing extended TRICARE program coverage to members of the National Guard and their dependents.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that provides discretionary authority to extend TRICARE program coverage for certain members of the National Guard and dependents performing certain disaster response duty if the period immediately follows a period of full-time National Guard duty. Additionally, the amendment would require the Secretary of Defense to charge a state or DC for the costs of providing extended TRICARE program coverage to members of the National Guard and their dependents if such coverage is extended.

Continuity of health care coverage for reserve components (sec. 712)

The Senate bill contained a provision (sec. 707) that would authorize the Secretary of Defense to carry out a pilot program jointly with the Director of the Office of Personnel Management (Director), of at least 5 years duration, to provide commercial health insurance coverage to eligible reserve component members who enroll for either individual, self plus one, or self and family coverage. If the Secretary and the Director determine that a pilot program is feasible, the Director would contract with qualified health insurance carriers to provide eligible beneficiaries with a variety of high quality health benefits plans, which could vary by plan design, covered benefits, geography, and price. Reserve component members and their family members would not be eligible to enroll in a health plan in the pilot program if they are eligible to enroll in a health benefits plan under the Federal Employees Health Benefits Program.

Under the pilot program, the Secretary could contract with qualified health insurance carriers to provide coverage for health care services provided at military treatment facilities to pilot program participants, and the Department would receive payment from those carriers for any services provided at those facilities. Family members of an eligible reserve component member could remain covered under the pilot program even when the reserve component member became ineligible for coverage while serving on Active Duty for a period greater than 30 days.

In addition, an eligible reserve component member would be responsible for payment of all cost sharing amounts applicable to the health benefits plan plus an annual premium amount equal to 28 percent of the total annual amount of the premium under the plan. During a period in which a reserve component member served on Active Duty for more than 30 days, the premium amount and cost shares would be zero for eligible family members.

In consultation with the Secretary of Homeland Security, the Secretary would provide recommendations and data to the Director on matters regarding military treatment facilities, matters unique to eligible reserve component members and their families, and any other guidance necessary to administer the pilot program. The Secretary and the Director would jointly establish a funding mechanism for the pilot program, and the Secretary would make funds available to the Director, without fiscal year limitation, for payment of health plan costs and administrative expenses.

The House amendment contained a provision (sec. 712) that would require the Secretary of Defense to study options for

providing health care coverage to certain current and former members of the Selected Reserve and to submit a report of the findings and recommendations to the congressional defense committees within 180 days of the date of enactment of this Act.

The Senate recedes with an amendment that would combine these provisions. The resultant provision would require the Director to submit to the Secretary of Defense, on an annual basis during each year the pilot program may be conducted, information on the use of health care benefits under the pilot program. The provision would also require the Secretary to submit an initial and a final report on the pilot program to the Committees on Armed Services of the Senate and the House of Representatives. Finally, the provision would clarify the elements required in the study of options for providing health care coverage that improves the continuity of health care provided to certain current and former members of the Selected Reserve.

The Senate bill contained a provision (sec. 706) that would authorize a veteran or civilian to be evaluated and treated at a military treatment facility (MTF) if the Secretary of Defense determines that: 1) the evaluation and treatment of the individual is necessary to maintain the medical readiness skills and competencies of health care providers at the facility; 2) health care providers at the facility have the competencies, skills, and abilities to treat the individual; and 3) the facility has available space, equipment, and materials. The provision would authorize an MTF to bill and accept

reimbursement for services provided to a civilian patient. Under this provision, the Secretary of Defense would be required to enter into a memorandum of understanding with the Secretary of Veterans Affairs whereby the Secretary of Veterans Affairs would reimburse an MTF for the costs of any health care services provided to individuals eligible for health care services from the Department of Veterans Affairs (VA).

The House amendment contained no similar provision.

The House recedes with an amendment that would: 1) prioritize the evaluation and treatment of covered beneficiaries in MTFs ahead of the evaluation and treatment of veterans and civilians in those facilities; 2) require an MTF to bill and to accept reimbursement from a civilian or a third-party payer on behalf of the individual for the costs of health care services provided to the individual; and 3) require the Secretary of Defense to enter into a memorandum of agreement with the Secretary of Veterans Affairs under which the Secretary of Veterans Affairs would reimburse an MTF, using a prospective payment methodology, for the costs of any health care services provided to an individual eligible for health care services from the VA.

The provision would also require the Secretary to reduce or eliminate co-payments or cost-shares for covered beneficiaries for receipt of telehealth services.

The provision would require the Secretary to submit an initial report, within 180 days of the date of enactment of this Act, to the Committees on Armed Services of the Senate and the House of Representatives, describing the full range of telehealth services to be available in the direct and purchased care components of the military health system. Within 3 years after the date of incorporation of telehealth services throughout the military health system, the Secretary would be required to submit a final report to the committees describing the impact made by use of telehealth services in the direct and purchased care components of the military health system.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment that would require the implementation of the use of telehealth services throughout the direct and purchased care components of the military health system not later than 18 months after the date of enactment of this Act and would delete the requirement that the location of the provider be considered to be the location of care.

Authorization of reimbursement by Department of Defense to entities carrying out state vaccination programs for costs of vaccines provided to covered beneficiaries (sec. 719)

Authority to convert military medical and dental positions to civilian medical and dental positions (sec. 721)

The Senate bill contained a provision (sec. 724) that would amend chapter 49 of title 10, United States Code, to authorize the Department of Defense to convert military medical and dental positions to civilian positions if: 1) conversion

would not result in a loss of a military-essential position; 2) conversion would not result in degradation of medical care or the medical readiness of the Armed Forces; and 3) conversion to a civilian position would be more cost effective.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, in collaboration with the service secretaries, to establish a process to define military medical and dental personnel requirements necessary to meet operational medical force readiness requirements. The amendment would authorize conversion of a military medical or dental position to a civilian medical or dental position if the Secretary determines that the position is unnecessary to meet operational medical force readiness requirements. Additionally, the amendment would require the Secretary to convert an applicable military position to a civilian position with a level of compensation commensurate with the skills and experience necessary to conduct the duties of the civilian position. The Secretary would not be authorized to place any limitation on the grade or level to which the military position would be converted. Finally, the amendment would require the Secretary to submit a report, within 90 days of enactment of this Act, to the Committees on Armed Services of the Senate and the House of Representatives that: 1) describes the process established to define military medical and dental personnel requirements necessary to meet operational medical force readiness requirements; and 2) provides a complete list, by position, of the military medical and dental requirements necessary to meet operational medical force readiness requirements. The House recesses.

Adjustment of medical services, personnel authorized strengths, and infrastructure in military health system to maintain readiness and core competencies of health care providers (sec. 725)

The Senate bill contained a provision (sec. 735) that would require the Secretary of Defense to implement measures, within 180 days of the date of enactment of this Act, to maintain the critical wartime medical readiness skills and core competencies of health care providers within the Armed Forces. The provision would require the Secretary to implement a measure to ensure the Services do not substitute a medical specialty required for medical force readiness with another medical specialty. Additionally, the provision would require the Secretary to: 1) modify medical services; 2) reduce authorized strengths of military and civilian personnel; and 3) reduce or eliminate unnecessary infrastructure in the military health system such that military treatment facilities would provide only those services required to maintain the critical wartime medical skills and core competencies of health care providers

and to ensure the medical readiness of the Armed Forces. Moreover, this provision would require the Comptroller General of the United States to provide a report, within 18 months of the date of enactment of this Act, which assesses the Department's implementation of this provision, to the Committees on Armed Services of the Senate and the House of Representatives.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary to implement measures, within 1 year of the date of enactment of this Act, to maintain the critical wartime medical readiness skills and core competencies of health care providers within the Armed Forces. In implementing those measures, the Secretary must ensure that the medical services provided in military medical treatment facilities (MTFs), the authorized strengths of military and civilian personnel working in MTFs, and the infrastructure of MTFs maintain the critical wartime medical readiness skills and core competencies of health care providers within the Armed Forces. The amendment would not require the Secretary to implement any of these measures at MTFs located in a foreign country if the Secretary determines that beneficiaries in that country would not have access to medical services in that country similar to access to medical services for covered beneficiaries in the United States.

Program to eliminate variability in health outcomes and improve quality of health care services delivered in military medical treatment facilities (sec. 726)

The Senate bill contained a provision (sec. 730) that would require the Secretary of Defense to conduct a program, beginning not later than January 1, 2018, to: 1) establish best practices for the delivery of health care services for certain diseases or conditions at military treatment facilities (MTFs); 2) incorporate those best practices into the daily operations of MTFs participating in the program; and 3) eliminate variability in health outcomes and improve the quality of health care services delivered at MTFs. Under this provision, the Secretary would conduct the program in three phases and be required to complete each phase within 180 days following initiation of that phase. The initiation of phases two and three would immediately follow completion of the previous phase. The provision would require the Secretary, during the conduct of the program, to continuously monitor and adjust the health care services delivered at MTFs and the number of patients enrolled at those facilities to ensure: 1) a high degree of safety and quality in the delivery of health care at those facilities; and 2) the

delivery of only those health care services critical for maintaining operational medical force readiness and the medical readiness of the Armed Forces.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary, by January 1, 2018, to implement a program to establish best practices for the delivery of health care services for certain diseases or conditions at MTFs, as selected by the Secretary, and to incorporate those best practices into the daily operations of MTFs to eliminate variability in health outcomes and to improve the quality of care at MTFs. In conducting this program, the Secretary shall develop, implement, monitor, and update clinical practice guidelines reflecting best practices for the delivery of health care services. The amendment would require the Secretary to monitor the implementation of the clinical practice guidelines and to update those guidelines periodically through a process of continual assessment of evidence-based best practices within the direct care component of the military health system and the private sector.

Acquisition strategy for health care professional staffing services (sec. 727)

The Senate bill contained a provision (sec. 738) that would amend section 725(a) of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291), to require the Department of Defense to implement a performance-based, strategic sourcing contract for acquiring health care professional staffing services for the military health system. The provision would require all components of the military health system to use the contract, and the Department would be required to develop a process for obtaining a waiver, based on documented rationale, to use another contract or acquisition approach.

The Senate bill also contained a provision (sec. 737) that would require the Secretary of Defense to enter into centrally-managed, performance-based contracts with private sector entities to augment the delivery of health care services at military treatment facilities (MTFs) with limited or restricted ability to provide services such as primary care or expanded-hours urgent care. Under this provision, contracts would be designed to purchase improvement in health outcomes for covered beneficiaries seeking health care services in MTFs. This provision would require the Secretary to submit a plan to the Committees on Armed Services of the Senate and the House of Representatives, within 180 days of enactment of this Act, that

includes: 1) a description of the number and types of contracts the Secretary intends to procure; and 2) a description of the performance measures used in procuring performance-based contracts.

The House amendment contained no similar provisions.

The House recedes with an amendment that would combine these provisions. The amendment would require the Secretary of Defense to develop and carry out a performance-based, strategic sourcing acquisition strategy for health care professional services at MTFs located in a state. The new acquisition strategy, as developed by the Secretary, would require all MTFs to use the contracts awarded under the strategy, but it would provide a process for an MTF to obtain a waiver of this requirement to use another acquisition strategy. The amendment would require the Secretary to submit a report to the Committees on Armed Services of the Senate and the House of Representatives, by July 1, 2017, on the status of implementing the new acquisition strategy. Finally, the amendment would repeal section 725 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291; 10 U.S.C. 1091 note).

Adoption of core quality performance metrics (sec. 728)

The House amendment contained a provision (sec. 711) that would require the Secretary of Defense to adopt the core quality performance measures agreed upon by a collaborative group of federal agencies, private sector health insurance plans, national physician organizations, employers, and health care consumers. These core quality performance measures would be used to evaluate the performance of the direct care and purchased care components of the military health system.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would include in the core quality metrics such other sets of core quality performance metrics released by the Core Quality Measures Collaborative as the Secretary considers appropriate. The amendment would amend section 1073b of title 10, United States Code, to require the Secretary to include the core quality performance metrics mandated under this section in those metrics publicly available on an Internet website of the Department of Defense.

Improvement of health outcomes and control of costs of health care under TRICARE program through programs to involve covered beneficiaries (sec. 729)

The Senate bill contained a provision (sec. 728) that would require the Secretary of Defense, by January 1, 2018, to implement programs to increase involvement of covered beneficiaries in making health care decisions and to encourage beneficiaries to share more responsibility for the improvement in their health outcomes through participation in medical and lifestyle intervention programs. This provision would incentivize those beneficiaries with chronic diseases or conditions, such as diabetes, asthma, or depression, or those exhibiting unhealthy behaviors, such as tobacco use or obesity, to participate in comprehensive medical or lifestyle intervention programs designed to improve beneficiaries' health outcomes and functional status while controlling health care costs for those beneficiaries and the Department. This provision would also authorize the Secretary to charge and collect a fee from a covered beneficiary, other than an Active-Duty servicemember, for failure to notify a military treatment facility, within 24 hours of a scheduled appointment with a health care provider, that the beneficiary will be unable to attend the appointment. The Secretary of Defense would be required to submit a report to the Committees on Armed Services of the Senate and the House of Representatives, by January 1, 2020, that describes implementation of the programs mandated under this provision.

The House amendment contained no similar provision.

The House recedes with an amendment that would also require the Secretary to establish a program to incentivize the maintenance of a healthy lifestyle, such as exercise and weight management, among covered beneficiaries. The amendment would not authorize the Secretary to charge and collect a fee from a covered beneficiary, other than an Active-Duty servicemember, for failure to notify a military treatment facility, within 24 hours of a scheduled appointment with a health care provider, that the beneficiary will be unable to attend the appointment.

The conferees are concerned, however, about the high number of failed medical appointments in the military health system. From October 2014 through September 2015, there were over 1.6 million scheduled appointments missed by all categories of beneficiaries. The large number of failed appointments negatively affects access to care for all beneficiaries. The conferees strongly urge the Secretary to implement programs to minimize the number of failed appointments in military hospitals and clinics.

Accountability for the performance of the military health system of certain leaders within the system (sec. 730)

The Senate bill contained a provision (sec. 722) that would require the Secretary of Defense and the secretaries of the military departments, within 180 days of the date of enactment of this Act, to incorporate performance accountability measures into the annual performance reviews of certain leadership positions in the military health care system. The provision would prohibit payment of a performance bonus to a civilian employee of the Department of Defense occupying a position, specified in the provision, unless the operations of the military health care system met or exceeded performance measures during the period of the employee's annual performance review. The Secretary of Defense would submit a report to the Committees on Armed Services of the Senate and the House of Representatives, within 180 days of enactment of this Act, which describes the incorporation of performance accountability measures in the annual performance reviews of leadership positions in the military health care system.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to determine which military and civilian leaders in the military health system would be required to have measures of accountability incorporated into their performance reviews and would delete the prohibition on performance bonuses for civilian employees who do not meet or exceed performance measures.

Establishment of advisory committees for military treatment facilities (sec. 731)

The Senate bill contained a provision (sec. 731) that would require the Secretary of Defense to establish an advisory committee for each military medical treatment facility (MTF). Each advisory committee would include six beneficiaries eligible for health care services in the military health system: 1) two Active-Duty servicemembers; 2) two Active-Duty family members; and 3) two military retirees.

The House amendment contained no similar provision.

The House recedes with an amendment that would not prescribe the composition of members of an advisory committee established by the Secretary. The amendment would also clarify that each advisory committee shall provide advice to the commanding officer or director of a MTF on the administration and activities of the facility as it relates to the experience of care for beneficiaries.

Under this provision, the Secretary would select a least five individuals to participate in the pilot program for each round. Within 180 days after the date the Secretary completes the first round of the psychiatric fellowship pilot program, the Secretary would submit an initial report to the Committees on Armed Services of the Senate and the House of Representatives on the program. Subsequently, the Secretary would submit a final report that updates the initial report within 90 days after termination of the pilot program. The authority for the pilot program would terminate upon completion of the second round of the psychiatric fellowship program.

The provision would prescribe how the commander or director should determine the average wait times for beneficiaries at urgent care clinics, emergency departments, and pharmacies in military treatment facilities.

The House amendment contained a provision (sec. 744) that would require the Secretary of Defense to conduct a long-term study of helicopter and tiltrotor pilots to assess the acute and chronic medical conditions of those pilots. The provision would also require the Secretary to brief the Committees on Armed Services of the Senate and the House of Representatives on the results of the study.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to submit a report to the Committees on Armed

Services of the Senate and the House of Representatives not later than 30 days after completion of the study.

Comptroller General reports on health care delivery and waste in military health system (sec. 751)

The Senate bill contained a provision (sec. 763) that would require the Comptroller General of the United States, within 1 year after the date of enactment of this Act, and at least annually thereafter for 4 years, to submit to the Committees on Armed Services of the Senate and the House of Representatives, a report assessing and identifying potential waste and inefficiency relating to the delivery of health care within the military health system.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Modifications of cost-sharing requirements for the TRICARE pharmacy benefits program and treatment of certain pharmaceutical agents

The Senate bill contained a provision (sec. 702) that would modify cost-sharing amounts for the TRICARE pharmacy benefits program for years 2017 through 2025. After 2025, the Department could establish cost-sharing amounts equal to the cost-sharing amounts for the previous year adjusted by an amount, if any, to reflect increases in costs of pharmaceutical agents and pharmacy dispensing fees. With this provision, beneficiaries would continue to receive pharmaceuticals at no cost in military medical treatment facilities. Under this provision, there would be no changes to cost-sharing amounts for survivors of members who died on Active Duty or for disabled retirees and their family members. The provision would authorize the Secretary of Defense, upon recommendation from the Pharmacy and Therapeutics Committee and review by the Uniform Formulary Beneficiary Advisory Panel, to exclude from the pharmacy benefits program any pharmaceutical agent that the Secretary determines provides little or no value to covered beneficiaries and the Department. Additionally, the Secretary would give preferential status to any non-generic pharmaceutical agent on the uniform formulary by treating it, for the purposes of cost-sharing, as a generic product under the TRICARE retail pharmacy and mail order programs. Finally, the provision would authorize the Secretary to adopt special reimbursement methods, amounts, and procedures in medical contracts to encourage

physicians to use high-value pharmaceutical agents and to discourage use of low-value agents.

The House amendment contained no similar provision.

The Senate recedes.

Pilot program on treatment of members of the Armed Forces for post-traumatic stress disorder related to military sexual trauma

The Senate bill contained a provision (sec. 708) that would authorize the Secretary of Defense to conduct a pilot program, of not more than 3 years duration, to award competitive grants to community partners to provide intensive outpatient programs to treat members of the Armed Forces suffering from post-traumatic stress disorder resulting from military sexual trauma, including treatment for substance use disorder, depression, and other issues related to those conditions.

The House amendment contained no similar provision.

The Senate recedes.

Selection of commanders and directors of military treatment facilities and tours of duty of commanders of such facilities

The Senate bill contained a provision (sec. 723) that would require the Secretary of Defense to develop common qualifications and core competencies required for selection of commanders or directors of military medical treatment facilities. The provision would also establish a minimum length of 4 years for tours of duty, with limited exceptions, for those commanders or directors to ensure greater stability in health system executive management at each facility and throughout the military health system.

The House amendment contained no similar provision.

The Senate recedes.

Use of mefloquine for malaria

The House amendment contained a provision (sec. 733) that would: 1) limit the use of mefloquine for malaria prophylaxis to servicemembers with intolerance or contraindications to other chemoprophylaxis agents; 2) require licensed medical providers to prescribe mefloquine on an individual basis; and 3) require medical providers to counsel servicemembers on the potential side effects of the drug and to provide written patient information required by the Food and Drug Administration.

The Senate bill contained no similar provision.

The House recedes.

The conferees note that mefloquine is one of several drugs recommended by the Centers for Disease Control to prevent malaria and to treat certain forms of the disease. The conferees are concerned, however, that mefloquine may produce serious neuropsychiatric side effects such as depression, auditory and visual hallucinations, anxiety, and suicidal ideation. The conferees urge the Department of Defense to limit the prescription of mefloquine to those servicemembers who may be unable to take other first-line anti-malarial drugs. If medical providers must prescribe mefloquine to certain servicemembers, providers must ensure that those servicemembers understand the potential adverse effects of the drug.

Mental health resources for members of the military services at high risk of suicide

The House amendment contained a provision (sec. 741) that would require the Secretary of Defense to: 1) develop a methodology that identifies servicemembers and military units at high risk of suicide; and 2) provide additional preventative and mental health treatment resources for servicemembers.

The Senate bill contained no similar provision.

The House recedes.

Research of chronic traumatic encephalopathy

The House amendment contained a provision (sec. 742) that would provide that not more than \$25 million of the funds available for advanced development for research, development, test, and evaluation for the Defense Health Program for fiscal year 2017 may be used to award grants to medical researchers and universities to support research into early detection of chronic traumatic encephalopathy.

The Senate bill contained no similar provision.

The House recedes.

Active oscillating negative pressure treatment

The House amendment contained a provision (sec. 743) that would require the Secretary of Defense to consider using non-invasive technologies, such as active oscillating negative pressure, to treat servicemembers who have incurred injuries from blast-related events.

The Senate bill contained no similar provision.

The House recedes.

Report on feasibility of including acupuncture and chiropractic services for retirees under TRICARE program

The House amendment contained a provision (sec. 747) that would require the Secretary of Defense to submit a report to the congressional defense committees on the feasibility of providing acupuncture and chiropractic services under the TRICARE program to beneficiaries who are retired members of the uniformed Services.

The Senate bill contained no similar provision.

The House recedes.

Clarification of submission of reports on longitudinal study on traumatic brain injury

The House amendment contained a provision (sec. 748) that would clarify that section 1080 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92; 129 Stat. 1000; 10 U.S.C. 111 note) should not apply to reports submitted by the Secretary of Defense to Congress under section 721 of the John Warner National Defense Authorization Act for Fiscal Year 2007 (Public Law 109-364; 120 Stat. 2294).

The Senate bill contained no similar provision.

The House recedes.

Increased collaboration with NIH to combat triple negative breast cancer

The House amendment contained a provision (sec. 749) that would require the Department of Defense to: 1) collaborate with the National Institutes of Health to identify genetic and molecular targets and biomarkers for triple negative breast cancer; and 2) provide information in biomarker selection, drug discovery, and clinical trials design to enable early identification of this form of breast cancer and development of multiple targeted therapies for the disease.

The Senate bill contained no similar provision.

The House recedes.

Memoranda of agreement with institutions of higher education that offer degrees in allopathic or osteopathic medicine

The Senate bill contained a provision (sec. 754) that would require the Secretary of Defense to enter into memoranda of agreement with local or regional allopathic or osteopathic schools of medicine to establish military treatment facilities as affiliate teaching hospitals.

The House amendment contained no similar provision.
The Senate recedes.

The conferees note that the Department of Defense has existing authority to enter into agreements with medical schools to establish military treatment facilities as affiliate teaching hospitals, and the conferees strongly urge the Department to expand those affiliations. By sharing training facilities, staffing, and material resources, the conferees believe these new academic affiliations could help improve and sustain operational medical force readiness and serve as productive recruiting grounds for new military physicians.

Prohibition on conduct of certain medical research and development projects

The Senate bill contained a provision (sec. 756) that would prohibit the Secretary of Defense and each service secretary from funding or conducting a medical research and development project unless the secretary concerned determines that the project would protect, enhance, or restore the health and safety of members of the Armed Forces.

The House amendment contained no similar provision.
The Senate recedes.

The conferees express concern regarding the amount of congressional funding for medical research in the Department of Defense's (DOD) Congressionally Directed Medical Research Program. Since 1992, Congress has appropriated almost \$10 billion for medical research - most of it outside of DOD's core medical research mission and not requested in the Department's annual budget requests.

Report on plan to improve pediatric care and related services for children of members of the Armed Forces

The Senate bill contained a provision (sec. 762) that would require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report setting forth a plan of the Department to improve pediatric care and related services for children of members of the Armed Forces.

The House amendment contained no similar provision.

Treatment of certain provisions relating to limitations, transparency, and oversight regarding medical research conducted by the Department of Defense

The Senate bill contained a provision (sec. 764) that would require sections 756 and 898 of the Senate bill relating to limitations, transparency, and oversight regarding medical research conducted by the Department of Defense to have no force or effect.

The House amendment contained no similar provision.

The Senate recedes.

TITLE VIII—ACQUISITION POLICY, ACQUISITION MANAGEMENT, AND RELATED MATTERS

SUBTITLE A—ACQUISITION POLICY AND MANAGEMENT

Rapid acquisition authority amendments (sec. 801)

The Senate bill contained a provision (sec. 801) that would amend section 806 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107-314) to better integrate and conform the provision with the rapid acquisition authorities established in section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

The House amendment contained no similar provision.

The House recedes.

Authority for temporary service of Principal Military Deputies to the Assistant Secretaries of the military departments for acquisition as Acting Assistant Secretaries (sec. 802)

The Senate bill contained a provision (sec. 802) that would amend sections 3016(b)(5)(B), 5016(b)(4)(B), and 8016(b)(4)(B) of title 10, United States Code, to allow Principal Military Deputies to serve in an acting capacity if there is a vacancy in the position of the Service Acquisition Executive.

The House amendment contained no similar provision.

The House recedes.

Modernization of services acquisition (sec. 803)

The Senate bill contained a provision (sec. 804) that would require the Secretary of Defense to revise the Department of Defense Instruction 5000.74, dated January 6, 2016.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to review and, if necessary, revise Department of Defense Instruction 5000.74, dated January 5, 2016, and other guidance pertaining to the acquisition of services not later than 180 days after the date of the enactment of this Act. The amendment also would expand, from the acquisition workforce to all Department of Defense employees engaged in the procurement of services, the workforce to be developed and trained on the acquisition of services.

Defense Modernization Account amendments (sec. 804)

The Senate bill contained a provision (sec. 899B) that would amend section 2216 of title 10, United States Code, to clarify authorizations for the Defense Modernization Account.

The House amendment contained no similar provision.

The House recedes with an amendment that would exclude the transfer of funds that support installations and facilities to the Defense Modernization Account. The amendment would set a \$1.0 billion limit on the total balance of the account and require that an acquisition program milestone decision authority approve the use of funds in the account. The amendment would also require that subaccounts be established for each of the military departments and defense agencies that deposit and use funds in the account.

SUBTITLE B—DEPARTMENT OF DEFENSE ACQUISITION AGILITY

Modular open system approach in development of major weapon systems (sec. 805)

The House amendment contained a provision (sec. 1701) that would require all major defense acquisition programs (MDAPs) initiated after January 1, 2019, to be designed and developed with a modular open system approach (MOSA), to the maximum extent practicable.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would clarify when programs are required to start using MOSA. The amendment also would modify the definition of a major system interface to include characterization of the form, function, and content that flows across the interface. The amendment would require the acquisition strategy for a program that uses MOSA to also describe the approach to systems integration and configuration management.

Development, prototyping, and deployment of weapon system components or technology (sec. 806)

The House amendment contained a provision (sec. 1702) that would require a major defense acquisition program (MDAP) initiated after January 1, 2019, to include only technical development that the milestone decision authority determines, with a high degree of confidence, would not delay fielding target for the program. Concurrent technology maturation and system development would remain authorized, but only for technologies for which there is high confidence that concurrency would not postpone fielding. For higher risk technologies, the milestone decision authority would use the new authorities provided in this section, or other available authorities, to mature and demonstrate technologies prior to initiating or separate from a program of record. This section also would provide the military services with new funding and acquisition flexibility to experiment with, prototype, and rapidly deploy weapon system components and other technologies.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would expand the considerations for planning and conducting prototype projects to include existing commercial technologies and opportunities to reduce operation and support costs of major weapon systems. The amendment would clarify that the military services can use an existing oversight board, if one exists, to carry out the prototyping oversight requirements of this provision. The amendment would require prototyping projects to develop a plan for transition into a fielded system or operational use. The amendment also would reduce the duration of a project to 2 years and would clarify that the rapid prototyping process established by section 804 of the Fiscal Year 2016 National Defense Authorization Act (Public Law 114-92) should be pursued if projects exceed the duration and funding limits of this provision.

Cost, schedule, and performance of major defense acquisition programs (sec. 807)

The House amendment contained a provision (sec. 1703) that would require the Secretary of Defense, or his designee, to assign program cost and fielding targets when major defense acquisition programs (MDAPs) are initiated.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would clarify that cost and fielding targets should be established before funds are obligated for technology development, system

development, or production of a major defense acquisition program. The amendment would modify the definition of the cost target to include the program procurement unit cost and sustainment cost. The amendment would remove the list of elements that should be considered in establishing the program goals because such elements are generally known and are included in existing acquisition policy guidance. The amendment would modify the delegation of authority for establishing program targets only to the Deputy Secretary of Defense. The amendment also would clarify that the required independent technical risk assessments conducted prior to program milestone approvals should identify any manufacturing processes that need to be matured.

Transparency in major defense acquisition programs (sec. 808)

The House amendment contained a provision (sec. 1704) that would require the milestone decision authority for a major defense acquisition program to provide a new "acquisition scorecard" report to the congressional defense committees and, when appropriate, to congressional intelligence committees at each milestone decision point of each program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would modify the information required in the program summary reports, to include the major cost contributors identified at Milestone A that could affect the life-cycle costs of the program and any manufacturing risks identified at Milestone A or B that are associated with the program.

Amendments relating to technical data rights (sec. 809)

The House amendment contained a provision (sec. 1705) that would make several amendments to technical data rights conferred in section 2320 of title 10, United States Code. Among other things, the provision would delineate types of interfaces and specify the rights provided to the U.S. Government in such interfaces. It would require the U.S. Government and Department of Defense contractors to negotiate for data rights when items or processes are developed with a mix of Federal and private funds. The provision also would limit deferred ordering of technical data to 6 years after delivery of the last item on a contract and to technical data generated, not utilized, in the performance of the contract.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of Defense to negotiate for rights other than

government purpose rights for technical data relating to major system interfaces if it would be in the best interest of the United States. The amendment would require the Department of Defense to identify major system interfaces in contract solicitations and contracts. For major system interfaces developed exclusively at private expense, the amendment would clarify that the Secretary shall negotiate with the developer appropriate compensation for the technical data. The conferees understand that section 2320 sets forth various rights in technical data, and that the price for acquiring technical data to which the U.S. Government is entitled is determined through negotiations between the Department and contractors. The conferees believe that in the case of privately funded major system interfaces for which the Department asserts government purpose rights it is necessary to explicitly require negotiation for compensation. Notwithstanding this amendment, the conferees expect the standard practice of negotiating prices for technical data to continue for all other categories of rights and circumstances set forth in section 2320.

The amendment also would specify the U.S. Government's rights to technical data pertaining to privately funded general interfaces necessary for the segregation and reintegration of an item or process. Finally, the amendment would extend the duration of the government-industry advisory panel established in section 813 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) and require the advisory panel to consider the technical data rights necessary to support the modular open system approach (MOSA) required elsewhere in this Act. The conferees are aware that the advisory panel has not yet completed its review of sections 2320 and 2321 of title 10, United States Code. The conferees recognize there are many issues in technical data rights that this conference agreement does not address, and are encouraged that the panel's comprehensive and thoughtful analysis thus far will yield promising recommendations.

Additionally, the conferees understand that successful implementation of MOSA necessitates the allocation of technical data rights in major system interfaces, a new concept under MOSA. The use of MOSA relies upon the ability of major system components to be added, removed, or replaced as needed throughout the life cycle of the major weapon system due to evolving technology, threats, sustainment, and other factors. Therefore, major system interfaces that share a boundary between major system components and major system platforms are critical, and it is imperative that the government have appropriate access to the technical data of such interfaces. The conferees understand the importance of technical precision in establishing

clear delineation of major system platforms, major system interfaces, and major system components. As such, the conferees urge the Department to carefully consider and take input from the advisory panel and industry on the meanings and implications of these key terms. The conferees expect the Department to include this consideration in its review of the MOSA authorities and its briefing on the implementation of MOSA required in the House report accompanying H.R. 4909 (H. Rept. 114-537) of the National Defense Authorization Act for Fiscal Year 2017.

The conferees also note that the Department recently issued a proposed rule that would implement amendments to section 2320 of title 10, United States Code, enacted in section 815 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81). Various representatives of industry have expressed concern about the effects on defense acquisition of the amendments made in Public Law 112-81 and the Department's implementation of such amendments. Therefore, the conferees believe the amendments to technical data rights included in this conference agreement are necessary at this time.

SUBTITLE C—AMENDMENTS TO GENERAL CONTRACTING AUTHORITIES, PROCEDURES, AND LIMITATIONS

Modified restrictions on undefinitized contractual actions (sec. 811)

The Senate bill contained a provision (sec. 816) that would amend section 2326 of title 10, United States Code, to revise policies regarding undefinitized contractual actions (UCAs). Over the past decade the use of UCAs by the services and defense agencies has grown significantly while the speed at which these UCAs are definitized has lagged. To address this situation, the provision would: (1) require a written determination by senior officials to extend a UCA beyond 90 days; (2) require UCAs to be awarded on a fixed-price level-of-effort basis; and (3) extend the 180 day definitization requirement to contracts in support of Foreign Military Sales cases.

The House amendment contained a similar provision (sec. 802).

The House recedes with an amendment that would eliminate the requirement that undefinitized contractual actions be awarded on a fixed-price basis, ensure that allowable profit reflects the cost risk at the time that a contractor submits a qualifying proposal to definitize a contract, and specify that

such a proposal contain the information necessary to conduct a meaningful audit of the proposal.

Amendments relating to inventory and tracking of purchases of services (sec. 812)

The Senate bill contained a provision (sec. 820) that would amend section 2330a of title 10, United States Code, to clarify the applicability of the contractor inventory requirement to staff augmentation contracts and to reduce data collection and unnecessary reporting requirements.

The House amendment contained a provision (sec. 803) that would amend section 2330a of title 10, United States Code, to revise the current requirement related to how the Department of Defense accounts for and reports contracts for services.

The Senate recedes with an amendment that would set the inventory collection threshold at contracts for services in excess of \$3.0 million and would narrow the focus of the inventory collection requirement to staff augmentation contracts as informed by the specified Service Acquisition Portfolio Groups. Rather than providing the inventory itself to the Congress, the amendment would require the Secretary of Defense to provide to Congress an annual summary of the inventory activities performed during the past year pursuant to staff augmentation contracts as defined in the amendment. Additionally, the amendment removes the Department of Defense Office of the Inspector General reporting requirement and reduces the annual Comptroller General reporting requirement to a one-time review in 2018 that would cover the changes implemented by this Act.

In performing the review and planning requirements in (d), the conferees direct the Secretary of the military department or the head of the Defense Agency to focus on the 17 Product Service Codes identified by the Office of Federal Procurement Policy and the Government Accountability Office in report GAO-16-46 as high risk for including services that are closely associated with inherently governmental functions.

The conferees direct the Secretary of Defense to brief the Committees on Armed Services of the Senate and House of Representatives, no later than February 1, 2017, on the plan to implement the inventory and reporting changes required by this Act, particularly implementation of the inventory of Product Service Codes and staff augmentation contracts. The briefing shall include information on differences in the number and value of contracts captured before and after the changes made by this Act.

Use of lowest price technically acceptable source selection process (sec. 813)

The Senate bill contained a provision (sec. 825) that would require the Department of Defense to revise the Defense Federal Acquisition Regulation Supplement (DFARS) to limit the use of lowest price technically acceptable (LPTA) source selection criteria in circumstances that would potentially deny the Department the benefits of cost and technical tradeoffs in the source selection process. The Department would be required to only use LPTA criteria in specified circumstances and avoid them to the maximum extent practicable for the procurement of knowledge-based professional services such as information technology services.

The House amendment contained a similar provision (sec. 847).

The House recedes with an amendment that would require justification of LPTA evaluation methodologies in each contract file, require determination that lowest price reflects full life-cycle costs, and expand restrictions on the use of LPTA evaluation methodologies to include advanced electronic testing and knowledge-based, training, or logistics services in overseas contingency operations. The amendment would also limit LPTA reporting to only contracts that exceed \$10.0 million.

Procurement of personal protective equipment (sec. 814)

The Senate bill contained a provision (sec. 829D) that would prohibit the use of reverse auctions and lowest price technically acceptable (LPTA) contracting methods for the procurement of personal protective equipment where the level of quality needed or the failure of the item could result in combat casualties.

The House amendment contained a similar provision (sec. 804) that would amend section 884 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to clarify source selection criteria to be used in the procurement of personal protective equipment or critical safety items.

The House recedes.

The conferees understand that, in some cases, both LPTA and reverse auctions are appropriate contracting methods and price discovery methods. However, the conferees do not believe that such methods are appropriate for equipment that provides personal protection to members of the Armed Services.

Amendments related to detection and avoidance of counterfeit electronic parts (sec. 815)

The House amendment contained a provision (sec. 806) that would modify section 818 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) by replacing the term "trusted suppliers" with the term "suppliers that meet anticounterfeiting requirements", as well as related conforming amendments. This provision would clear up confusion about the term, which refers to the specific category of microelectronics supplies that have been accredited by the Defense Microelectronics Activity.

The Senate bill contained no similar provision.

The Senate recedes.

Amendments to special emergency procurement authority (sec. 816)

The House amendment contained a provision (sec. 807) that would amend section 1903 of title 41, United States Code, to expand the permissible uses of special emergency procurement authorities to include support of international disaster assistance and support of a national emergency or natural disaster relief efforts in the United States as defined by the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

The Senate recedes.

The conferees direct the Comptroller General, not later than 4 years after the date of enactment of this Act, to submit to the Committees on Armed Services of the Senate and House of Representatives a review of all procurement activities conducted under the authorities provided by this provision.

The conferees direct any agency making use of this expanded authority to closely consult with the Congress on its use, especially its use over extended periods of time; the establishment of mechanisms to ensure proper oversight over its use; and the monitoring of its impact on industry, especially small and disadvantaged businesses.

Compliance with domestic source requirements for footwear furnished to enlisted members of the Armed Forces upon their initial entry into the Armed Forces (sec. 817)

The Senate bill contained a provision (sec. 671) that would require the Secretary of Defense to furnish athletic footwear directly to members of the Army, Navy, Air Force, and Marine Corps instead of providing a cash allowance. Such footwear must comply with section 2533a of title 10, United States Code.

The House amendment contained a similar provision (sec. 808).

The House recedes with an amendment that would authorize the Department of Defense, for two years, to purchase additional footwear that is necessary to provide sufficient choices to minimize the incidence of athletic injuries in initial entry training. During those two years, the conferees expect the Secretary, to the maximum extent practicable, to furnish footwear from domestic sources while taking appropriate steps to minimize the incidence of athletic injuries. The conferees direct the Secretary of Defense to develop a plan and schedule to fully implement this provision, and brief that plan and schedule to the Committees on Armed Services of the Senate and the House of Representatives no later than six months following the date of enactment of this Act.

The conferees are aware that a number of scientific studies have been and are being conducted to evaluate variances in foot structures, related causes of athletic foot injuries, and appropriate footwear to reduce the incidence of such injuries. The conferees direct the Secretary of Defense to brief the results of those studies to the Committees on Armed Services of the Senate and the House of Representatives no later than 18 months following the date of enactment of this Act. The briefing shall include recommendations for reducing injuries in recruits, including modifying initial entry training methods, medically evaluating the foot types of members of the Armed Forces in initial entry training, furnishing appropriate footwear to such members in initial entry training, and domestic sourcing of such footwear.

Extension of authority for enhanced transfer of technology developed at Department of Defense laboratories (sec. 818)

The Senate bill contained a provision (sec. 899) that would extend until 2020 the authorization granted to the Secretary of Defense and military service secretaries to license Department of Defense-owned intellectual property.

The House amendment contained a similar provision (sec. 809B) to extend the authorization until 2021.

The Senate recedes.

Modified notification requirement for exercise of waiver authority to acquire vital national security capabilities (sec. 819)

The Senate bill contained a provision (sec. 805) that would amend subsection (d) of section 806 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to provide for a notification to Congress not later than ten

days after the use of the waiver authority to acquire vital national security capabilities outlined earlier in section 806.

The House amendment contained no similar provision.

The House recedes.

Defense cost accounting standards (sec. 820)

The Senate bill contained a provision (sec. 811) that would amend chapter 7 of title 10, United States Code, and establish an independent board chaired by the Chief Financial Officer of the Department of Defense to prescribe, amend, and rescind cost accounting standards as they affect operations at the Department of Defense. The provision also requires that cost accounting standards developed shall to the maximum extent practicable align with Generally Accepted Accounting Principles (GAAP), thereby minimizing the requirement for government-unique cost accounting systems. The provision would also ensure that managerial cost accounting and activity-based accounting structures derived from cost accounting standards are applied to the financial operations of the Department of Defense.

The House amendment contained no similar provision.

The House recedes with an amendment that would modify sections 1501 and 1502 of title 41, United States Code, to improve the government-wide Cost Accounting Standards Board (CASB) and require that Federal Cost Accounting Standards (CAS) be reconciled, to the extent possible, with U.S. Generally Accepted Accounting Principles. The amendment also would require the CASB to hire an executive director and meet at least quarterly to reduce inconsistencies between CAS and GAAP, as well as address problems identified by cases presented to the Armed Services Board of Contract Appeals and Civilian Board of Contract Appeals. Additionally, the amendment would allow the head of a Federal agency to waive the application of the CAS for contracts valued at less than \$100.0 million. The amendment also would retain the Senate proposal to create a Defense Cost Accounting Standards Board, but would authorize the new board to advise the CASB, oversee implementation of CAS within the Department of Defense, and ensure that managerial cost accounting is appropriately implemented for commercial functions performed by employees of the Department. The conferees also encourage the Director, Defense Contract Audit Agency (DCAA) to examine the potential for electronic quality management systems to improve the ability of DCAA to conduct thorough and timely audits.

Increased micro-purchase threshold applicable to Department of Defense procurements (sec. 821)

The Senate bill contained a provision (sec. 812) that would amend chapter 137 of title 10, United States Code, to establish the micro-purchase threshold for Department of Defense activities at \$5,000.

The House amendment contained no similar provision.

The House recedes.

Enhanced competition requirements (sec. 822)

The Senate bill contained a provision (sec. 813) that would amend section 2306a of title 10, United States Code, to clarify the definition of competition and the role of the prime contractor in determining whether a subcontract meets the competitive or commercial test under the section.

The House amendment contained no similar provision.

The House recedes.

The conferees recognize that the government retains the right to review determinations made by prime contractors.

Revision to effective date of senior executive benchmark compensation for allowable cost limitations (sec. 823)

The House amendment contained a provision (sec. 805) that would remove the retroactive application requirement of section 803 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), which implemented a cap on the allowable compensation of contractor employees. As a result of this revision, section 803 would apply to compensation costs incurred after January 1, 2012, under contracts entered into on or after December 31, 2011.

The Senate bill contained no similar provision.

The Senate recedes.

Treatment of independent research and development costs on certain contracts (sec. 824)

The Senate bill contained a provision (sec. 814) that would amend section 2372 of title 10, United States Code, to clarify in what circumstances independent research and development costs are considered fair, reasonable, and allowable expenses on Department of Defense contracts.

The House amendment contained no similar provision.

The House recedes with an amendment that would create a new section 2372a of title 10, United States Code, that would specify that bid and proposal expenses considered as allowable indirect costs on cost-reimbursement contracts should be reported independently of independent research and development

costs under section 2372 of title 10, United States Code. The amendment would establish for the Department of Defense a goal that Department-wide bid and proposal costs should not exceed one percent of the amount of contractor sales to the Department. The conferees do not intend for the Department to achieve this goal by arbitrarily limiting the amount of bid and proposal costs contractors may have reimbursed, but to instead address the factors driving bid and proposal costs. The amendment would also require the Department to contract with an outside, independent entity to study the laws, regulations, and practices driving bid and proposal costs and provide recommendations to the Department on how to reduce these costs. If, in any year the Department fails to meet the one percent goal, the amendment would require that an advisory panel pursuant to the Federal Advisory Committees Act (5 U.S.C. app) be established to provide recommendations on changes to statute, regulation, and practice to reduce bid and proposal costs. The amendment also would require the Department to report on bid and proposal costs and independent research and development costs as part of the report required under 2313a of title 10, United States Code.

Exception to requirement to include cost or price to the Government as a factor in the evaluation of proposals for certain multiple-award task or delivery order contracts (sec. 825)

The Senate bill contained a provision (sec. 815) that would amend section 2305(a)(3) of title 10, United States Code, to provide an exception to the existing statutory requirement to include cost or price to the Federal Government as an evaluation factor that must be considered in the evaluation of proposals for all contracts. The provision would only apply to multiple award task or delivery order contracts to buy services and the Department would then appropriately focus on price when individual task orders are issued and competed.

The House amendment contained no similar provision.

The House recedes with an amendment that would allow task or delivery orders to be awarded on a sole-source basis when a standalone contract could be awarded on a sole-source basis. The amendment also would preclude the award of multiple award contracts without cost or pricing data in cases where task orders are expected to be awarded as sole source contracts to small businesses under section 8(a) of the Small Business Act (Public Law 85-536) because price competition at the time of task or delivery order award would not be expected.

Extension of program for comprehensive small business contracting plans (sec. 826)

The Senate bill contained a provision (sec. 818) that would amend chapter 137 of title 10, United States Code, to add a new section that would codify the authority to conduct small business subcontracting plans. The Government Accountability Office (GAO) recently reported to the committee that the Test Program for Negotiation of Comprehensive Small Business Subcontracting Plans has resulted in the avoidance of millions of dollars in administrative costs and recommended that the program be made permanent. This provision would implement GAO's recommendation.

The House amendment contained no similar provision.

The House recedes with an amendment that would extend the current pilot program through the end of fiscal year 2027.

Treatment of side-by-side testing of certain equipment, munitions, and technologies manufactured and developed under cooperative research and development agreements as use of competitive procedures (sec. 827)

The Senate bill contained a provision (sec. 823) that would amend section 2350a(g) of title 10, United States Code, to add a new paragraph to clarify that the general solicitation and testing competitive procedures used under the program are competitive procedures under chapter 137 of title 10, United States Code.

The House amendment contained no similar provision.

The House recedes with an amendment that would make discretionary the use of side-by-side testing to fulfill competitive procedures for follow-on procurements and that would set a time limit within which such follow-on procurements could be conducted. The conferees expect that, prior to procuring any items under this provision, market research will be conducted to determine that comparable items are not available.

The Senate bill contained a provision (sec. 824) that would amend section 2359b(a)(2) of title 10, United States Code, to expand the scope of the defense acquisition challenge program to include alternatives to existing acquisition programs and to clarify that the general solicitation competitive procedures used under the program are competitive procedures under chapter 137 of title 10, United States Code.

The House amendment contained no similar provision.

The House recedes.

Preference for fixed-price contracts (sec. 829)

The Senate bill contained a provision (sec. 827) that would revise the Defense Federal Acquisition Regulation Supplement to establish a preference for fixed-price contracts, including fixed-price incentive fee contracts, in the determination of contract type and establish an approval mechanism for the use of cost-type contracts over \$5.0 million in value.

The Senate bill contained a provision (sec. 828) that would require the Secretary of Defense to prescribe regulations to require the use of firm fixed-price contracts for foreign military sales not later than 180 days after the enactment of this Act. Additionally, this provision would grant the Secretary waiver authority if the Secretary determines that a different type of contract is in the best interest of the United States taxpayers.

The House amendment contained no similar provision.

The House recedes with an amendment that would clarify that foreign countries that are counterparties to foreign military sales may select a contracting vehicle that is not firm fixed-price. The conferees direct the Secretary of Defense to develop a process to determine the contracting preferences of foreign counterparties and to brief the Committees on Armed Services of the Senate and House of Representatives on the elements of the process no later than 6 months after enactment of this Act. The conferees further expect that the Secretary shall waive the requirement for firm fixed-price contracts only in exceptional cases. The conferees expect that the Department of Defense will not interfere in the process of the host nation selecting a contract type. If a contract type other than firm fixed-price is selected at the request of a country, the Secretary of Defense shall be prepared to notify Congress that the Department of Defense did not encourage the country in the decision to pursue that contract type. The amendment also would establish a pilot program to accelerate contracting of foreign

military sales by allowing the Department of Defense to base price reasonableness determinations on actual cost and pricing data for purchases of the same product for the Department.

Preference for performance-based contractual payments (sec. 831)

The Senate bill contained a provision (sec. 829) that would amend section 2307(b) of title 10, United States Code, to establish a preference for performance-based payments to contractors and would re-establish the policy objective laid out in Federal Acquisition Regulation 32.1001, which established performance-based payments as the preferred Government financing mechanism.

The House amendment contained no similar provision.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Defense Acquisition University to provide training on the use of contracting authorities that incentivize contractors to deliver additional savings to the government.

Sunset and repeal of certain contracting provisions (sec. 833)

provides the Department of Defense with a list of acquisition positions considered inherently governmental.

Flexibility in contracting award program (sec. 834)

The Senate bill contained a provision (sec. 829G) that would establish an award to recognize defense acquisition programs and acquisition professionals that make the best use of flexibilities and those authorities granted in the Federal Acquisition Regulation and Department of Defense Instruction 5000.02 (Operation of the Defense Acquisition System) meant to increase the efficiency of programs.

The House amendment contained no similar provision.

The House recedes with an amendment that would reduce the administrative burdens associated with the awards program.

Protection of task order competition (sec. 835)

The Senate bill contained a provision (sec. 819) that would amend section 2304c(e) of title 10, United States Code, that would prohibit task and delivery order protests if the Secretary of Defense has appointed an ombudsman in accordance with section 2304c(f) of title 10, United States Code, to review complaints related to task and delivery order contracts.

The House amendment contained a similar provision (sec. 1862) that would amend section 4106(f) of title 41, United States Code, to maintain a consistent approach to task-order protests between civilian and defense agencies.

The House recedes with an amendment that would permanently authorize protests of task and delivery orders with values exceeding \$10.0 million at civilian agencies. For protests of task and delivery orders of the Department of Defense, the amendment modifies section 2304c(e)(1)(B) of title 10, United States Code, to increase the minimum value of a task or delivery order that may be protested from \$10.0 million to \$25.0 million.

Contract closeout authority (sec. 836)

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would modify the date when Selected Acquisition Reports are due to Congress.

Amendments relating to independent cost estimation and cost analysis (sec. 842)

The Senate bill contained a provision (sec. 803) that would amend section 2334 of title 10, United States Code, and would repeal section 2434 of title 10, United States Code, in order to remove the ambiguity concerning the roles and responsibilities for the conduct of independent cost estimates (ICEs) by designating the Director of Cost Assessment and Program Evaluation (CAPE) to ensure standards are met. The Senate bill also contained a provision (sec. 836) that would amend subsection (d) of section 2334 of title 10, United States Code, to remove the requirement for disclosure of confidence levels for baseline estimates of major defense acquisition programs.

The House amendment contained a similar provision (sec. 812) that would amend sections 2334 and 2434 of title 10, United

States Code, to make clear that CAPE conducts or approves ICEs for all major defense acquisition programs and major automated information systems.

The Senate recedes with an amendment that would require an ICE for the technology maturation and risk reduction phase of a major defense acquisition program or major subprogram that identifies the key contributors to the life-cycle costs of the program or subprogram. The conferees expect that the procedures to be developed for collecting cost data from acquisition program contractors are cost effective and make use of existing sources of data, to the best extent practicable.

Revisions to Milestone B determinations (sec. 843)

The Senate bill contained a provision (sec. 835) that would amend section 2366b(a)(3) of title 10, United States Code to eliminate the need for waivers that are regularly submitted to the committee for programs that are executed at the beginning of the fiscal year but before the Future Years Defense Program (FYDP) has been submitted, and should receive Milestone B certification as long as there is funding in the current FYDP. This provision would reduce the number of required waivers and therefore reduce unnecessary staff burden.

The House amendment contained a similar provision (sec. 813).

The Senate recedes.

Review and report on sustainment planning in the acquisition process (sec. 844)

The House amendment contained a provision (sec. 814) that would require the Secretary of Defense to enter into a contract with an independent entity with appropriate expertise to conduct an assessment of the extent to which sustainment matters are considered in decisions related to requirements, acquisition, cost estimating, and programming and budgeting for major defense acquisition programs.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would extend and include additional elements in the review, such as an evaluation of how well life-cycle sustainment strategies required under section 2337 of title 10, United States Code, are incorporated into the acquisition strategy required by section 2431a of title 10, United States Code, and other acquisition planning.

Revision to distribution of annual report on operational test and evaluation (sec. 845)

The House amendment contained a provision (sec. 815) that would amend section 139 of title 10, United States Code, by including the Secretaries of the military departments in the list of people who receive the annual report of the Director of Operational Test and Evaluation (DOTE). The section would also extend the annual report through January 31, 2021.

The Senate bill contained no similar provision.

The Senate recedes.

The conferees recognize the importance in having an independent report each year on operational test and evaluation activities in the Department of Defense, but encourage the Director of Operational Test and Evaluation to seek and consider input from other Department test organizations in developing such reports. Further, the conferees believe that more rigorous developmental testing, realistic requirements, and disciplined systems engineering will likely improve operational test outcomes. The conferees expect program offices to take the necessary steps to improve operational test outcomes and adopt lessons learned and best practices that are identified in the DOTE annual report. The conferees note that these reports are public documents and available electronically to all interested parties.

Repeal of major automated information systems provisions (sec. 846)

The Senate bill contained a provision (sec. 831) that would repeal chapter 144A of title 10, United States Code.

The House amendment contained no similar provision.

Revisions to definition of major defense acquisition program (sec. 847)

The Senate bill contained a provision (sec. 832) that would amend section 2430 of title 10, United States Code, and revise the definition of a major defense acquisition program to exclude fixed-price prototypes not planned as part of an existing major defense acquisition program and those programs or projects developed under the rapid fielding or rapid prototyping acquisition pathway authorized under section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

The House amendment contained no similar provision.

The House recedes with an amendment that would specify that major defense acquisition program costs exclude acquisition programs or projects that are carried out using the rapid fielding or rapid prototyping acquisition pathway under section 804 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

Acquisition strategy (sec. 848)

The Senate bill contained a provision (sec. 833) that would amend section 2431a of title 10, United States Code, to make technical changes and require that the acquisition strategy for each major defense acquisition program must also consider a comprehensive sustainment strategy that includes all aspects of the total life-cycle management of the weapon system, including product support, logistics, product support engineering, supply chain integration, maintenance, acquisition logistics, and all aspects of software sustainment.

The House amendment contained no similar provision.

The House recedes with an amendment that would remove the requirement to include a sustainment strategy within the acquisition strategy required under section 2431a of title 10, United States Code. The conferees note that section 2431a of title 10, United States Code, requires logistics, maintenance, and sustainment issues to be considered in acquisition strategies, and that a life-cycle sustainment strategy is mandated under section 2337 of title 10, United States Code. Another provision in this Act requires an evaluation of the existing life-cycle sustainment strategy and an assessment of how well its elements are incorporated into the acquisition strategy in section 2431a of title 10, United States Code.

Improved life-cycle cost control (sec. 849)

The Senate bill contained a provision (sec. 834) that would make several amendments to improve life-cycle cost controls. First, this provision would amend section 804(c)(3) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), to require rapid fielding guidance from the Under Secretary of Defense for Acquisition, Technology, and Logistics to include direction on a process for identifying and exploiting opportunities to use the rapid fielding pathway to reduce total ownership costs. Secondly, this provision would amend section 805(2) of the National Defense Authorization Act for Fiscal Year 2016 (NDAA) to include life-cycle cost management as a procedure that the Secretary of Defense should establish for alternative acquisition pathways to meet national

security needs. Thirdly, this provision would amend section 833(e) of the NDAA for Fiscal Year 2016 to require the Secretary to also issue guidance on policies to maximize the use of fixed-price contracts and the ability to implement tradeoffs in total cost of ownership, schedule, and performance. Fourthly, this provision would add a new section to chapter 144 of title 10, United States Code, which would require sustainment reviews of acquisition programs 5 years after initial operational capability—unless the program has failed to maintain its availability or reliability threshold or has breached its affordability cap before that time. Additionally, this provision would require the Secretary of Defense to establish a commercial operational and support savings initiative to insert existing commercial items or technology into military legacy programs through rapid development and fielding of prototypes in order to improve readiness and reduce operations and support costs.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the military departments to conduct a sustainment review five years after declaration of initial operational capability of a major defense acquisition program and throughout the system's life cycle, using availability and reliability thresholds and cost estimates as the triggers that prompt such a review. The amendment also would clarify that sustainment reviews would be conducted in coordination with the requirements of section 2337 of title 10, United States Code, and section 832 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81). The amendment also would authorize a commercial operational and support savings initiative.

Authority to designate increments or blocks of items delivered under major defense acquisition programs as major subprograms for purposes of acquisition reporting (sec. 850)

The Senate bill contained a provision (sec. 837) that would amend section 2430a(1)(B) of title 10, United States Code, to expand the authority to designate increments or blocks of items delivered under major defense acquisition programs as major subprograms.

The House amendment contained no similar provision.

The House recedes.

Reporting of small business participation on Department of Defense programs (sec. 851)

include a new section to include first and second tier subcontracts awarded by the Department of Defense under major defense acquisition programs in the Department's overall count of small business goals.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Department of Defense to annually report on its attainment of the small business prime contracting goals and subcontracting goals as required by section 15(h) of the Small Business Act (15 United States Code 644(h)) and to report separately on its small business use after excluding certain types of contracts that may not be suitable for award to small businesses.

Waiver of congressional notification for acquisition of tactical missiles and munitions greater than quantity specified in law (sec. 852)

The Senate bill contained a provision (sec. 840) that would amend section 2308(c) of title 10, United States Code, to waive the requirement for the head of an agency to notify congressional defense committees of the decision to acquire a higher quantity of an end item for tactical missiles and munitions annual procurements.

The House amendment contained a similar provision (sec. 836) that would waive the requirement for the Secretary of Defense to notify the congressional defense committees of a decision, not later than 30 days after the date of the decision, to acquire a higher quantity of an end item (for tactical missiles and munitions annual procurements only) than is specified in law.

The Senate recedes.

The Senate bill contained a provision (sec. 841) that would grant the Secretary of Defense the authority to conduct a multiyear contract for multiple defense programs that are produced at common facilities at a high rate, and which maximize commonality, efficiencies, and quality, in order to provide maximum benefit and significant savings to the Department of Defense.

The House amendment contained no similar provision.

The House recedes.

Key performance parameter reduction pilot program (sec. 854)

The Senate bill contained a provision (sec. 842) that would require the Secretary of Defense to enact a pilot program aimed at decreasing the number of Key Performance Parameters (KPPs) on acquisition programs. The Secretary would be required to select one acquisition program from each of the services to determine if limiting the number of KPPs to three, at the most, leads to operational or programmatic improvements of outcomes.

The House amendment contained no similar provision.

The House recedes with an amendment that would clarify the types of key performance parameters that may be reduced in the pilot program.

Mission integration management (sec. 855)

The Senate bill contained a provision (sec. 843) that would further enhance the Department of Defense's (DOD) efforts to adopt an open systems approach to defense acquisition. The provision would require the Secretary of Defense to implement modular open systems architecture in acquisition programs in specified mission areas when implementing section 801 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291). The provision would require each multi-service and multi-program mission outlined in the provision to have a mission integration manager to act as the principal substantive advisor to the Deputy Secretary of Defense and the Vice Chairman of the Joint Chiefs of Staff for all aspects of capability integration for the mission area.

The House amendment contained no similar provision.

The House recedes with an amendment that would incorporate into another section of this Act the requirement of the Senate provision (sec. 843) for the Department to ensure that external facing interfaces are identified and clearly and publicly characterized in terms of form, function, and the content that flows across to enable the creation of interoperable "systems of systems." The conferees urge the Department to ensure that the standards bodies and processes, which are established to support modular open systems approaches, promote interfaces that are dynamically managed, flexible, and extensible to enable technological innovation and performance growth.

The amendment also would modify the Senate provision to provide flexibility to the Department of Defense in implementing mission integration activities, and to provide an alternative funding source for mission integration activities. The conferees urge the Department of Defense to propose its own funding mechanism in future budget requests.

SUBTITLE E—PROVISIONS RELATING TO ACQUISITION WORKFORCE

Project management (sec. 861)

The Senate bill contained a provision (sec. 851) that would outline the responsibilities of the Department of Defense under chapter 87 of title 10, United States Code, for improving program and project management. This provision would require that not later than 1 year after the enactment of this Act that the Secretary of Defense develop Department-wide standards, policies, and guidelines for program and project management.

The Senate bill also contained a provision (sec. 1097) that would amend section 503 of title 31, United States Code, and Chapter 11 of title 31, United States Code, to improve Federal program and project management in the Department of Defense.

The House amendment contained a similar provision (sec. 1098L).

The Senate recedes with an amendment that would clarify that all members of the Program Management Policy Council must be officers or employees of the Federal government or the armed services. This obviates the need to address the application of the Federal Advisory Committee (5 U.S.C. App.).

Authority to waive tenure requirement for program managers for program definition and program execution periods (sec. 862)

The Senate bill contained a provision (sec. 852) that would amend sections 826(e) and 827(e) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to harmonize the waiver authorities granted in these sections to the Service Acquisition Executive or the Under Secretary of Defense for Acquisition, Technology, and Logistics.

The House amendment contained no similar provision.

The House recedes.

Purposes for which the Department of Defense Acquisition Workforce Development Fund may be used; advisory panel amendments (sec. 863)

The Senate bill contained a provision (sec. 854) that would amend section 1705 of title 10, United States Code, to expand the use of the Department of Defense Acquisition Workforce Development Fund. The provision would clarify that the fund could be used for the development of acquisition tools and

methodologies and the undertaking of research and development of activities that could lead to acquisition policies and practices that will improve the efficiency and effectiveness of defense acquisition efforts.

The House amendment contained no similar provision.

The House recedes with an amendment that would clarify that the advisory panel on streamlining and codifying acquisition regulations that was established in section 809 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) is an independent advisory panel to be supported by the Defense Acquisition University and the National Defense University. The amendment would further clarify that, as an independent advisory panel, the panel has the hiring authorities provided in section 3161 of title 5, United States Code. The amendment also would limit the amount of funds that may be used in fiscal year 2017 for acquisition tools and methodologies and the undertaking of research and development to \$35.0 million.

Department of Defense Acquisition Workforce Development Fund determination adjustment (sec. 864)

The House amendment contained a provision (sec. 839) that would amend section 1705 of title 10, United States Code, to allow the Secretary of Defense to reduce the threshold amount that must be credited to the Defense Acquisition Workforce Development Fund during fiscal year 2017 from \$400.0 million to \$0. This section addresses an overfunding of the fund that has resulted from carryovers from prior years.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Department of Defense to transfer \$225.0 million from the Defense Acquisition Workforce Development Fund (DAWDF) in fiscal year 2017 to the Department's Rapid Prototyping Fund. The conferees also direct the Secretary of Defense to brief the Committees on Armed Services of the Senate and the House of Representatives, not later than March 15, 2017, on the extent to which DAWDF funding is sufficient to meet acquisition workforce development requirements and on steps the Department has taken to improve the management and implementation of the DAWDF to avoid carryover funding. The conferees encourage the Department to make use of the expanded authorities for the use of the DAWDF to address workforce training and development of acquisition tools and practices to improve acquisition practice and outcomes.

It is the opinion of the conferees per section 1705 of title 10, United States Code, that the amounts transferred into

the DAWDF from unobligated balances, as described in subsection 3, does not have a maximum limit each year. The \$500,000,000 limitation only applies to subsection 2 relating to credits for contract services. The conferees direct the Secretary of Defense to establish waivers to procedures regarding obligation and expenditure rates, applicability of standard financial management regulations, and other financial management procedures, as necessary, to ensure the most efficient and effective execution of projects supported by the Rapid Prototyping Fund. Specifically, the conferees direct the Secretary to establish procedures that provide relief from strict obligation and expenditure benchmarks and flexibility in using amounts in the Fund consistent with a broad range of efforts under research, development, test and evaluation budget activities. The conferees believe that strict adherence to standard Department financial management procedures may negatively impact program execution and not enable the program to achieve its goals. The conferees direct the Secretary to notify the congressional defense committees within 30 days after any such procedures are waived.

Limitations on funds used for staff augmentation contracts at management headquarters of the Department of Defense and the military departments (sec. 865)

The Senate bill contained a provision (sec. 905) that would limit the amount of funds available for staff augmentation contracts at the Office of the Secretary of Defense and the headquarters of the military departments for fiscal years 2017 and 2018 to not more than the amount expended for those contracts in fiscal year 2016. The provision would further require a 25 percent reduction to the fiscal year 2016 funding for those contracts after fiscal year 2018.

The House amendment contained a provision (sec. 809A) that would extend the limitation on the aggregate annual amount available to the Department of Defense for contract services through fiscal year 2017.

The House recedes with an amendment that would limit the amount of funds available for staff augmentation contracts, as defined in the amendment, at the Office of the Secretary of Defense and the headquarters of the military departments for fiscal years 2017 and 2018 to not more than the amount expended for those contracts in fiscal year 2016 and would further require a 25 percent reduction to the fiscal year 2016 funding for those contracts in fiscal years 2018 through fiscal year 2022.

The conferees direct the Secretary of Defense to brief the Committees on Armed Services of the Senate and the House of Representatives, no later than February 1, 2017, on the plan to implement the requirements of this provision.

The Senate bill contained a provision (sec. 592) that would add a new section 1725 to title 10, United States Code, to authorize the Secretary of Defense to establish in the Defense Acquisition Corps positions to be known as "Senior Military Acquisition Advisors". Senior Military Acquisition Advisors would be appointed by the President, by and with the advice and consent of the Senate. Eligible officers include officers in the grade of colonel or captain in the Navy, with extensive defense acquisition experience, and who are eligible for retirement. Senior Military Acquisition Advisors would be authorized to remain in service in support of their Service Acquisition Executive and be assigned as an adjunct professor at the Defense Acquisition University.

Senior Military Acquisition Advisors would be competitively selected and would provide senior level acquisition expertise to the Service Acquisition Executive of their military department for the remainder of their career. An officer who is continued on active duty under this program is not eligible for consideration for selection for promotion. A Senior Military Acquisition Advisor will serve no longer than a 5-year term. When a Senior Military Acquisition Advisor retires with a minimum of 3 years of service, the officer may, at the discretion of the President, be retired as a brigadier general or rear admiral (lower half), but without increase in retired pay or other compensation by reason of retirement of an officer in the grade of brigadier general or rear admiral (lower half).

The House amendment contained no similar provision.

The House recedes.

Authority of the Secretary of Defense under the acquisition demonstration project (sec. 867)

The Senate bill contained a provision (sec. 1104) that would repeal section 1762 of title 10, United States Code, and create a new section 1763 of title 10, United States Code, to provide a permanent authority that would allow the Secretary of Defense to establish and adjust a special system of personnel programs for employees in the Department of Defense civilian

acquisition workforce and supporting personnel assigned to work directly with that workforce.

Enhanced use of data analytics to improve acquisition program outcomes

The Senate bill contained a provision (sec. 853) that that would mandate the establishment of activities to promote the use

of data analytics and other evaluation-related methods to support acquisition decision-making and enhance organizational learning.

The House amendment contained no similar provision.

The Senate recesses.

The conferees note a widespread recognition that the Department of Defense (DOD) does not sufficiently incorporate data into its acquisition-related learning and decision-making. Many major policy decisions are made without the benefit of being informed by substantive data. These policies are sometimes based on assumptions, and program reviews do not always sufficiently incorporate relevant data against which to evaluate success. The conferees note that the Government Accountability Office reported in 2015 that DOD officials responsible for acquisitions and developing requirements lacked access to data and the analytical tools necessary to conduct effective reviews.

The conferees believe that data analysis and other evaluation-related methods are a critical element in making well-informed acquisition decisions and managing programs. As the Congressional Research Service noted, a lack of data or effective data analyses can lead to incorrect or misleading conclusions. The result may be policies that squander resources, waste taxpayer dollars, and undermine the effectiveness of government programs or military operations.

The conferees believe that one important aspect of enhancing the use of data analytics in acquisitions is for DOD to improve data sharing both within its programs and organizations, and where appropriate outside the Department. Sharing data externally includes publishing, to the maximum extent practicable, and in a manner that protects classified and proprietary information, data collected by the Department that is related to acquisition program costs and activities. Effectively sharing such data would allow industry, academia, think tanks, and the public to develop analyses of trends, lessons learned, best practices, and new analytical methods and tools for decision-making. To this end, the conferees encourage the Department to fund intramural and extramural research and development activities to develop and implement data analytics capabilities in support of improved acquisition outcomes, possibly through leveraging the authorities of the Defense Acquisition Workforce Development Fund.

Therefore, the conferees direct the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, Technology, and Logistics, the Deputy Chief Management Officer, and the Chief Information Officer, and in coordination with the military services, to assess the effectiveness of current activities and policies related to the use of data analysis,

measurement, and other evaluation-related methods to the planning, implementation, and management of acquisition programs and the improvement of acquisition outcomes in the Department of Defense. The activities to be assessed should include data analytics capabilities and organizations within the military services; capabilities in Department of Defense laboratories, test centers, and Federally Funded Research and Development Centers to provide technical support for data analytics; and the use of existing analytical capabilities available to acquisition programs and offices to support improved acquisition outcomes.

Further, the Secretary of Defense, acting through the Under Secretary of Defense for Acquisition, Technology, and Logistics, shall conduct a review of the curriculum taught at the National Defense University, the Defense Acquisition University, and appropriate private-sector academic institutions to determine the extent to which the curricula includes appropriate courses on data analytics and other evaluation-related methods and their application to defense acquisitions, and how these efforts can be used by the acquisition workforce to perform their missions.

The conferees direct the Secretary of Defense, not later than 1 year after the date of the enactment of this Act, to brief the Armed Services Committees of the Senate and House of Representatives on the use of data analysis, measurement, and other evaluation-related methods in DOD acquisition programs. The briefing shall address the extent to which data analytics capabilities have been implemented within the military services, DOD laboratories, test centers, and Federally Funded Research and Development Centers to provide technical support for acquisition program management; the potential to increase the use of analytical capabilities for acquisition programs and offices to improve acquisition outcomes; the amount of funding for intramural and extramural research and development activities to develop and implement data analytics capabilities in support of improved acquisition outcomes; any potential improvements, based on private-sector best practices, in the efficiency of current data collection and analysis processes that could minimize collection and delivery of data by, from, and to government organizations; steps being taken to appropriately expose acquisition data in an anonymized fashion to researchers and analysts; and an assessment of whether the curriculum at the National Defense University, the Defense Acquisition University, and appropriate private-sector academic institutions includes appropriate courses on data analytics and other evaluation-related methods and their application to defense acquisitions.

The Senate recedes.

Modified requirements for distribution of assistance under procurement technical assistance cooperative agreements

The Senate bill contained a provision (sec. 875) that would amend section 2413(c) of title 10, United States Code, to conform the Procurement Technical Assistance Program with the Defense Logistics Agency current practice of using states as the geographic basis for cooperative agreement awards.

The House amendment contained no similar provision.
The Senate recedes.

The conferees agree that the current formula for distribution of grants to procurement technical assistance centers (PTACs) should be adjusted to address that the Department of Defense has consolidated its contract administration services districts, which are currently the basis for grant distribution pursuant to section 2413 of title 10, United States Code. However, the conferees believe that a successful funding formula should consider factors such as avoiding the discontinuation of services to existing clients of PTACs, the desirability of adding new PTACs or expanding the client base of existing PTACs, the population density, geographic accessibility of PTACs, duplication of services, the level of success obtained by particular grant recipients, the availability of funds, and other possible factors. Therefore,

the conferees direct the Department to provide recommendations on appropriate factors and a funding formula. To develop these recommendations, the Department shall, at a minimum, work in consultation with current grantees and their representatives and examine comparable grant programs operated by other agencies. Such programs could include the Small Business Development Centers, Women's Business Centers, and Veterans Business Outreach Centers of the Small Business Administration or the Business Centers of the Minority Business Development Agency of the Department of Commerce. The Department's recommendations shall be provided no later than March 1, 2017.

Working capital fund for precision guided munitions exports in support of contingency operations

The Senate bill contained a provision (sec. 882) that would authorize the Secretary of Defense to establish a working capital fund to finance inventories of supplies of precision guided munitions in advance of partner and allied forces requirements to enhance the effectiveness of overseas contingency operations conducted or supported by the United States.

The House amendment contained no similar provision.
The Senate recedes.

Director of Developmental Test and Evaluation

The Senate bill contained a provision (sec. 894) that would amend section 139 of title 10, United States Code, and section 196(g) of title 10, United States Code, that would refine the role of the Director of Operational Test and Evaluation.

The House amendment contained no similar provision.
The Senate recedes.

The conferees note that Congress re-established a developmental test and evaluation organization within the defense research and engineering enterprise in 2009. Since that time, the conferees have become concerned that the Department has not established a reasonable balance of investment between developmental and operational test activities. The conferees believe it is necessary to examine the functions and resources of the organizations of the Deputy Assistant Secretary of Defense for Developmental Test and Evaluation (DT&E) and the Director of Operational Test and Evaluation to better understand if the Department has struck the right balance between these activities. To improve test and evaluation results for the Department's acquisition programs in the most efficient manner,

the Department's leadership must ensure sufficient resources to support testing and oversight activities.

The conferees note that, over time, the resources and influence of the Office of the Secretary of Defense and the Service developmental test and evaluation organizations have declined, adversely impacting the successful outcomes of acquisition efforts. However, the conferees believe that this decline should be re-examined in light of the need for stronger developmental test organizations to support department-wide efforts to promote technical innovation and re-establish battlefield technological superiority. As a result, the conferees believe it would be useful for the Department of Defense to review the resources allocated to developmental and operational test and evaluation organizations to address a number of issues and questions.

The conferees direct the Secretary of Defense to form an independent study panel, unaffiliated with a Federally Funded Research and Development Center, to review the appropriate roles, responsibilities, and level of resources for both developmental and operational test and evaluation activities required to execute statutory and regulatory responsibilities within the Office of the Secretary of Defense. The panel will develop such recommendations as it believes appropriate for optimal resources and authorities to support developmental and operational test missions. The review and report should be completed no later than 1 year after the enactment of this Act.

The committee recommends that the panel address the following questions:

(a) How can the Director of Operational Test and Evaluation and the Deputy Assistant Secretary of Defense for Developmental Test and Evaluation (DASD DT&E) at the Office of the Secretary of Defense approach oversight within the system development cycle to avoid overlap but be mutually supporting without sacrificing the independence of either organization?

(b) Does participation with and assessment of program progress during phases prior to operational test and evaluation bias the independent objectivity of the operational test and evaluation organization?

(c) Are there specific test and evaluation activities that should be realigned for management within OSD or the services to promote effectiveness and efficiency of those programs?

(d) Overall are the developmental and operational test and evaluation organizations effectively carrying out the missions as described in title 10, United States Code, and are there impediments to meeting those responsibilities? In

addition, are they engaged in activities outside their mission areas?

(e) Are the activities of the test and evaluation organizations constructive, not duplicative or disruptive, to support the acquisition goals of the military departments and defense agencies?

(f) What staffing authorities and other resources are needed to support effective and efficient oversight of both the developmental and operational phases of testing commensurate with the effort to each relative to the portion of the programs that their oversight entails?

Improved transparency and oversight over Department of Defense research, development, test, and evaluation efforts and procurement activities related to medical research

The Senate bill contained a provision (sec. 898) that would prohibit the Secretary of Defense from entering into a contract, grant, or cooperative agreement for congressional special interest medical research programs under the congressionally directed medical research program of the Department of Defense unless additional cost accounting and other specified requirements were implemented.

The House amendment contained no similar provision.

The Senate recedes.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

SUBTITLE A—OFFICE OF THE SECRETARY OF DEFENSE AND RELATED MATTERS

Organization of the Office of the Secretary of Defense (sec. 901)

The Senate bill contained a provision (sec. 901) that would amend section 133 of title 10, United States Code, to establish the position of the Under Secretary of Defense for Research and Engineering, amend section 138 of title 10, United States Code, to establish and consolidate certain Assistant Secretary of Defense positions, and make other conforming changes. The provision would also amend section 132a of title 10, United States Code, to redesignate the Under Secretary of Defense for Business Management and Information as the Under Secretary of Defense for Management and Support.

The House amendment contained a provision (sec. 846) that would revise the effective date for amendments relating to the conversion of the position of the Deputy Chief Management Officer to the position of the Under Secretary of Defense for Business Management and Information.

The House recedes with an amendment that would amend chapter 4 of title 10, United States Code, to establish an Under Secretary of Defense for Research and Engineering, an Under Secretary of Defense for Acquisition and Sustainment, and a chief management officer within the Department of Defense, effective on February 1, 2018. The amendment would make other modifying and conforming changes, and require the Secretary of Defense to conduct a review and submit a report to the congressional defense committees on the organizational and management structure for the Department.

Three broad priorities framed the conference discussions: (1) elevate the mission of advancing technology and innovation within the Department; (2) foster distinct technology and acquisition cultures to better deliver superior capabilities for the armed forces; and (3) provide greater oversight and management of the Department's Fourth Estate. The conferees believe that separating the "chief technology officer" and "chief acquisition officer" responsibilities currently residing with the Under Secretary of Defense for Acquisition, Technology, and Logistics, as well as establishing a "chief management officer" within the Department, addresses these priorities and better postures the Office of the Secretary of Defense organizationally to meet future national security challenges.

The conferees believe the technology and acquisition missions and cultures are distinct. The conferees expect that the Under Secretary of Defense for Research and Engineering would take risks, press the technology envelope, test and experiment, and have the latitude to fail, as appropriate. Whereas the conferees would expect the Under Secretary of Defense for Acquisition and Sustainment to focus on timely, cost-effective delivery and sustainment of products and services, and thus seek to minimize any risks to that objective.

Some will argue that the agreement exacerbates the technology "valley of death." The conferees acknowledge that there will be seams in any organizational construct, but also believe that this seam creates a healthy tension that can be mitigated through effective leadership and management. As an Under Secretary, third in precedence, the conferees expect that the "chief technology officer" would have the stature and resources to drive innovation throughout the Department, including as needed through development and implementation of innovative policies and practices. At the same time, the

conferees would expect the Under Secretary of Defense for Acquisition and Sustainment to challenge any advanced technology ideas that the Under Secretary cannot confidently deliver on within cost, schedule, and performance objectives, and shape those efforts appropriately.

The conferees recognize that the implementation of this provision will require further examination and analysis, to include a deeper review of authorities, responsibilities, resource implications, and the appropriate allocation of subordinate positions and organizations. As such, the provision provides policy guidance on roles and responsibilities for each of the three senior leadership positions and repeals requirements in statute for specific subordinate assistant and deputy assistant secretaries of defense to provide flexibility to the Department to allocate such subordinate positions to best meet congressional policy guidance.

The conferees believe a review of authorities is particularly important, especially as they relate to any direction and supervisory authorities vested in the three senior leadership positions, to allow those senior leaders to effectively oversee and manage activities and resources within their portfolios at the direction of the Secretary of Defense. Similarly, the conferees believe an in-depth examination of the placement within the Department and the responsibilities of the chief management officer is also warranted, as they believe such an officer could provide greater oversight and management of the non-homogenous organizations that comprise the Department's Fourth Estate. The conferees also believe an examination of the potential for the establishment of a Chief Innovation Officer position, informed by best private sector practices, is warranted.

The conferees set a date of February 1, 2018, for the implementation of the three senior leadership positions, to provide the Department with time to conduct the required review, to engage the congressional defense committees, and to provide its recommendations on an organization and management structure for the Department. However, the conferees encourage the President to move out earlier on nominations for these senior leadership positions.

Lastly, while the focus of this provision is on the Office of the Secretary of Defense, the conferees also recognize that the Department as a whole must be examined to provide the organizational and management agility and adaptability necessary to address longer-term national security challenges.

Responsibilities and reporting of the Chief Information Officer of the Department of Defense (sec. 902)

The Senate bill contained a provision (sec. 903) that would amend paragraph 8 of section 132(b) of title 10, United States Code, to establish the position of the Assistant Secretary of Defense for Information.

The House amendment contained no similar provision.

The House recedes with an amendment that would clarify in sections 131 and 142 of title 10, United States Code, the responsibilities of the Chief Information Officer of the Department of Defense.

The conferees direct the Secretary of Defense to develop a plan within 180 days after the enactment of this Act to implement a more optimized organizational structure and processes to support information management and cyber operations to include the policy, direction, oversight and acquisition functions performed by the Deputy Chief Management Officer, the Chief Information Officer, the Under Secretary of Defense for Acquisition, Technology and Logistics, the Under Secretary for Policy, and the Under Secretary for Intelligence and any other relevant entity in the Department of Defense. This plan should include both business systems and national security systems and explore the responsibilities for cyber and space policy, information network defense, and the development of policies and standards governing information technology systems and related information security activities of the Department. This plan should also assess the effectiveness and utility of the cross functional team supporting the Principal Cyber Advisor established by section 932(c)(3) of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66).

Maximum number of personnel in Office of the Secretary of Defense and other Department of Defense headquarters offices (sec. 903)

The Senate bill contained a provision (sec. 904) that would:

(1) amend section 143 of title 10, United States Code, to limit the number of civilian and detailed individuals authorized to be assigned to the Office of the Secretary of Defense to 3,767;

(2) amend section 155 of title 10, to limit the number of personnel on the Joint Staff to 1,930 including not more than 1,500 Active-Duty service members;

(3) amend section 3014 of title 10, to limit the total number of members of the Armed Forces and civilian employees of the Department of the Army assigned or detailed to permanent duty in the Office of the Secretary of the Army and on the Army staff to 3,105; and to reduce the total number of

general officers assigned or detailed to permanent duty in the Office of the Secretary of the Army and on the Army staff from 67 to 50.

(4) amend section 5014 of title 10, to limit the total number of members of the Armed Forces and civilian employees of the Department of the Navy assigned or detailed to permanent duty in the Office of the Secretary of the Navy and on the Navy staff to 2,866; and to reduce the total number of flag officers assigned or detailed to permanent duty in the Office of the Secretary of the Navy and on the Navy staff from 67 to 50.

(5) amend section 8014 of title 10, to limit the total number of members of the Armed Forces and civilian employees of the Department of the Air Force assigned or detailed to permanent duty in the Office of the Secretary of the Air Force and on the Air Force staff to 2,639; and to reduce the total number of general officers assigned or detailed to permanent duty in the Office of the Secretary of the Air Force and on the Air Force staff from 60 to 45.

The provision would further clarify the exceptions to the personnel limits. It would allow the limits to be increased by 15 percent during a national emergency.

The House amendment contained no similar provision.

The House recedes with an amendment that would limit the number of civilians assigned or detailed to the headquarters operations, establish a 2,069 personnel limit for the Joint Staff, and clarify that the exceptions to the personnel limits allow an additional 15 percent during national emergencies.

Repeal of Financial Management Modernization Executive Committee (sec. 904)

The Senate bill contained a provision that would repeal section 185 of title 10, United States Code, regarding the Department of Defense Financial Management Modernization Executive Committee.

The House amendment contained no similar provision.

The House recedes.

SUBTITLE B—ORGANIZATION AND MANAGEMENT OF THE DEPARTMENT OF DEFENSE GENERALLY

Organizational Strategy for the Department of Defense (sec. 911)

The Senate bill contained a provision (sec. 941) that would require the Secretary of Defense to develop and implement an organizational strategy for the Department of Defense (DOD).

The House bill contained no similar provision.

The House recedes with an amendment that would: (1) streamline and condense the organizational strategy required from the Secretary; (2) substantially enhance the requirement for an independent study of private sector and government experience with cross-functional teams (CFTs), and the use of cross-functional groups by the Department of Defense, to inform the Secretary's implementation of CFTs and the cultural changes needed for their success; (3) lengthen and rationalize the timelines for the next Secretary of Defense to accomplish the changes mandated by the Senate provision; and (4) provide additional discretion to the Secretary regarding the number, characteristics, and application of mandated CFTs.

The intention of the conferees in adopting this provision is to provide the Secretary of Defense with a valuable tool for improving the performance of even the most elite organizations. Recognizing that the civilian and military employees of the Department of Defense are committed to the mission of protecting and defending the United States, the conferees believe that CFTs will provide the Secretary, and therefore the DOD workforce, a tool to more-effectively achieve their shared mission. The conferees believe that CFTs will enable the Secretary to more rapidly and effectively develop solutions and strategies for complex critical objectives and other organizational outputs of the Department of Defense by harnessing and integrating the expertise and ingenuity resident in the Department's functional organizations.

Successful CFTs require that DOD develop a more collaborative culture, just as the Goldwater-Nichols Act reforms required a cultural change to instill "jointness" among the military services to better support integrated operations for the combatant commands. The conferees recognize that it is difficult to legislate cultural change, but note that cultural change mandated by Goldwater-Nichols was achieved, and that this section promotes a more collaborative culture by such practical steps as training, directives and guidance, and performance reviews. However, the views and expectations of the Secretary and his principal staff advisers will be critical to success.

DOD officials have expressed the concern that the CFTs mandated under this section will undermine the authority of the Secretary of Defense and confuse lines of responsibility. The conferees emphasize that the authority of the CFTs, which will be established and directed by the Secretary and will support the Secretary, derives from the authority of the Secretary. Any authority being exercised is the delegated authority of the Secretary and is to be applied to cross-cutting objectives and other organizational issues that are not under the authority of

any officials other than the Secretary and Deputy Secretary of Defense.

The conferees note that DOD has established CFTs in the past that were highly effective, including teams to improve care for wounded warriors, dramatically increase intelligence support to counter-terrorism forces, and rapidly build thousands of life-saving armored vehicles to protect forces facing dire threats from improvised explosive devices. The attributes of these successful teams, and the manner in which they were managed, as well as the collective experience of the private sector and other government organizations, are reflected in the provision adopted by the conferees.

The conferees hope and expect that the good-faith implementation of this provision will demonstrate the value of properly constructed CFTs, which will spur the use of such teams across the Department, supporting officials and decision-making at all levels of the enterprise.

Policy, organization, and management goals and priorities of the Secretary of Defense for the Department of Defense (sec. 912)

The Senate bill contained a provision (sec. 942) that would require a series of management directives for the next Secretary of Defense.

The House amendment contained no similar provision.

The House recedes with an amendment that would scope the management overview to focus on policy goals, organizational management, and layering of Department of Defense organizations and require updates in the form of a briefing on February 1 of each year through 2022 after the initial written report is submitted by April 1, 2017.

The Conferees note that the Secretary of Defense is expected to utilize the delivery unit authorized in this Act to assist with the execution and tracking of goals set under this provision.

Secretary of Defense delivery unit (sec. 913)

The Senate bill contained a provision (sec. 906) that would provide the Secretary of Defense with the authority to establish a delivery unit that would report directly to the Secretary in order to provide expertise and support on key reform and business transformation priorities across the Department for no more than four years beginning February 1, 2017. Such delivery unit may utilize the public-private talent exchange authorities available to the Secretary and consist of

no more than 30 professionals with deep experience in management consulting, organization transformation, and data analytics.

The House amendment contained no similar provision.

The House recedes with an amendment that would expand the role of the delivery unit beyond the business transformation process to also include the authority to identify and recommend resolutions to obstacles impeding the implementation of the Secretary's policies. The amendment also moves the establishment date of the delivery unit to March 1, 2017.

Performance of civilian functions by military personnel (sec. 914)

The House amendment contained a provision (H. 923) that would prohibit the conversion of positions performed by civilian personnel to performance by military personnel in most cases.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would further clarify that functions performed by civilian personnel should not be performed by military personnel except to meet mission requirements, as determined by the Secretary of a military department, or to address critical staffing needs for no more than one year resulting from congressional reductions in personnel or budgetary resources.

Repeal of requirements relating to efficiencies plan for the civilian personnel workforce and service contractor workforce of the Department of Defense (sec. 915)

The Senate bill contained a provision (sec. 1084) that would repeal section 955 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239).

The House amendment contained no similar provision.

The House recedes.

SUBTITLE C—JOINT CHIEFS OF STAFF AND COMBATANT COMMAND MATTERS

Joint Chiefs of Staff and related combatant command matters (sec. 921)

The Senate bill contained a provision (sec. 921) that would amend sections 151 and 153 of title 10, United States Code, to clarify the role of the Chairman of the Joint Chiefs of Staff and the key duties that this officer must perform on behalf of the joint force, specifically: providing advice on the

military elements of defense strategy and the global integration of military activities; advocating for the joint warfighter of today and tomorrow, especially with respect to developing joint capabilities; ensuring comprehensive joint readiness; and fostering joint force development. This provision seeks to clarify the role of the Chairman and thereby set an expectation that the preponderance of any Chairman's time should be devoted to the key strategic, global, and joint duties that are the Chairman's unique purview within the military.

The provision would also enhance the role of the other members of the Joint Chiefs, and the Joint Chiefs of Staff as a corporate body, to provide military advice to civilian leaders, including on the military elements of strategy. Current law provides the Chairman discretion with regard to how much to consult with the other Joint Chiefs and whether to inform civilian leaders of alternative military advice. This provision would seek to better enable the Chairman to act as the principal military adviser to civilian leaders.

The House amendment contained two similar provisions (sec. 907 and sec. 908). The first provision in the House amendment (sec. 907) would amend section 152(a) of title 10, United States Code, to extend the term of office of the Chairman of the Joint Chiefs of Staff from 2 years to 4 years. This section would also limit the reappointment of the Chairman to additional terms only in a time of war, and limit the combined period of service of an officer serving as Chairman or Vice Chairman of the Joint Chiefs of Staff to 8 years.

The second provision (sec. 908) in the House amendment would amend section 153(a) of title 10, United States Code, which sets forth the functions of the Chairman of the Joint Chiefs of Staff, by codifying the Chairman's responsibility to provide advice to the President and the Secretary of Defense on ongoing military operations and to provide advice to the Secretary on the allocation and transfer of forces among combatant commands.

The House recedes with an amendment that would make certain changes to enhance the position of the other members of the Joint Chiefs as military advisors, extend the terms of the Chairman and the Vice Chairman to 4 years and ensure that such terms are staggered, outline the Chairman's role in planning, advice, global military integration, and ensure open communication between the combatant commands and the Chairman.

Organization of the Department of Defense for management of special operations forces and special operations (sec. 922)

The Senate bill contained a provision (sec. 923) that would amend sections 138 and 167 of title 10, United States Code, to modify the roles and responsibilities of the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict (ASD SOLIC) and the Commander of U.S. Special Operations Command (SOCOM).

The House amendment contained no similar provision.

The House recedes with an amendment that would make clarifying changes.

The conferees note that in recent years SOCOM has undergone significant change and the capabilities of special operations forces (SOF) have taken on critical importance for addressing the threat posed by violent extremist groups and other security challenges facing our nation. Since 2001, SOCOM's personnel numbers (civilian and military) have nearly doubled, its budget nearly tripled, and overseas deployments of SOF nearly quadrupled.

Under provisions included in the National Defense Authorization Act for Fiscal Year 1987 (Public Law 99-661), commonly referred to as the "Nunn-Cohen Amendment," the ASD SOLIC is tasked with the responsibility to provide "the overall supervision (including oversight of policy and resources) of special operations activities" and is identified as "the principal civilian advisor to the Secretary of Defense on special operations and low intensity conflict matters."

The provisions described above were intended to empower the ASD SOLIC to serve a hybrid role as: 1) the Department's lead civilian policy official for matters related to special operations and low intensity conflict; and 2) the "service secretary-like" civilian with responsibility for the oversight and advocacy of SOCOM and the organization, training, and equipping of SOF. However, the conferees believe the ASD SOLIC has been challenged in fulfilling their "service secretary-like" responsibilities for a number of reasons. For example, the ASD SOLIC's organizational location within the office of the Undersecretary of Defense for Policy (USD(P)) has resulted in the ASD SOLIC dedicating a preponderance of their time and resources to policy and operational issues, at the expense of their "service secretary-like" responsibilities. Additionally, other civilian offices with greater seniority within the Department exercise related and, at times, overlapping responsibilities for aspects of SOF oversight, thereby complicating the ASD SOLIC's primacy in such matters. Furthermore, the conferees understand that studies directed by the Department when the ASD SOLIC was created determined that appropriate staffing levels for the organization would require between 95 and 110 personnel. However, the office of the ASD

SOLIC is currently only staffed by approximately 60 military and civilian personnel, only 6 of whom are focused on tasks related to the oversight and advocacy of the organization, training, and equipping of SOF. Furthermore, the addition of responsibilities for the counter-narcotics programs, building partner capacity initiatives, and humanitarian and disaster relief efforts of the DOD have further stretched the resources available to the office since its creation.

The conferees intend for this provision to clarify and strengthen the original mandate provided by the Nunn-Cohen Amendment that established the ASD SOLIC. The provision is intended to facilitate the unique "service secretary-like" responsibilities of the ASD SOLIC by mirroring the administrative chain of command relationship between the service secretaries and the military services for issues impacting the special operations-peculiar (commonly referred to as Major Force Program-11) administration and support of SOCOM, including the readiness and organization of SOF, resources (including program planning, allocation, and execution) and equipment, and relevant civilian personnel matters. The provision shall not impact the operational chain of command for SOF activities or the "service-common" responsibilities of the military services including personnel and other matters that are not special operations-peculiar.

The conferees are mindful of the congressionally-directed reductions to headquarters staff, but believe that the "service secretary-like" mission of the ASD SOLIC should be more robustly resourced in order to rebalance the ASD SOLIC's lines of effort and fulfill its mandate under title 10, United States Code. The conferees also expect the codification of the Special Operations Policy and Oversight Council under this provision to improve the oversight and advocacy of SOF by integrating the efforts of the various functional offices with direct or tangential responsibilities for SOF issues, thereby partially mitigating the need for significant numbers of additional personnel.

Additionally, the conferees note that the President approved the transfer of the mission for synchronizing global Department of Defense operations for countering weapons of mass destruction (CWMD) from United States Strategic Command (STRATCOM) to United States Special Operations Command on August 4, 2016. According to the Secretary of Defense "Expediting the transfer of CWMD responsibilities will allow USSOCOM to assume leadership for synchronization of Department of Defense (DoD) efforts in this critical mission, which will include updating the DoD CWMD Campaign Plan and instituting a comprehensive mission assessment process. I recommend this course of action to best ensure consistent, focused, and strengthened CWMD

efforts across the Department and with our interagency and international partners." The conferees support the transfer of the CWMD global synchronization mission to SOCOM because it may ensure appropriate DOD and interagency attention for this critical mission, facilitate synchronization with counterterrorism and other transregional efforts, and strengthen the preparedness of U.S. Special Operations Forces to counter these threats. However, the conferees are concerned that the requirements to successfully implement this mission change may not be fully defined and understood at this time. The conferees believe that it is important to clearly define requirements for this mission transfer to ensure that resources needed by SOCOM to adequately carry out this mission are appropriately transferred and provided for across the future years defense program.

Therefore, not later than 90 days after enactment of this Act, the conferees direct the Secretary of Defense to submit to the congressional defense committees the implementation plan for the transfer of the CWMD global synchronization mission. The report should include: an identification of resources, authorities, personnel or capabilities needed for this mission, and plans to implement those in the future years defense program; identification of the responsibilities, organizations, personnel and capabilities to be transferred from Strategic Command, including those at the Defense Threat Reduction Agency, to SOCOM to support the mission; oversight responsibilities within the Office of the Secretary of Defense; dates and criteria for the initial operating capability and full operating capability milestones.

Establishment of Unified Combatant Command for Cyber Operations (sec. 923)

The House amendment contained a provision (sec. 911) that would establish a unified combatant command for cyber operations with the primary function to prepare cyber operations forces to carry out assigned missions.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees note transparency of U.S. Cyber Command operations, forces, and other activities is critical to oversight of the command by Congress. The conferees expect the quarterly cyber operations briefings, mandated by Title 10, United States Code, Section 484, to continue to serve as a forum for providing information to Congress on all offensive and significant defensive military operations in cyberspace carried

out by the unified combatant command in the preceding quarter and serve as mechanism for informing Congress of other activities of the command.

In establishing the unified combatant command for cyber operations, the conferees also expect the Secretary of Defense, in conjunction with the relevant agencies and entities within the Department of Defense, to establish formal procedures for notification to Congress of significant operations in cyberspace on a timely basis. The conferees also expect the Secretary to establish formal procedures for notification to Congress of other significant command activities, such as delegation of new authorities to the United States Cyber Command Commander for cyberspace operations by the Secretary of Defense and relevant policy and internal oversight decisions affecting activities of the command.

Assigned forces of the combatant commands (sec. 924)

The Senate bill contained a provision (sec. 1041) that would amend section 162 of title 10, United States Code, to require the secretaries of the military departments, at the direction of the Secretary of Defense, to assign forces under the jurisdiction of the secretaries concerned to the combatant commands to perform missions assigned to the combatant commands. Forces that are not so assigned shall remain under the direction and control of the respective military department secretaries for purposes of carrying out the secretaries' responsibilities under sections 3013, 5013, and 8013 including organizing, training, and mobilizing of all United States military forces.

The House amendment contained a similar provision (sec. 909).

The House recedes.

Modifications to the requirements process (sec. 925)

The Senate bill contained a provision (sec. 943) that would amend Section 181 of title 10, United States Code, to clarify and modify the joint and service-specific requirements process. This provision would ensure that the service chief of the relevant military service is responsible for all service-specific requirements, and Joint Requirements Oversight Council (JROC) validation is not required before commencing a service-specific acquisition program, except for a major defense acquisition program or a service-specific program designated for JROC oversight by the Chairman of the Joint Chiefs of Staff. Additionally, this provision would require the Chairman to determine whether a major defense acquisition program meets

joint requirements before the program or subprogram receives Milestone A approval or is otherwise initiated prior to Milestone B. The provision also would make the Vice Chairman of the Joint Chiefs of Staff the principal adviser to the Chairman on requirements.

The House amendment contained no similar provision.

The House recedes with an amendment that would modify the responsibilities of the JROC to focus on critical joint warfighting needs by: (1) determining gaps in joint military capabilities; (2) validating that proposed capabilities fulfill a gap; and (3) approving only joint performance requirements, such as interoperability or those involving more than one military service. The amendment would retain language from section 181 of title 10, United States Code, to clarify that the mission of the JROC shall include other matters assigned to it by the President or Secretary of Defense, and that the Chairman of the Joint Chiefs of Staff shall appoint members to the JROC who are recommended by the Secretaries of the military departments. The amendment would retain the Under Secretary of Defense (Comptroller) as an advisor to the JROC and broaden the base of analytic support that shall assist the JROC to include organizations within the Department that have operations research, systems analysis, and cost estimation expertise. The amendment also would modify definitions of joint military capabilities and performance requirements.

The amendment also would provide the JROC with authority to review performance requirements for other proposed or existing capabilities that the Chairman determines should be reviewed by the JROC. The conferees expect that this authority would be used only in limited situations, such as the review of proposed capabilities that may affect the joint force or an existing materiel capability solution that may no longer satisfy a previously identified gap. This authority should not supersede any other existing statutory or regulatory authority that pertains to the review and approval of requirements by other entities, such as the Missile Defense Agency or the authority to validate requirements provided to the Special Operations Command in Section 167 of title 10, United States Code.

Additionally, the amendment requires that the Secretary of Defense establish an investment review process, to be co-chaired by the Deputy Secretary of Defense and the Vice Chairman of the Joint Chiefs of Staff, to establish cost and fielding targets for new programs pursuant to section 2448a of this Act. To support establishment of cost and fielding targets, the amendment transfers from the JROC to the new investment review process the review of trade-offs among life-cycle cost, schedule, and performance objectives. The conferees direct the

Secretary to develop a plan for implementing this investment review process and to brief the defense committees on the elements of the plan no later than 6 months after enactment of the Act. In developing the plan, the conferees direct the Secretary to evaluate the Department's Analysis of Alternatives process for determining trade-offs and weapon system solutions in acquisition programs.

Assessments of combatant command structure (sec. 926)

The Senate bill contained a provision (sec. 924) that would direct the Secretary of Defense to initiate a pilot program on the organization of a unified combatant command by organizing the subordinate commands of such unified combatant command in the form of joint task forces.

The House recedes with amendments that clarify that the intent of the provision is to encourage effective use of the position, and to remove a requirement that any officer nominated to the position have significant interaction with the CIA within the five years prior to appointment. Therefore, the conferees see no alternative but to include legislation on the matter, and note that failure to use and report ACCMs accordingly will jeopardize future reauthorizations.

The conferees direct the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives, by not later than March 1, 2017, a report clarifying the retirement and benefit eligibility status of certain disabled veterans. The report will identify with particularity any differences in the "retired" status, or benefit eligibility status, for servicemembers who otherwise meet the current statutory standards for disability retirement, but who may not be retired owing to the timing of the enactment of disability retirement changes, particularly the enactment of sections 534 of the National Defense Authorization Act for Fiscal Year 1997 (Public Law 104-201) and 513 of the National Defense Authorization Act for Fiscal Year 1998 (Public Law 105-85) which redefined disability and retirement eligibility under section 1204 of title 10, United States Code. The conferees are aware that at least in some cases, veterans may have been separated for disability who now meet disability retirement eligibility.

Finally, the Secretary of Defense will identify the number of individuals who may be eligible for redesignation under the processes or procedures so identified.

The House recedes.

Administrative leave (sec. 1138)

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would provide that a Federal employee may not be placed on administrative leave for more than 10 work days in any calendar year, and authorize additional periods of administrative leave only for employees under investigation or in a notice period, subject to agency determination that the continued presence of the employee in the workplace poses a threat to other employees, evidence relevant to a pending investigation, Government property, or legitimate Government interests.

Direct hiring for Federal wage schedule employees (sec. 1139)

The Senate bill contained a provision (sec. 1132) that would direct the Director of the Office of Personnel Management

The House amendment contained no similar provision.

The Senate recedes.

The conferees remain concerned that the Department of Defense has difficulty accessing highly skilled non-veterans into its civilian labor force due to strict preference eligible hiring requirements, and believes that a detailed examination of Department of Defense preference eligible hiring practices is overdue. Therefore, the conferees direct the Secretary of Defense, in coordination with the Secretary of Labor, Secretary of Veterans Affairs, and the Director of the Office of Personnel Management to submit a report no later than May 1, 2017, to the Committees on Armed Services of the Senate and House of Representatives, the Committee on Homeland Security and Governmental Affairs of the Senate, and the Committee on Oversight and Government Reform of the House of Representatives. Such report shall consist of a coordinated overview of the Veterans preference process in Federal hiring and shall contain the following elements: (1) an analysis of how the current process of applying preference eligible points works in practice, including initial hires and the process as employees move and advance into new positions; (2) a review of positive impacts realized in the past five years of preference eligible hiring; (3) an analysis of the impact of preference eligible hiring on agencies' ability to hire qualified non-veteran applicants; (4) an analysis of the impact of preference eligible hiring on agencies' ability to hire qualified non-veteran recent

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

SUBTITLE A—ASSISTANCE AND TRAINING

One-year extension of logistical support for coalition forces supporting certain United States military operations (sec. 1201)

The House amendment contained a provision (sec. 1201) that would amend section 1234 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as most recently amended by section 1201 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), by authorizing the Secretary of Defense to provide supplies, services, transportation, and other logistical support to coalition forces supporting U.S. operations in the Republic of Iraq and the Islamic Republic of Afghanistan during fiscal year 2017.

The Senate bill contained no similar provision.

The Senate recedes.

Special Defense Acquisition Fund matters (sec. 1202)

The Senate bill contained a provision (sec. 1202) that would increase the obligation authority for the Special Defense Acquisition Fund.

The House amendment contained no similar provision.

The House recedes with an amendment that would require quarterly spending plans and annual inventories to ensure more regular and routine oversight and alignment of the use of such funds with security assistance priorities and national security objectives.

The amendment also requires that \$500.0 million of the Special Defense Acquisition Fund may only be used to procure and stock precision guided munitions that may be required by partner and allied forces to enhance the effectiveness of their contribution to overseas contingency operations conducted or supported by the United States. If necessary, the conferees

understand that nothing in this provision would preclude the Secretary of Defense from using precision guided munitions that have been procured and stocked using the Special Defense Acquisition Fund to meet immediate United States military requirements.

Codification of authority for support of special operations to combat terrorism (sec. 1203)

The Senate bill contained a provision (sec. 1203) that would establish a new section 127e in title 10, United States Code, to codify section 1208 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as most recently amended by section 1274 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92). The provision would increase the annual cap on the authority from \$85.0 million to \$100.0 million and would limit the amount available to support any particular military operation under the authority to \$10.0 million in a fiscal year as well as modify notification requirements.

The House amendment contained a similar provision that would modify and extend section 1208 of Public Law 108-375, as amended, for 3 years.

The House recedes with an amendment that would eliminate the limitation of \$10.0 million on support to any particular military operation in a fiscal year and make other clarifying changes to the reporting requirements associated with this authority.

The conferees express strong support for "section 1208" authority and its importance in countering threats posed by violent extremist groups. The conferees believe that the maturity of the authority, the need for predictability when working with foreign partner forces, and the enduring nature of the threats facing our nation support the codification of this authority. The conferees believe that an increase of the annual cap to \$100.0 million will provide for stability and sufficient flexibility to address unforeseen contingencies in future years.

The conferees expect the Department to exercise judicious use of the authority and conduct appropriate planning to preserve the flexibility afforded by the codification and expansion of this authority.

Furthermore, the conferees expect the Department to appropriately scope support provided under this authority to address operational requirements in support of defined counterterrorism missions. This authority should not be used solely for the purpose of building the capacity of or engagement with foreign partner forces. When operational requirements no

longer require the use of this tailored authority, support for foreign partner forces should be expeditiously terminated or transitioned to other authorities and funding sources that are more appropriately designed for longer-term, sustained capacity-building efforts.

Independent evaluation of Strategic Framework for Department of Defense security cooperation (sec. 1204)

The House amendment contained a provision (sec. 1206) that would require the Secretary of Defense to enter into an agreement with a federally funded research and development center, or another appropriate independent entity, with expertise in security cooperation to conduct an assessment of the Strategic Framework for Department of Defense Security Cooperation and submit a report to the congressional defense committees, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives not later than November 1, 2017, containing the assessment.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

Sense of Congress regarding an assessment, monitoring, and evaluation framework for security cooperation (sec. 1205)

The House amendment contained a provision (sec. 1207) that would express the sense of Congress that the Secretary of Defense should develop and maintain an assessment, monitoring, and evaluation framework for security cooperation with foreign countries to ensure accountability and foster implementation of best practices.

The Senate bill contained no similar provision.

The Senate recedes.

SUBTITLE B—MATTERS RELATING TO AFGHANISTAN AND PAKISTAN

Extension and modification of Commanders' Emergency Response Program (sec. 1211)

The Senate bill contained a provision (sec. 1201) that would extend through fiscal year 2019 the Commanders' Emergency Response Program (CERP) in Afghanistan under section 1201 of the National Defense Authorization Act for Fiscal Year 2012 (Public

Law 112-81) as amended. The provision would also expand the authorization to make certain payments to redress injury and loss in Iraq in accordance with section 1211 of the National Defense Authorization Act for Fiscal Year 2016 to Afghanistan and Syria.

The House amendment contained a similar provision (sec. 1211).

The Senate recedes with a technical amendment.

Extension of authority to acquire products and services produced in countries along a major route of supply to Afghanistan (sec. 1212)

The Senate bill contained a provision (sec. 883) that would amend section 801(f) of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84) to extend by 2 years the authority to acquire products and services produced in countries along the major route of supply to Afghanistan.

The House amendment contained a similar provision (sec. 1213) that would extend the authority by 1 year.

The House recedes.

Extension and modification of authority to transfer defense articles and provide defense services to the military and security forces of Afghanistan (sec. 1213)

The Senate bill contained a provision (sec. 1211) that would extend through December 31, 2017, the authority under section 1222 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to transfer defense articles being drawn down in Afghanistan, and to provide defense services in connection with such transfers, to the military and security forces of Afghanistan. The provision would also extend through fiscal year 2017 the exemption for excess defense articles (EDA) transferred from Department of Defense stocks in Afghanistan from counting toward the annual limitation on the aggregate value of EDA transferred under section 516 of the Foreign Assistance Act of 1961 (Public Law 87-195). The provision would also convert certain quarterly reports into an annual report.

The House amendment contained a similar provision (sec. 1241).

The House recedes.

Special immigrant status for certain Afghans (sec. 1214)

The House amendment contained a provision (sec. 1216) that would extend the authorization for the Afghan Special Immigrant Visa (SIV) program for one year and narrow the eligibility requirements for Afghan SIV candidates.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment that would modify eligibility requirements for applicants to include those that perform sensitive and trusted activities for the United States Government in Afghanistan; extend the underlying SIV program for four additional years; and provide an additional 1,500 visas. The conferees believe that any Afghan performing sensitive and trusted activities for or on the behalf of the United States Government should be eligible for the Special Immigrant Visa program.

Modification to semiannual report on enhancing security and stability in Afghanistan (sec. 1215)

The House amendment contained a provision (sec. 1217) that would add the requirement for an assessment of the implementation of the Afghan Personnel and Pay System to the report on enhancing the strategic partnership between the United States and Afghanistan.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

Prohibition on use of funds for certain programs and projects of the Department of Defense in Afghanistan that cannot be safely accessed by United States Government personnel (sec. 1216)

The Senate bill contained a provision (sec. 1213) that would prohibit the obligation or expenditure of amounts available to the Department of Defense for a construction or other infrastructure program or project in Afghanistan unless certain conditions are met. The provision also provides for certain waivers.

The House amendment contained no similar provision.

The House recedes with an amendment that would provide for an additional waiver by the Commander of the Combined Security Transition Command - Afghanistan for projects greater than \$1.0 million, but less than \$20.0 million.

Improvement of oversight of United States Government efforts in Afghanistan (sec. 1217)

The Senate bill contained a provision (sec. 1215) that would require the Lead Inspector General for Operation Freedom's

Sentinel, in coordination with certain other inspectors general, to submit a report on oversight activities in Afghanistan to optimize the utilization of oversight resources through planning, coordination, and reduction of redundancies in oversight activities.

The House amendment contained no similar provision.

The House recedes with an amendment that would add the requirement to report on the professional standards used by inspectors general to ensure the accuracy, precision, and overall quality of the products they publish regarding Afghanistan.

The conferees note that inspectors general play a crucial role in helping to ensure appropriate oversight and efficient use of federal resources in challenging environments, including Afghanistan. The conferees believe the Inspectors General operating in Afghanistan should work together to ensure appropriate oversight occurs at all levels, with minimal burden to U.S. military operations, diplomatic efforts and developmental projects. The conferees urge additional efforts to optimize coordination and to maximize the use of professional standards among inspectors general in Afghanistan to ensure the most efficient and effective use of oversight resources.

Extension and modification of authority for reimbursement of certain coalition nations for support provided to United States military operations (sec. 1218)

The Senate bill contained a provision (sec. 1214) that would provide the Secretary of Defense the authority to reimburse Pakistan up to \$800.0 million in fiscal year 2017 for certain activities that enhance the security situation in the northwest regions of Pakistan and along the Afghanistan-Pakistan border. The provision would also make \$300.0 million of this amount contingent upon a certification from the Secretary of Defense that Pakistan is taking demonstrable steps against the Haqqani Network in Pakistan. The Senate bill also contained a companion provision (sec. 1212) that would extend and modify the authority for reimbursement of coalition nations in support of U.S. operations in Iraq and Afghanistan to include Syria.

The House amendment contained a similar provision (sec. 1212) that would extend the authority for reimbursement of coalition nations for support provided to the United States for military operations in Iraq and Afghanistan through December 31, 2017. The provision would make \$1.1 billion in funding available for the overall coalition support funds program, including up to \$900.0 million for reimbursement of Pakistan. The provision would also make \$450.0 million of this amount contingent upon a

certification from the Secretary of Defense that Pakistan is taking demonstrable steps against the Haqqani Network in Pakistan.

The Senate recedes with an amendment to merge the three provisions into one provision. The revised provision would extend the authorization of the coalition support funds program for reimbursement of nations in support of U.S. operations in Iraq and Afghanistan. The provision would expand the authorization to include support for operations in Syria and would retain the authority to provide such reimbursement to Pakistan. In addition, the provision would include a modified list of security enhancement activities for which Pakistan would be eligible for reimbursement.

The provision authorizes \$1.1 billion for the overall coalition support funds program, including up to \$900.0 million for Pakistan. Of this amount, the provision would make \$400.0 million contingent upon a certification from the Secretary of Defense that Pakistan is taking demonstrable steps against the Haqqani Network in Pakistani territory.

The conferees remain concerned about the persecution of groups seeking political or religious freedom in Pakistan, including the Balochi, Sindhi, and Hazara ethnic groups, as well as religious groups, including Christian, Hindu, and Ahmadiyya Muslim. Consequently, the conferees believe that the Secretary of Defense should continue to closely monitor the provision of U.S. security assistance to Pakistan and ensure that Pakistan is not using its military or any assistance provided by the United States to persecute minority groups.

In addition, the conferees note that the renewed authority allows for reimbursement of Pakistan for security activities along the Afghanistan-Pakistan border, including providing training and equipment for the Pakistan Frontier Corps Khyber Pakhtunkhwa. However, the conferees are concerned that Pakistan continues to delay or deny visas for U.S. personnel that could assist with the provision of such training. Given this situation, the conferees recommend that the Department of Defense condition reimbursements for training and equipment with appropriate access by U.S. personnel.

The conferees note that while the pilot program for stability activities in the Federally Administered Tribal Areas that was authorized under Section 1212 of the National Defense Authorization Act for Fiscal Year 2016 (P.L.114-92) would not be specifically reauthorized by this provision, the activities covered by the pilot program would be eligible for reimbursement under the modifications made by this provision. The conferees also note that coalition support funds appropriated by the Consolidated Appropriations Act of 2016 (P.L.114-113) remain

eligible for obligation for two fiscal years. As a result, the conferees expect that the Department of Defense will continue activities under the pilot program through the end of fiscal year 2017.

SUBTITLE C—MATTERS RELATING TO SYRIA, IRAQ, AND IRAN

Modification and extension of authority to provide assistance to the vetted Syrian opposition (sec. 1221)

The Senate bill contained a provision (sec. 1221) that would extend and modify the authority under section 1209 of the Carl Levin and Howard P. 'Buck' McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291; 128 Stat. 3541) to assist the vetted elements of the Syrian opposition for certain purposes to December 31, 2019, as well as strike the prior approval reprogramming requirement and replace it with a notification requirement before carrying out new initiatives.

The House amendment contained a similar provision (sec. 1221) that would extend the authority for one year and add certain certification requirements.

The Senate recedes with an amendment that would extend the authority through December 31, 2018, maintain the reprogramming requirement, and strike the certification requirements.

Modification and extension of authority to provide assistance to counter the Islamic State of Iraq and the Levant (sec. 1222)

The Senate bill contained a provision (sec. 1222) that would extend the authority under section 1236 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291; 128 Stat. 3559) to military and other security forces of or associated with the Government of Iraq, including Kurdish and tribal security forces, with a national mission, to counter the Islamic State in Iraq and the Levant (ISIL) to December 31, 2019.

The House amendment contained a similar provision (sec. 1222) that would extend the authority to December 31, 2017.

The House recedes with an amendment that would extend the authority through December 31, 2018.

The conferees direct the Secretary of Defense in coordination with the Secretary of State to brief the congressional defense committees, the Senate Foreign Relations Committee, and the House Foreign Affairs Committee, not later

than 90 days after the enactment of this Act, on the campaign to liberate Mosul, Iraq from the control of ISIL. The briefing on the campaign to liberate Mosul shall also contain the plan to hold Mosul after liberation and include a detailed blueprint on how humanitarian, reconstruction, and stabilization assistance will be provided to support a follow on governance structure.

The conferees note the importance of the provision of up to \$480 million in stipends and sustainment through the Government of Iraq to the Iraqi Kurdish Peshmerga and urge the Secretary of Defense, in coordination with the Secretary of State, to provide such assistance through the Government of Iraq to Sunni tribal security forces and other local security forces with a national security mission. The conferees remind the Secretaries that local security forces with a national security mission may include, in addition to Sunni tribal elements, local security forces that are committed to protecting highly vulnerable ethnic and religious communities, such as Yazidi, Christian, Assyrian, and Turkoman communities, against the ISIL threat.

Extension and modification of authority to support operations and activities of the Office of Security Cooperation in Iraq (sec. 1223)

The Senate bill contained a provision (sec. 1223) that would extend through fiscal year 2017 the authority under section 1215 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81) as amended, for the Secretary of Defense to support the operations and activities of the Office of Security Cooperation in Iraq (OSC-I).

The House amendment contained a similar provision (sec. 1223) that would extend the authority for OSC-I for one year through fiscal year 2017 and authorize the Secretary of Defense to conduct training with the Iraqi Border Police.

The Senate recedes with an amendment that would extend the authority through fiscal year 2017.

The conferees direct the Secretary of Defense and the Secretary of State to submit to the congressional defense committees, the Senate Foreign Relations Committee, and the House Foreign Affairs Committee, a plan to transition the activities conducted by OSC-I but funded by the Department of Defense to another entity or transition the funding of such activities to another source not later than the end of fiscal year 2018.

Limitation on provision of man-portable air defense systems to the vetted Syrian opposition during fiscal year 2017 (sec. 1224)

The House amendment contained a provision (sec. 1229) that would prohibit the funds authorized to be appropriated or otherwise made available for the Department of Defense for fiscal year 2017 to be obligated or expended to transfer or facilitate the transfer of man-portable air defense systems (MANPADs) to any entity in Syria.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense and Secretary of State to notify the congressional defense committees, the Senate Foreign Relations Committee, and the House Foreign Affairs Committee should a determination be made to provide MANPADs to elements of the appropriately vetted Syrian opposition. The conferees expect that should such a determination be made, the requirement for the provision of such a capability and the decision to provide it would be thoroughly vetted by and receive broad support from the interagency.

Modification of annual report on military power of Iran (sec. 1225)

The Senate bill contained a provision (sec. 1226) that would add additional elements concerning cyber capabilities to the annual report on the military power of Iran required under section 1245 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84).

The House amendment contained a similar provision (sec. 1253).

The Senate recedes with a technical amendment.

Quarterly report on confirmed ballistic missile launches from Iran (sec. 1226)

The House amendment contained a provision (sec. 1259S) that would require the President to notify Congress within 48 hours of a suspected ballistic missile launch, including a test, by Iran. The President shall further notify Congress of the entities involved in the launch and a description of the steps the President will take in response to the launch, including diplomatic efforts and the imposition of unilateral sanctions.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would replace the house provision with the requirement for a quarterly report to Congress by the Director of National Intelligence describing any confirmed ballistic missile launches by Iran. An additional quarterly report to Congress from the Secretary of State and the Secretary of Treasury is required setting forth a description of

the efforts, if any, to impose unilateral sanctions against entities or individuals in connection with a confirmed ballistic missile launch from Iran and any diplomatic efforts to impose multilateral sanctions.

SUBTITLE D—MATTERS RELATING TO THE RUSSIAN FEDERATION

Military response options to Russian Federation violation of INF Treaty (sec. 1231)

The House amendment contained a provision (sec. 1232) that would withhold \$10.0 million of funding for the Department of Defense to provide support services to the Executive Office of the President until the Secretary of Defense submits to the appropriate congressional committees a plan for the development of military capabilities in response to the Russian Federation non-compliance with its obligations under the INF Treaty, as required by section 1243(d) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92; 129 Stat.1062).

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would drop section (a)(1) from the House provision. The conferees note that the plan contained in the report previously submitted to Congress, pursuant to the above Public Law, was insufficient and failed to address adequately the military response options that were outlined in congressional testimony presented by Mr. Brian McKeon, Deputy Under Secretary of Defense for Policy. For example, in testimony to the House Armed Services Committee on December 10, 2014, Mr. McKeon stated: "The range of options we are looking at in the military sphere fall into three broad categories: Active defenses to counter intermediate-range ground-launched cruise missiles; counterforce capabilities to prevent intermediate-range ground-launched cruise missile attacks; and countervailing strike capabilities to enhance U.S. or allied forces." The conferees note that nothing in this provision is intended to direct testing or deployment of systems that would cause the United States to violate the INF Treaty.

Limitation on military cooperation between the United States and the Russian Federation (sec. 1232)

The House amendment contained a provision (sec. 1233) that would prohibit funds authorized to be appropriated or otherwise

made available by this Act through fiscal year 2017 from being used for bilateral military-to-military contact between the United States and the Russian Federation without certain certifications by the Secretary of Defense, in consultation with the Secretary of State, or unless certain waiver conditions are met.

The Senate bill contained no similar provision.
The Senate recedes.

Extension and modification of authority on training for Eastern European national military forces in the course of multilateral exercises (sec. 1233)

The Senate bill contained a provision (sec. 1232) that would extend through fiscal year 2019 the authority under section 1251 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) for the Secretary of Defense to provide multilateral or regional training, and pay the incremental expenses of participating in such training, for countries in Eastern Europe that are a signatory to the Partnership for Peace Framework Documents but not a member of the North Atlantic Treaty Organization (NATO) or became a NATO member after January 1, 1999. The provision would also add the authority to utilize under this section amounts authorized to be appropriated for certain purposes under the European Deterrence Initiative.

The House amendment contained no similar provision.

The House recedes with an amendment that would extend the authority through fiscal year 2018 and pay the incremental expenses incurred by a country as a result of national security forces participation in certain types of training. The conferees note that the purpose of such training is to promote interoperability, improve the ability of participating countries to respond to external threats including from hybrid warfare, and increase the ability of NATO to take collective action when required.

The conferees note the importance of regular updates on the status and effectiveness of the implementation and planned use of the authority and direct the Secretary of Defense to brief, not later than 120 days after the enactment of this Act, the Committees on Armed Services of the Senate and the House of Representatives on the overall strategy to increase capabilities and develop key participants' skills under this authority, the expenditure of funds under this authority to date, and planned future activities, including the types of national security forces trained or planned to be trained under this authority.

Prohibition on availability of funds relating to sovereignty of the Russian Federation over Crimea (sec. 1234)

The House amendment contained a provision (sec. 1236) that would prohibit funds authorized to be appropriated or made available by this Act through fiscal year 2017 for the Department of Defense to implement any activity that recognizes the sovereignty of the Russian Federation over Crimea. The provision included a waiver if the Secretary of Defense, with the concurrence of the Secretary of State, determines that to do so would be in the national security interest of the United States and submits a notification of the waiver to certain Congressional committees.

The Senate bill contained no similar provision.
The Senate recedes.

Annual report on military and security developments involving the Russian Federation (sec. 1235)

The Senate bill contained a provision (sec. 1233) that would add additional elements to the annual report on Russian military and security developments required under section 1245 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291) including an assessment of Russian operations in Ukraine and an analysis of the nuclear strategy and associated doctrine of Russia.

The House amendment contained a similar provision that would require reporting on the Russian Federation's foreign military deployments.

The House recedes with an amendment that would add the Russian Federation's foreign military deployments, including significant deployments of naval vessels to foreign countries, to the annual report.

Limitation on use of funds to vote to approve or otherwise adopt any implementing decision of the Open Skies Consultative Commission and related requirements (sec. 1236)

The Senate bill contained a provision (sec. 1079) that would require the Secretary of Defense to submit to the appropriate committees of Congress, an annual report on observation flights over the United States under the Open Skies Treaty during the previous year.

The House amendment contained a similar provision (sec. 1231) that would limit funds that may be used to approve or permit approval of a request by the Russian Federation to carry

out observation flights with an aircraft that has installed an upgraded sensor with infrared or synthetic aperture radar capability over the United States or the territory covered in the Open Skies Treaty, unless the administration can certify certain conditions.

The Senate recedes with an amendment that would limit funding that may be used to vote to approve or otherwise adopt any implementing decision of the Open Skies Consultative Commission to authorize approval of requests by state parties to the Treaty of infrared or synthetic aperture radars, pursuant to the Open Skies Treaty, unless and until the Secretary of Defense, jointly with the relevant U.S. government officials, submits to the appropriate congressional committees a certification that such implementing decision would not be detrimental or otherwise harmful to the national security of the United States, and submits a report.

Further, not later than 90 days prior to when the U.S. votes to approve or otherwise adopt any implementing decision, the Secretary of State shall submit to Congress certain certifications. If the Secretary is unable to make these certifications, the Secretary must submit a report to Congress explaining why it is in the national interest of the U.S. to vote to approve or otherwise adopt such implementing decision.

The amendment also requires a quarterly report by certain government officials evaluating Open Skies Treaty overflights of the United States by the Russian Federation.

The amendment further states that not more than 65-percent of the funds authorized for fiscal year 2017 may be used to carry out any activities to implement the Open Skies Treaty until the Director of National Intelligence and the Director of the National Geospatial-Intelligence Agency submit an evaluation of whether it is possible, consistent with U.S. national security interests, to substitute commercial imagery or other phenomenologies for such data generated by Treaty overflights. The amendment further limits the funding until the Secretary of State submits a report on cost of implementing the Open Skies Treaty and on impact on participation and contributions by covered state parties and relationships among covered state parties.

Extension and enhancement of Ukraine Security Assistance Initiative (sec. 1237)

The Senate bill contained a provision (sec. 1231) that would extend through fiscal year 2019 the authority under section 1250 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) for the Secretary of

Defense, in coordination with the Secretary of State, to provide security assistance and intelligence support to military and other security forces of the government of Ukraine. The provision would authorize the use of up to \$500.0 million in fiscal year 2017 to provide security assistance to Ukraine. The provision would prohibit the obligation or expenditure of half of the funds authorized to be appropriated in fiscal year 2017 under this authority until the Secretary of Defense, in coordination with the Secretary of State, certifies that Ukraine has taken substantial action to make defense institutional reforms and outlines areas where further work may remain.

The House amendment contained a similar provision (sec. 1235) that would make conforming changes of a non-substantive nature to section 1250 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92).

The House recedes with an amendment that would extend the authority through December 31, 2018, and authorize the use of up to \$350 million in fiscal year 2017 to provide security assistance to Ukraine. The provision would limit the obligation or expenditure of funds to \$175 million of the funds authorized to be appropriated in fiscal year 2017 until a certification is made that Ukraine has taken substantial action on defense institutional reforms.

The conferees remain deeply concerned by the continuing aggression of Russia and Russian-backed separatists that violate ceasefire agreements and as such, continue to emphasize the fundamental importance of providing security assistance and intelligence support, including lethal military assistance, to the Government of Ukraine to build its capacity to defend its territory and sovereignty.

The conferees are concerned that progress in the area of defense institutional reform has been slow and uneven and note that such reforms are critical to sustaining capabilities developed using security assistance. Such reforms are critical to the long-term stability and security of Ukraine. The conferees welcome the signing of the Partner Concept document between the United States and Ukraine as well as the appointment of a senior advisor to the Ukrainian government and encourage further progress on institutional reform efforts.

SUBTITLE E—REFORM OF DEPARTMENT OF DEFENSE SECURITY COOPERATION

Enactment of new chapter for defense security cooperation (sec. 1241)

The Senate bill contained a provision (sec. 1252) that would create a new chapter in title 10, United States Code, on security cooperation, and would transfer, modify, and codify security cooperation-related provisions from elsewhere in title 10 and public law to this new chapter.

The House amendment contained a similar provision (sec. 1261).

The House recedes with amendments that would make several modifications, including to: 1) narrow the scope of the authority for the Department to provide assistance to build the capacity of a friendly foreign nation to conduct specified military operations, modify the availability of funds for such purposes, and change notification requirements; 2) preserve the existing authority for the Department of Defense (DOD) to operate five Regional Centers for Security Studies; 3) require the Secretary of Defense to designate an individual and office at the Under Secretary of Defense-level or below with responsibility for oversight of strategic policy and guidance and responsibility for overall resource allocation for security cooperation programs and activities of the Department; and 4) authorize the Department to provide support to other departments and agencies of the United States Government for the purpose of implementing or supporting foreign assistance programs and activities that advance security cooperation objectives.

The conferees note that over the last 15 years, the Department of Defense's engagement with national security forces of friendly foreign countries has expanded in response to changing strategic requirements. Correspondingly, the number and complexity of authorities and associated funding provided to the Department to conduct security cooperation programs has expanded, resulting in security cooperation authorities being dispersed throughout title 10 and public law. This architecture has led to a confusing and unwieldy security cooperation enterprise that undermines the ability of the Department--particularly its senior civilian and military leaders--to prioritize, plan, synchronize, execute, allocate resources, and oversee activities. The current situation has also resulted in frequent changes for the security cooperation professionals attempting to implement security cooperation programs and activities. This has contributed to suboptimal outcomes and missed opportunities. Further, the conferees believe the complex patchwork of authorities and sources of funding hinders appropriate congressional and public transparency and complicates robust congressional oversight of a key mission for the Department.

As such, the conferees believe that consolidating the various security cooperation authorities under a single security

cooperation chapter in title 10 will provide greater clarity and consistency about the nature and scope of DOD's security cooperation programs and activities to those who plan, manage, implement, and conduct oversight of these programs. The conferees note that the functional areas in which the Department is authorized to provide assistance under this provision are consistent with existing focus areas of the Department's 'train and equip' programs. The conferees also note that authority to provide assistance to build the capacity of friendly foreign countries to conduct military intelligence operations already exists, because the Department's existing authorities include support functions, and intelligence operations frequently act in that capacity. The inclusion of intelligence operations is intended solely to clarify that the Department may conduct such activities either as a supporting activity for other operations or as a stand-alone operation, and it is not meant to suggest that other activities that support or enable programs providing training and equipment to foreign forces (such as logistics or communications activities) are not permitted under existing authorities.

Additionally, for the purposes of executing programs and activities in the new security cooperation chapter in title 10, funds available to DOD for security cooperation may be used prior to the submission of a consolidated security cooperation budget as required by section 1249 of this subtitle.

Moreover, consolidation of a single 'train and equip' authority will ensure that the Department has flexibility to meet its evolving strategic objectives, without being forced to bend its strategy to meet the contours of available tailored authorities. The conferees do not intend for the consolidation to create a DOD mission that competes with security assistance overseen by the Department of State. Rather, a consolidated 'train and equip' authority should enable the Department to meet its own defense-specific objectives in support of broader defense strategy and plans, as well as to better integrate title 10 security cooperation activities into the broader United States Government approach to security sector assistance. To that end, the conferees note that the provision would increase coordination between the Department of Defense and the Department of State in the planning and implementation of security sector assistance programs by requiring the Secretary of Defense and the Secretary of State to jointly develop and plan 'train and equip' programs as well as to coordinate the implementation of such programs and ensure robust end-use monitoring of provided assistance. The conferees believe that the Department of Defense and the Department of State should have greater visibility into the planning, programming, and

execution of each organization's security sector assistance programs and activities and urge both Departments to enhance visibility and collaboration on such programs early in the planning process and through execution so as to avoid unnecessary duplication and enhance overall unity of effort.

Additionally, the conferees are concerned that the existing process for coordination between the two Departments on security sector assistance programs is too ad-hoc in nature and often elevates responsibility for such coordination, particularly those activities requiring concurrence, to the senior-most echelons of the respective organizations - to include the Deputy Secretary or Secretary level - resulting in a cumbersome and time-intensive process. Therefore, the provision would require the Secretary of Defense and the Secretary of State to designate individuals at the lowest possible level in their respective organizations with responsibility for such coordination.

The conferees note that the Department's security cooperation activities over the last 15 years have emphasized building the capacity of partner forces at the tactical and operational level. However, the conferees are concerned that insufficient attention and resources have been provided for building institutional capacity at higher echelons, particularly the generating force (e.g. those with 'man, train, and equip' responsibilities) and at the strategic level (e.g. ministerial and general staff levels). The conferees expect the Department to increase its emphasis on strengthening the defense institutions of friendly foreign nations as it builds security cooperation programs and activities and expects proposals submitted to Congress to include a robust defense institution building component. Moreover, the conferees expect the Department to take advantage of the simplified framework of security cooperation authorities adopted in this section to develop security cooperation programs that integrate activities to simultaneously engage partners and build capacity at each of these levels - tactical, operational, and strategic.

Additionally, the conferees note the importance of sustaining capabilities provided to friendly foreign nations, particularly equipment, to the long-term success of DOD's security cooperation programs and activities. As such, the conferees expect that there is a plan to transition sustainment support from DOD to other sources of funding, such as foreign countries' national funds, will be part of each security cooperation program.

In addition to the cumbersome, confusing, and complex patchwork of authorities and funding sources, the Department's organizational structure for the security cooperation enterprise

has undermined the ability of senior Department officials to adequately oversee, prioritize, and synchronize security cooperation programs and activities to support strategic priorities. Currently, there is no individual or office below the Deputy Secretary of Defense with responsibility to oversee strategic policy and resource allocation for the security cooperation enterprise. Instead, such responsibility spans multiple components and offices at the level of Under Secretary. Therefore, the provision would require the Secretary to assign responsibility for the oversight of strategic policy and guidance and responsibility for overall resource allocation for security cooperation programs and activities of the Department of Defense to a single official and office in the Office of the Secretary of Defense at the level of Under Secretary or below. The conferees intend for this individual and office to better synchronize planning and programs across the regional and functional components of the Department and ensure that such activities and resources are appropriately aligned with strategic priorities. Further, the conferees expect that this arrangement will empower the Department to prioritize resources and consider trade-offs across the full range of security cooperation programs and funding sources. Additionally, the provision would assign responsibility for the execution and administration of all security cooperation programs and activities of the Department of Defense involving the provision of defense articles, military training, and other defense-related services by grant, loan, cash sale, or lease to the Director of the Defense Security Cooperation Agency. This assignment of responsibility is meant to help the Department overcome the distortions, lack of coordination, and duplication that occurs across the Department's security cooperation enterprise, arising from narrowly-focused program offices found throughout the Office of the Secretary of Defense, the Joint Staff, Military Departments, Combatant Commands, and the defense agencies.

The provision would preserve the five Department of Defense Regional Centers for Security Studies. The provision would also require the Secretary to review, on an annual basis, the program and structure of each Regional Center in order to ensure that they are appropriately aligned with the strategic priorities of the Department. The conferees intend for the Regional Centers to more closely align activities with the requirements of DOD, and to serve as an effective tool to advance clearly defined security cooperation objectives in direct support of defense strategy.

The conferees note that, despite the marked increase in DOD security cooperation programs and activities over the last

15 years, the Department has not applied sufficient emphasis and resources to develop a comprehensive framework to assess, monitor, and evaluate its security cooperation programs and activities from inception to completion. Instead, the conferees believe that the Department has focused on assessments of partner nation capability gaps at the beginning of assistance programs rather than over the life cycle of the program, which has undermined the Department's ability to measure outcomes against objectives. Sufficient attention must be given to the implementation of programs with continuous robust evaluation to gauge whether programs and activities are meeting or have met defined objectives. The conferees expect the Department to allocate sufficient resources to its assessment, monitoring, and evaluation program, and to apply lessons learned from the program to improve and reshape security cooperation programs and activities to maximize effectiveness and efficiency.

Further, in this context, the conferees believe the Department's security cooperation data systems should provide an enterprise-wide view of security cooperation activities to facilitate best practices and enable strategic decision-making. In addition to basic data about security cooperation programs, the system should support the distribution of lessons-learned, including the activities' goals and history of development, and inform future activities and resource allocation. The conferees note the current limitations of the Global Theater Security Cooperation Management information Systems (G-TSCMIS) program and encourage the Department to review the use and functionality of G-TSCMIS at all user levels. The Department should further consider measures to promote more wide-spread and regular use of G-TSCMIS and ensure that processes and system functionality appropriately collects, stores, integrates, and distributes information Department-wide.

Military-to-military exchanges (sec. 1242)

The Senate bill contained a provision (sec. 1253) that would combine existing security cooperation authorities permitting the exchange of military and defense personnel with allies of the United States and other friendly foreign countries.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

The conferees encourage the Department to make more effective use of exchanges of military and defense personnel as important elements of broader security cooperation efforts, particularly with regard to building partner operational capacity or strengthening the management functions of partner

defense institutions. Such exchanges offer opportunities for U.S. military and civilian personnel to mentor foreign counterparts, share relevant operational concepts, and assess how well previous assistance has been employed and sustained. Meanwhile, foreign exchange officers can obtain valuable on-the-job training working among their U.S. counterparts and improve their understanding of U.S. military organizations and operations, contributing to deeper interoperability. Such exchanges should be planned with these advantages in mind, in integration with other security cooperation activities and authorities.

Consolidation and revision of authorities for payment of personnel expenses necessary for theater security cooperation (sec. 1243)

The Senate bill contained a provision (sec. 1254) that would consolidate and modify similar authorities permitting the payment of personnel expenses of allied or partner countries during theater security cooperation activities.

The House amendment contained no similar provision.
The House recedes with a technical amendment.

Transfer and revision of certain authorities on payment of expenses of training and exercises with friendly foreign forces (sec. 1244)

The Senate bill contained a provision (sec. 1255) that would combine and modify similar authorities for paying for the expenses of partner nations when conducting training with U.S. Armed Forces and for the expenses of developing countries when participating in exercises.

The House amendment contained a similar provision (sec. 1202) that would extend the authority in section 1203 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) for training of general purpose forces of the United States Armed Forces with military and other security forces of friendly foreign countries to December 31, 2019.

The House recedes with an amendment that would combine and modify similar authorities for paying for the expenses of partner nations when conducting training with U.S. Armed Forces and for the expenses of developing countries when participating in exercises. The provision would also transfer section 2011 of title 10, United States Code to the new chapter 16 on security cooperation created elsewhere in this Act.

The conferees note that the transfer of section 2011 of title 10, United States Code to the new chapter 16 is part of a

broader effort to consolidate and simplify authorities related to security cooperation. The conferees do not intend for this transfer to negatively impact administration of Special Operations Forces Joint Combined Exchange and Training Program by the Commander, United States Special Operations Command, which remains a standalone authority within the new chapter.

Transfer and revision of authority to provide operational support to forces of friendly foreign countries (sec. 1245)

The Senate bill contained a provision (sec. 1256) that would consolidate and modify section 127d of title 10, United States Code, section 1207 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), and section 1234 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181), as amended, relating to the provision of operational support to partners and allies in combined operations with U.S. Armed Forces, in military operations that support U.S. national security interests, or in support of U.S. operations in Iraq and Afghanistan.

The House amendment contained no similar provision.

The House recedes with technical amendment.

Department of Defense State Partnership Program (sec. 1246)

The Senate bill contained a provision (sec. 1257) that would codify the Department of Defense State Partnership Program (section 1205 of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66), as amended by section 1203 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92)).

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Transfer of authority on regional defense combating terrorism fellowship program (sec. 1247)

The Senate bill contained a provision (sec. 1258) that would transfer to the new chapter 16 on security cooperation in title 10, United States Code, the regional combating terrorism fellowship program (section 2249c of title 10, United States Code) and modify the program to authorize the Secretary of Defense to carry out a program under which the Secretary may pay costs associated with the education and training of national-level security officials of friendly foreign nations.

The House amendment contained no similar provision.

The House recedes with an amendment that would transfer the underlying authority for the regional combating terrorism fellowship program to the new chapter 16 on security cooperation and would make a technical modification to the reporting requirement.

Consolidation of authorities for service academy international engagement (sec. 1248)

The Senate bill contained a provision (sec. 1259) that would amend Chapter 16 of title 10, United States Code, to consolidate international engagement authorities for the service academies of the Army, Navy, and Air Force.

The House amendment contained no similar provision.

The House recedes.

The conferees note that under current law, there are nine separate authorities that determine the selection of, funding for, and conditions for international students attending the service academies of the Army, Navy, or Air Force. The conferees believe consolidating these authorities would provide consistency by creating a single, common authority for use by the service academies to select international students and conduct exchange programs with foreign military academies.

Consolidated annual budget for security cooperation programs and activities of the Department of Defense (sec. 1249)

The Senate bill contained a provision (sec. 1262) that would require the budget of the President for each fiscal year after fiscal year 2018, as submitted to Congress by the President pursuant to section 1105 of title 31, United States Code, to include as a separate item the amounts requested for the Department of Defense (including those funds in the budgets of the military departments) for such fiscal year for all security cooperation programs and activities of the Department, including the specific amounts, if any, and the specific country or region, to the maximum extent practicable, for such programs and activities.

The House amendment contained no similar provision.

The House recedes with a technical amendment.

Consistent with the creation of the new chapter 16 on security cooperation and the consolidation of the Department of Defense's security cooperation funding and related authorities, this provision is intended to enhance the ability of the congressional defense committees to conduct oversight of the Department's security cooperation programs and activities, including those undertaken by the military services; to

understand better how the Department plans, programs, and prioritizes its security cooperation programs and activities to fill gaps in its contingency plans; to enable foreign partners against a common threat or enemy; and to align resources with the Department's strategic objectives. This approach is also intended to better enable public transparency.

Department of Defense security cooperation workforce development (sec. 1250)

The Senate bill contained a provision (sec. 1263) that would direct the Secretary of Defense to create a Department of Defense security cooperation workforce development program to oversee the development and management of a professional workforce supporting security cooperation programs of the Department of Defense as well as the execution of security assistance programs and activities under the Foreign Assistance Act and the Arms Control Act by the Department of Defense.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Despite the increasing emphasis on security cooperation to further its strategic objectives, the conferees are concerned that the Department of Defense - whether in implementing State Department programs or its own programs - has not devoted sufficient attention and resources to the development, management, and sustainment of the Department's security cooperation workforce to ensure effective assessment, planning, monitoring, execution, evaluation, and administration of security cooperation programs and initiatives. As a result of this inattention, security cooperation initiatives are not always planned and implemented in such a way as to most effectively advance national security objectives, and the Military Departments are left to pursue their unique service objectives, which may not always align with broader foreign policy objectives or integrate with Department of Defense efforts. The conferees are also concerned about the lack of standardization in the organization of the security cooperation workforce within the Military Departments.

Finally, the conferees believe that security cooperation outcomes would improve if the security cooperation planning workforce, including within Embassy country teams and at Geographic Combatant Commands, was able to draw upon not just the foreign area officer specialty, but also upon other relevant specialties such as force planning, logistics, and acquisition.

The conferees believe that building security capabilities of a partner nation and deepening interoperability through security cooperation requires a specialized set of skills, and

the current system neither develops those skills among its workforce nor rationally assigns its workforce to match appropriate skills with requirements. The conferees believe increased attention and resourcing must be focused on the recruitment, training, certification, assignment, and career development of the security cooperation workforce. The conferees expect the Department to implement this authority expansively in order to address shortfalls in the security cooperation workforce throughout the enterprise.

Specifically, implementation of this authority should (1) ensure the development and rational allocation of qualified and experienced personnel in order to support high-priority security cooperation initiatives and partners; (2) ensure the appropriate sizing, organization, and chain-of-command for the security cooperation workforce within the Military Departments; (3) ensure the appropriate skills and capabilities are developed within the workforce and that there are standard and viable career paths; and (4) ensure sufficient size of the Title 10 workforce to enhance program management and administration, as well as to strike a more appropriate balance with the Title 22 workforce. The conferees expect that the Department will allocate necessary resources, from available Title 10 security cooperation program resources and other appropriate sources, sufficient to achieve these objectives, and reflect these costs in its annual security cooperation budget submission.

The conferees note that effectiveness and efficiency of security cooperation implementation will depend on a workforce that is integrated across the enterprise and responsive to clear strategic direction in support of Department priorities.

Reporting requirements (sec. 1251)

The Senate bill contained a provision (sec. 1261) to consolidate and standardize the Department's reporting on security cooperation authorities and programs in an annual report.

The House amendment contained a similar provision (sec. 1205).

The Senate recedes with a technical amendment.

The conferees note that this Act retains nearly all of the notification requirements with respect to the Department's security cooperation activities. Coupled with the requirement for an annual budget submission that appears elsewhere in this Act, this approach relieves the Department of an overly burdensome reporting regime while maintaining the transparency and accountability required for appropriate oversight and real-time monitoring of the Department's new programs. The conferees

expect that the level of detail contained in the annual report should be equal to or greater than the existing individual reports. Any degradation in the quality of the reporting on the Department's security cooperation program and activities would be inconsistent with the intent of the conferees in undertaking this broader reform initiative.

Quadrennial Review of Security Sector Assistance Program and Authorities of the United States Government (sec. 1252)

The conference agreement includes a provision that would require the President to conduct a quadrennial review of all U.S. Government security sector assistance programs, policies, authorities, and resources.

Other conforming amendments and authority for administration (sec. 1253)

The Senate bill contained a provision (sec. 1265) that would repeal superseded, obsolete, or duplicate statutes relating to security cooperation as part of its efforts to streamline and rationalize the authorities of the Department to conduct security cooperation.

The House amendment contained no similar provision.

The House recedes with a technical amendment.

SUBTITLE F—HUMAN RIGHTS SANCTIONS

Global Magnitsky Human Rights Accountability Act (secs. 1261-1265)

The Senate bill contained provisions (secs. 1281-1284) that would authorize the President to impose sanctions with respect to any foreign person that the President determines is responsible for gross human rights violations or acts of significant corruption.

The House amendment contained no similar provision.

The House recedes with amendments which would sunset the provision six years after enactment, modify the congressional referral mechanism, and revise the waiver threshold for the termination of sanctions, as well as several technical amendments.

SUBTITLE G—MISCELLANEOUS REPORTS

Modification of annual report on military and security developments involving the People's Republic of China (sec. 1271)

The House amendment contained a provision (sec. 1242) that would require a summary of the order of battle of the People's Liberation Army, including anti-ship ballistic missiles, theater ballistic missiles, and land attack cruise missile inventory and a description of the People's Republic of China's military and nonmilitary activities in the South China Sea to be added to the Annual Report on Military and Security Developments Involving the People's Republic of China.

The Senate bill contained no similar provision.

The Senate recedes.

Monitoring and evaluation of overseas humanitarian, disaster, and civic aid programs of the Department of Defense (sec. 1272)

The House amendment contained a provision (sec. 1245) that would authorize the Secretary of Defense to use up to 5 percent of the amounts authorized to be appropriated by this Act for Overseas Humanitarian, Disaster, and Civic Aid (OHDACA) for fiscal year 2017, to conduct monitoring and evaluation of the OHDACA programs of the Department of Defense. This section would also require the Secretary of Defense to provide a briefing to the specified committees not later than 90 days after the date of the enactment of this Act on mechanisms to evaluate OHDACA programs.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would extend the authorization to fiscal year 2018.

Strategy for United States defense interests in Africa (sec. 1273)

The House amendment contained a provision (sec. 1249) that would require the Secretary of Defense to submit a report not later than 1 year after the date of the enactment of this Act to the congressional defense committees that contains a strategy for United States defense interests in Africa.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

Report on the potential for cooperation between the United States and Israel on directed energy capabilities (sec. 1274)

The House amendment contained a provision (sec. 1250) that would allow the Secretary of Defense to carry out research, development, test and evaluation activities, on a joint basis with Israel to establish directed energy capabilities to detect and defeat ballistic missiles, cruise missiles, unmanned aerial vehicles, mortars, and improvised explosive devices that threaten the United States, deployed forces of the United States, or Israel.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would replace the House provision with the requirement for a report on the potential for United States and Israeli directed energy cooperation to defeat ballistic missiles, cruise missiles, unmanned aerial vehicles, mortars, and improvised explosive devices. The report is due to the congressional defense and foreign relations committees not later than 180 days after enactment of this act.

Annual update of Department of Defense Freedom of Navigation Report (sec. 1275)

The Senate bill contained a provision (sec. 1241) that directs the Secretary of Defense to submit an annual report to the Committees on Armed Services of the Senate and the House of Representatives setting forth an update on the most current Freedom of Navigation Report under the Freedom of Navigation Operations (FONOPS) program.

The House amendment contained a similar provision (sec. 1255) that directs the Secretary of Defense to submit a quarterly report to the congressional defense committees on any excessive territorial claims of foreign countries that were challenged by freedom of navigation operations and flights carried out by the armed forces during such fiscal quarter.

The House recedes with an amendment that would terminate the report on September 30, 2021.

Reports on INF Treaty and Open Skies Treaty (sec. 1276)

The House amendment contained a provision (sec. 1259H) that would require the Chairman of the Joint Chiefs of Staff to submit to the appropriate congressional committees a report on the Open Skies Treaty that assesses possible non-compliance of the treaty by the Russian Federation, and whether the treaty remains in the national security interest of the United States. It would also require a report on the INF Treaty of whether and why the Treaty remains in the national security interests of the

United States and a specific plan to remedy the Russian violation of the INF Treaty.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would add the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence to the list of congressional committees to receive the reports.

Assessment of proliferation of certain remotely piloted aircraft systems (sec. 1277)

The Senate bill contained a provision (sec. 1275) that would require an independent assessment directed by the Chairman of the Joint Chiefs of Staff to report on the impact to United States national security interests of the proliferation of certain remotely piloted aircraft. The assessment would include an analysis of the threat posed to the United States as a result of the proliferation of such aircraft to adversaries, the impact of such proliferation on the combat capabilities of and interoperability with partners and allies of the United States, and the potential benefits and risks of continuing to limit exports of such aircraft.

The House amendment contained no similar provision.

The House recedes.

The conferees note that the proliferation of remotely piloted aircraft has significantly altered the context of the international security environment since the origination of the Missile Technology Control Regime that proscribes a "strong presumption of denial" for the export of such aircraft.

SUBTITLE H—OTHER MATTERS

Enhancement of interagency support during contingency operations and transition periods (sec. 1281)

The Senate bill contained a provision (sec. 1050) that would authorize the Secretary of Defense and the Secretary of State to enter into an agreement allowing each Secretary to provide support, supplies, and services on a reimbursement basis, or by exchange of support, supplies, and services, to the other Secretary during a contingency operation and related transition period.

The House amendment contained a similar provision (sec. 1246).

The Senate recedes with a technical amendment.

Two-year extension and modification of authorization of non-conventional assisted recovery capabilities (sec. 1282)

The Senate bill contained a provision (sec. 1274) that would extend the authority of the Department of Defense to establish, develop, and maintain non-conventional assisted recovery (NAR) capabilities for three additional years and modify the eligibility of personnel for whom such support may be provided.

The House amendment contained a similar provision that would modify section 943 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110-417), as most recently amended by section 1271 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), to permit the recovery of individuals identified by the Secretary of Defense when a non-conventional assisted recovery capability is already in place and would extend the authority through 2020.

The Senate recedes with a technical amendment.

The conferees direct the Department to ensure that the planning, initiation, sustainment, and utilization of NAR capabilities are fully coordinated and de-conflicted with other U.S. departments and agencies who may also play a role in the recovery of designated individuals overseas. (The conferees also note that non-conventional assisted recovery is a traditional military activity and the authority modified and extended by this provision does not authorize the conduct of intelligence activities.)

Authority to destroy certain specified World War II-era United States-origin chemical munitions located on San Jose Island, Republic of Panama (sec. 1283)

The House amendment contained a provision (sec. 1248) that would authorize the Secretary of Defense to destroy eight chemical munitions on San Jose Island, Panama. The use of these funds shall not take effect until there is an agreement between the United States and Panama that such munitions are termed "old chemical weapons" and not "abandoned chemical weapons" and that per the prior lease agreement, the United States is under no legal obligation to destroy any additional chemical munitions, munitions constituents, and associated debris that may be located on San Jose Island as a result of research, development, and testing activities conducted on San Jose Island during the period of 1943 through 1947. This provision is not applicable to agreements with or obligations to countries other than Panama.

The Senate bill contained a similar provision (sec. 1421).
The Senate recedes.

Sense of Congress on military exchanges between the United States and Taiwan (sec. 1284)

The Senate bill contained a provision (sec. 1243) that directed the Secretary of Defense to carry out a program of exchanges of senior military officers and senior officials between the United States and Taiwan, both in the United States and Taiwan, designed to improve military to military relations between the United States and Taiwan.

The House amendment contained a similar provision (sec. 1254) that expressed a sense of the congress that that the Secretary of Defense should conduct a program of senior military exchanges between the United States and Taiwan, both in the United States and Taiwan, that have the objective of improving military-to-military relations and defense cooperation between the United States and Taiwan.

The House recedes with an amendment that the Secretary of Defense should carry out such a program of exchanges, both in the United States and Taiwan.

Limitation on availability of funds to implement the Arms Trade Treaty (sec. 1285)

The House amendment contained a provision (sec. 1259A) that would prohibit the use of funds to implement the Arms Trade Treaty unless the Treaty has received the advice and consent of the Senate and has been the subject of implementing legislation. The National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92; 10 U.S.C. 801 note) contained a similar provision.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

Prohibition on use of funds to invite, assist, or otherwise assure the participation of Cuba in certain joint or multilateral exercises (sec. 1286)

The Senate bill contained a provision (sec. 1204) that would prohibit the Secretary of Defense from using any funds to invite, assist, or otherwise assure the participation of the Government of Cuba in any joint or multilateral exercise or related security conference between the United States and Cuba until the Secretary, in coordination with the Director of National Intelligence, submits to Congress certain assurances. The provision would provide an exception to the prohibition for any joint or multilateral exercise or operation related to humanitarian assistance or disaster response.

The House amendment contained a similar provision (sec. 1259B) that would prohibit the use of funds authorized to be appropriated or otherwise made available to the Department of Defense for any bilateral military-to-military contact or cooperation between the Governments of the United States and Cuba until the Secretary of Defense and the Secretary of State, in consultation with the Director of National Intelligence, certify to the appropriate congressional committees that the Government of Cuba has taken specified actions.

The Senate recedes with an amendment that would prohibit the Secretary of Defense from using any funds authorized to be appropriated or otherwise made available for fiscal year 2017 for the Department of Defense unless the Secretary of Defense and the Secretary of State, in consultation with the Director of National Intelligence, certify to the appropriate congressional committees that the Government of Cuba has taken specified actions, with certain exceptions.

information on such risk will be reported to the specified congressional committees.

The Senate amendment also provides measures to delay the immediate imposition of sanctions if the President determines the government of the country concerned has taken specific and effective actions, including penalties as appropriate, to terminate the involvement of a domiciled person in the activity that triggered sanctions. This delay includes up to 120 days if the President initiates consultations with the government of the country concerned and an additional 120 days if such government is in the process of taking specific and effective actions to terminate the involvement of a domiciled entity in the activity that triggered sanctions.

It would also modify section 1532(c) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) to expand the foreign governments to whom assistance may be provided in order to counter the flow of improvised explosive device (IED) precursor chemicals.

The Senate bill contained a similar provision (sec. 1531) that would extend the use and transfer authority for the JIEDDF for one year.

The Senate recedes with an amendment to modify and expand the reporting requirements under section 1532(c).

The conferees expect the expanded IED precursor chemical authority to be focused on efforts to counter the Islamic State of Iraq and the Levant. The conferees direct the Secretary of Defense to brief the congressional defense committees, not later than 90 days after enactment of this Act, regarding utilization of the IED precursor chemical authority to date, the plans for future employment of the authority, and a discussion of additional authorities that would be useful to the efforts to stem the flow of IED precursor chemicals and components.

Furthermore, the conferees note that Section 1532(c) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), required a plan for transition of the Joint Improvised-Threat Defeat Agency (JIDA) activities, functions, and resources to an existing military department or Defense Agency. On January 29, 2016, the congressional defense committees were notified by the Under Secretary of Defense for Acquisition, Technology and Logistics that the entirety of activities, functions, and resources of JIDA would transition under the authority, direction, and control of the Defense Threat Reduction Agency (DTRA) not later than September 30, 2016 as the Joint Improvised-Threat Defeat Organization (JIDO).

The conferees support the transition of JIDA as JIDO under the authority, direction, and control of DTRA. Integration of the roles, mission, and activities of JIDA under DTRA should

result in reduced overhead management costs while maintaining core competencies of each entity in order to respond to warfighter needs. The conferees commend the identification of potential areas to reduce overhead costs and achieve efficiencies in the transition plan submitted on August 21, 2016. However, the conferees note the lack of detail regarding the processes used to integrate cost reduction efforts into the ongoing transition plan needed to realize savings and efficiencies.

The conferees recognize the transition will impact both DTRA's and JIDA's organizational construct. The conferees also recognize that the transition and associated efficiencies may warrant changes in JIDA's leadership construct and associated billets as JIDA becomes an organization under the authority, direction, and control of DTRA.

Therefore, the conferees direct the Under Secretary of Defense for Acquisition, Technology and Logistics to brief the congressional defense committees, not later than 60 days after enactment of this act, on the implementation of the transition of JIDA to DTRA as JIDO. The briefing shall include a progress report on the overhead cost reductions and efficiencies as well as cost reduction processes identified in the transition plan, an identification of efficiencies expected to be achieved in addition to those identified in the initial transition plan, the organizational and command and control constructs of DTRA and JIDO, an overview of the combined budget estimations across the Future Years Defense Program, and a description of how the core competencies of both DTRA and JIDO are being retained in order to fulfill designated missions and respond to warfighter needs.

The House recedes with an amendment that would require the Secretary of Defense to coordinate the required plan with the Director of National Intelligence. The amendment would require the required plan assess the relevant laws, regulations, and policies governing the launch of national security satellites and whether any legislative, regulatory, or policy actions (including with respect to waivers) would be necessary to allow for the launch of a national security satellite on an allied launch vehicle. The amendment also requires an assessment of the certification requirements for using allied launch vehicles pursuant to the plan and the estimated cost, schedule, and actions that would be necessary to certify allied launch vehicles.

The conferees note that the term "allied launch vehicle" explicitly prohibits the consideration of space launch vehicles from Russia, China, Iran, and North Korea.

The conferees expect that the Secretary and Director take into consideration the findings of the related study of options for a backup plan for assured access to space as identified in the Fiscal Year 2016 National Defense Authorization Act Joint Explanatory Statement.

The House amendment contained a similar provision (sec.1604) that would also amend section 1605 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291), as amended by section 1612 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), by adding a requirement that in developing and carrying out the pilot program, the Secretary shall take actions to begin the implementation of each specified goal by not later than September 30, 2017.

The House amendment contained no similar provision.

The House recedes with an amendment that requires the Director of DISA to develop strategic plan that reviews the requirements and missions of the agency, and assesses the adequacy of the technology strategy, workforce, and facilities to meet those requirements.

The conferees note that the Secretary of Defense is making efforts to increase the department's use of and exposure to innovative commercial information technologies and increase outreach to innovative small businesses in locations including Silicon Valley. Many of the technologies and systems of interest are within the mission area of DISA.

However, the conferees note with acute concern that at the same time this trend is occurring to seek out and exploit new

commercial innovation, DISA appears to be reducing its support for research and technology innovation, and has limited connectivity and coordination with other science and technology activities of the Department of Defense. The conferees believe that for a technology organization to eliminate its funding for flexible exploration of new technology is short-sighted and detrimental to the long term health of the organization. The conferees are concerned that DISA has not adequately linked its research and technology needs in a way to support the overall missions of the Agency, which has repercussions on the workforce it is able to attract, and the quality of support it is able to provide the warfighter. To use one example, the conferees believe that such behavior has impacted the ability of the Agency to fully realize the benefits, as well as the operational challenges and potentialities of emerging technologies like cloud and mobile computing, cyber defense and big data analytics. That impacts interactions with industry, but the conferees also believe that DISA has not adequately leveraged potential relationships with DOD labs and other innovative research activities. The conferees believe that through the process of developing a regular strategic plan, the Director of DISA should be taking the opportunity to develop closer coordination with appropriate research and development organizations in the Office of the Secretary of Defense and the Military Services to improve DISA's innovative capacity, strengthen its R&D programs, and improve DOD's ability to adopt the best commercial and other information technologies to support defense missions.

The report would require the Secretary to detail the standing authorities and limitations that authorize or limit the Secretary in conducting cyber operations and how those authorities compare to the authorities delegated to the Secretary for activities in non-cyber domains.

The Senate bill also contained a provision (sec. 1640) that would require the Chairman of the Joint Chiefs of Staff to submit to the President and the congressional defense committees a report on the military and nonmilitary options available to the United States to deter Russia, China, Iran, North Korea, and terrorist organizations in cyberspace. The provision would require the report to include an assessment of the effectiveness of the deterrence options available. It also would require the Chairman provide an integrated priorities list of cyber deterrence capabilities of the Department of Defense that identify, at a minimum, high priority capability needs prioritized across armed forces and functional lines, risk areas, and long-term strategic planning issues. The provision would also require within 60 days of receiving the report from the Chairman of the Joint Chiefs of Staff, that the President submit to the congressional defense committees a separate report identifying when an action carried out in cyberspace constitutes an act of war against the United States. The report would include (1) identification of what actions carried out in cyberspace constitute an act of war against the United States; (2) identification of how the law of war applies to the cyber operations of the Department of Defense; (3) identification of the circumstances required for responding to a cyber attack against the United States; and (4) a declaratory policy on the use of cyber weapons by the United States.

The House amendment contained a related provision (sec. 1636) that would require the Secretary of Defense submit a report to the congressional defense committees on the policies, doctrine, procedures, and authorities governing Department of Defense activities in response to malicious cyber activities carried out against the United States or United States persons by foreign states or non-state actors.

The House recedes with an amendment that would combine the three related provisions.

The conferees note that in preparing the report required by the provision the President shall consider (1) what severity of cyber attack would elicit a military response; (2) The ways in which the effects of a cyber attack may be equivalent to effects of an attack using conventional kinetic weapons,

including with respect to physical destruction or casualties; (3) intangible effects of significant scope, intensity, or duration; and (4) how the law of neutrality applies, how the utilization or exploitation of communications infrastructure in neutral States applies, and what limitations, if any, apply in exercising the right of the United States to act in self-defense through a cyber-operation.

Sense of Congress on cyber resiliency of the networks and communications systems of the National Guard (sec. 1655)

The House amendment contained a provision (sec. 1638) that would assert the sense of Congress concerning cyber resiliency of the networks and communications systems of the National Guard.

SUBTITLE D—NUCLEAR FORCES

Improvements to Council on Oversight of National Leadership Command, Control, and Communications System (sec. 1661)

The Senate bill contained a provision (sec. 1652) that would modify an existing report and add an assessment of the readiness of the command, control, and communications system for the national leadership of the United States.

The House amendment contained a similar provision (sec. 1641) that would require a report on space architecture development and limits funding to make changes to the command, control, and communications system in a manner that reduces warning time provided to the national leadership of the United States with respect to a warning of a strategic missile attack on the United States.

The conference agreement includes both the House and Senate provisions.

The General Accountability Office (GAO) in its report titled Nuclear Command, Control, and Communications: DOD Has Taken Steps to Address Sustainment and Maintenance Challenges for Critical Satellite Systems but Could Better Identify Risks and Mitigation Actions, GAO-16-370C (May 26, 2016). In that report the GAO highlighted a number of concerns regarding critical satellite systems used for nuclear command, control, and communications and recommended the Department of Defense take action to improve the identification of risks and mitigation actions. DOD, in its official response to GAO's

report, disagreed with GAO's recommendation. The department stated that it understood the concerns that GAO raised in respect to risks to these systems, but stated that DOD has a strong governance and oversight structure. The department asserted that it believes the actions taken to date address risk at an acceptable level with the transition of these satellite systems to their replacement systems.

Given the concerns raised by the GAO in its report, the conferees direct the Council on Oversight of the National Leadership Command, Control, and Communications System to provide a written assessment to the congressional defense committees that details (1) the actions the department has taken to identify the risks associated with the transition of these critical satellite systems, (2) information about the department's evaluation of the acceptability of each of the identified risks, and (3) information regarding actions the department has identified to mitigate these risks. The committee directs the Council to provide its written assessment to the congressional defense committees no later than February 28, 2017.

Treatment of certain sensitive information by State and local governments (sec. 1662)

The Senate bill contained a provision (sec. 1055) that would authorize the Secretary of Defense to designate information as being Department of Defense critical infrastructure security information to ensure that such information is not disseminated without authorization.

The House amendment contained a similar provision (sec. 1642).

House recedes with technical and conforming amendments.

Procurement authority for certain parts of intercontinental ballistic missile fuzes (sec. 1663)

The Senate bill contained a provision (sec. 1651) that would give the Department of Defense the authority to buy intercontinental ballistic missile fuze parts.

The House amendment contained an identical provision (sec. 1643).

The conference agreement includes this provision.

Prohibition on availability of funds for mobile variant of ground-based strategic deterrent missile (sec. 1664)

The House amendment contained a provision (sec. 1644) that would prohibit funds authorized to be appropriated to retain the option for, or develop, a mobile variant of the ground-based strategic deterrent missile.

The Senate bill contained no similar provision.

The Senate recesses.

Limitation on availability of funds for extension of New START Treaty (sec. 1665)

The House amendment contained a provision (sec. 1645) that would limit authorized funds to be appropriated for the Department of Defense to extend the New Start Treaty under certain circumstances.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would change the reporting period from 180 days to 120 days following the submission of both the report required by the provision and the National Intelligence Estimate.

Certifications regarding integrated tactical warning and attack assessment mission of the Air Force (sec. 1666)

The House amendment contained a provision (sec. 1646) that would require the Secretary of the Air Force to consolidate under a major command, commanded by a single general officer, the responsibility, authority, accountability, and resources for carrying out the nuclear command, control, and communications functions of the Air Force by March 31, 2017. This consolidation would be required to include, at a minimum, all terrestrial and aerial components of the nuclear command and control system that are survivable and endurable, as well as all terrestrial and aerial components of the integrated tactical warning and attack assessment(ITW/AA) system that are survivable and endurable.

The Senate bill contained no similar provision.

The Senate recesses with an amendment that would require that, not later than March 31, 2017 and each year through 2020, the Commander of the U.S. Strategic Command certify to the Secretary of Defense and the congressional defense committees that the Air Force is organized, staffed, trained and equipped to carry out the portions of the ITW/AA system assigned to the Air Force that are survivable and endurable. The Commander would further be required to certify that the programs and plans of the Air Force for sustaining, modernizing, training and exercising capabilities relating to such missions are sufficient for mission success. If the Commander of the U.S. Strategic Command does not make such a certification, the Secretary of the

Air Force would be required to immediately consolidate the terrestrial and aerial components of the ITW/AA system that are survivable and enduring under the Air Force Global Strike Command. The amendment also contains a rule of construction that this section may not be construed to affect any responsibilities relating to the ITW/AA system in effect on the date of enactment of this Act pursuant to certain agreements between the United States and Canada.

Matters relating to intercontinental ballistic missiles (sec. 1667)

The House amendment contained a provision (sec. 1649A) that would state the policy of the United States to maintain and modernize a responsive and alert intercontinental ballistic missile force and prohibit (1) funding for reducing the responsiveness or alert level of the intercontinental ballistic missiles of the United States and (2) reducing the quantity of deployed intercontinental ballistic missiles of the United States to less than 400.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would drop the policy statement and add an element on cost to the reporting requirement.

Requests for forces to meet security requirements for land-based nuclear forces (sec. 1668)

The Senate bill contained a provision (sec. 1655) that would require the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to decide if the land-based missile fields using UH-1N helicopters meet security requirements and if there are any shortfalls or gaps in meeting such requirements.

The House amendment contained a similar provision (sec. 1649) that would require the Chairman of the Joint Chiefs of Staff to certify to the congressional defense committees that the Chairman has approved any requests for forces of a commander of a combatant command to meet the security requirements of land-based nuclear forces.

The Senate recedes with an amendment that would combine the two provisions while eliminating the certification required under the House provision. The provision includes a restriction of 25 percent on travel and representational expenses of the Under Secretary of Defense for Acquisition, Technology, and Logistics until the Under Secretary certifies that there is an acquisition process in place to ensure that a UH-1N replacement aircraft is under contract in fiscal year 2018.

Report on Russian and Chinese political and military leadership survivability, command and control, and continuity of government programs and activities (sec. 1669)

The House amendment contained a provision (sec. 1647) that would require the Director of National Intelligence to submit to the appropriate congressional committees, a report on the leadership survivability, command and control, and continuity of government programs and activities with respect to the People's Republic of China and the Russian Federation.

The Senate bill contained no similar provision.

The Senate recedes.

Review by the Comptroller General of the United States of recommendations relating to nuclear enterprise of Department of Defense (sec. 1670)

The House amendment contained no similar provision.

The House recedes.

Sense of Congress on nuclear deterrence (sec. 1671)

The Senate bill contained a provision (sec. 1654) that would state the sense of Congress that the nuclear forces of the United States continue to play a fundamental role in deterring aggression against the interests of the United States and its allies. It also states that the prevention of war through effective deterrence requires survivable and flexible nuclear forces that are well exercised and ready to respond to nuclear escalation if necessary.

The House amendment contained no similar provision.

The House recedes with an amendment that would update the provision to take into account the July 2016 NATO Warsaw Summit communique.

Sense of Congress on importance of independent nuclear deterrent of United Kingdom (sec. 1672)

The House amendment contained a provision (sec. 1648) that would express the sense of Congress that the United States believes that the independent nuclear deterrent and decision-making of the United Kingdom provides a crucial contribution to

international stability, the North Atlantic Treaty Organization alliance, and the national security of the United States.

The Senate bill contained no similar provision.

The Senate recedes.

SUBTITLE E—MISSILE DEFENSE PROGRAMS

National missile defense policy (sec. 1681)

The Senate bill contained a provision (sec. 1665) that would remove the word “limited” from Section 2 of the National Missile Defense Act of 1999 (Public Law 106-38; 10 U.S.C. 2431 note).

The House amendment contained a similar provision (sec. 1665) that would replace the National Missile Defense Act of 1999 with new policy language to the effect that the United States should maintain and improve a robust layered missile defense system capable of defending the territory of the United States and its allies against the developing and increasingly complex ballistic missile threat.

The Senate recedes with an amendment that would add to the House provision language making it clear that the United States should deploy effective missile defense systems.

The conferees note, nothing in this legislative provision requires or directs the development of missile defenses against any country or its strategic nuclear forces.

Extensions of prohibitions relating to missile defense information and systems (sec. 1682)

The Senate bill contained a provision (sec. 1666) that would extend prohibitions relating to missile defense information and systems as described in section 130h(d) of title 10, United States Code, to 2018.

The House amendment contained a provision (sec. 1651) that would prohibit funds to integrate a missile defense system of the Russian Federation or a missile defense system of the People’s Republic of China into any missile defense system of the United States, and which would extend this prohibition, and a prohibition on sharing certain missile defense information with Russia, to 2027.

The Senate recedes with an amendment that would extend the current prohibitions by two years to January 1, 2019.

Non-terrestrial missile defense intercept and defeat capability for the ballistic missile defense system (sec. 1683)

The Senate bill contained a provision (sec. 1663) that would amend section 1685 of the National Defense Authorization Act for Fiscal Year 2016 by adding at the end a new subsection stating that no later than 60 days after the submittal of the report required, the Director may commence coordination and activities associated with research, development, test, and evaluation on the programs described.

The House amendment contained a similar provision (sec. 1656) that would require the Director of the Missile Defense Agency to commence the planning for concept definition, design, research, development, engineering evaluation, and test of a space-based ballistic missile intercept and defeat layer to the ballistic missile defense system, including with respect to a space test bed for a missile interceptor capability, and submit a detailed budget and development plan for these activities with the budget of the president submitted for fiscal year 2018.

The House recedes.

The conferees note that while the United States enjoys a measure of protection against ballistic missiles of all ranges, the ballistic missile threat – including to the U.S. homeland – continues to grow. The 2010 Ballistic Missile Defense Review noted, “It is difficult to predict precisely how the threat to the U.S. homeland will evolve, but it is certain that it will do so.” The conferees agree and received testimony that the threat from ballistic missiles has continued to grow in numbers and in range and countermeasures, making missiles more complex, survivable, reliable, and accurate.

Likewise, the conferees observe that United States space assets are under increasing threat. Director of National Intelligence, James Clapper, testified before the Senate Armed Services Committee on February 9, 2016 that “Threats to our use of military, civil, and commercial space systems will increase in the next few years as Russia and China progress in developing counterspace weapon systems to deny, degrade, or disrupt U.S. space systems.” And that “Russia and China continue to pursue weapons systems capable of destroying satellites on orbit, placing U.S. satellites at greater risk in the next few years. China has probably made progress on the antisatellite missile system that it tested in July 2014.”

All of this is to suggest that the United States cannot stop exploring new and more effective means for protecting our homeland and forces against ballistic missile threats and for guarding our critical civilian and military space assets. This provision encourages the Department of Defense to examine the feasibility of defeating such threats with a new generation of missile defense capabilities based in space.

Review of the missile defeat policy and strategy of the United States (sec. 1684)

The Senate bill contained a provision (sec. 1664) that would require the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to conduct a review of the strategy, programs and capabilities to counter cruise and ballistic missiles prior to launch using the full range of active, passive, kinetic, and non-kinetic defense measures.

The House amendment contained a provision (sec. 1652) that required the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to conduct a new review of the missile defeat capability, policy, and strategy of the United States with respect to left and right of launch ballistic missile defense, for both regional and homeland missile defense, incorporating the full range of active, passive, kinetic and non-kinetic defense measures, and integrating offensive and defensive forces for the defeat of ballistic and cruise missiles.

The House amendment also contained a provision (sec. 1662) that required the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to submit to the congressional defense committees the classified and unclassified declaratory policy of the United States regarding the use of the left-of-launch capability of the United States and how the Secretary and Chairman intend to ensure such capability is a deterrent to attacks by adversaries.

The Senate recedes with an amendment that combines the three provisions into a single provision with technical changes to the former House provision (sec. 1652). The new provision reduces the prohibition on acquisition changes to the Missile Defense Agency to two years, rather than the indefinite period included in the original House provision.

Maximizing Aegis Ashore capability and developing medium range discrimination radar (sec. 1685)

The House amendment contained a provision (sec. 1654) that would require the Secretary of Defense to conduct a complete evaluation of the optimal anti-air warfare capability for each current Aegis Ashore site and as part of any future deployment by the United States of an Aegis Ashore site. The provision also required the Director of the Missile Defense Agency to notify Congress whether the preferred location for fielding a medium range ballistic missile defense radar for the defense of Hawaii would require an updated environmental impact statement. The Department would also be required to conduct an assessment of the ballistic and air threat against Hawaii and the efficacy of

making the Aegis Ashore site at the Pacific Missile Range Facility operational and deploying the preferred alternative for fielding a medium range ballistic missile defense sensor for the defense of Hawaii.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to continue the development, procurement, and deployment of anti-air warfare capabilities at each Aegis Ashore site in Romania and Poland.

The provision also requires the Director of the Missile Defense Agency, if he determines that an updated environmental impact statement is required for fielding a medium range ballistic missile defense sensor for the defense of Hawaii, to commence such action not later than 60 days after the date of notification.

With respect to the requirement for an evaluation of the ballistic and air threat to Hawaii and the efficacy of various defensive measures, the conferees note that the Department has already submitted reports addressing the various alternatives and therefore expect the Department only to provide an update.

Technical authority for integrated air and missile defense activities and programs (sec. 1686)

The House amendment contained a provision (sec. 1655) that would allow the Director of the Missile Defense Agency to seek to have staff detailed to the Missile Defense Agency from the Joint Functional Component Command for Integrated Missile Defense and the Joint Integrated Air and Missile Defense Organization in a number the Director determines necessary.

The Senate bill contained no similar provision.

The Senate recedes.

Hypersonic defense capability development (sec. 1687)

The House amendment contained a provision (sec. 1657) that would require the Director of the Missile Defense Agency to establish a program of record in the ballistic missile defense system to develop and field a defensive system to defeat hypersonic boost-glide and maneuvering ballistic missiles. A limitation was placed on funding for certain headquarters operations in the Office of the Secretary of Defense until such a program of record is created. A report to Congress on the Missile Technology Control Regime (MTCR) was also required.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would direct that the Director of the Missile Defense Agency serve as the executive agent for the Department of Defense for the development of a capability to counter hypersonic boost-glide vehicle capabilities and conventional prompt global strike capabilities that may be employed against the U.S., its allies, and U.S. deployed forces, and establish a program of record for such capability not later than September 30, 2017. Reports to Congress must be provided on the architecture and sensors needed to detect hypersonic threats and on the military capabilities and capability gaps related to the threat posed by hypersonic boost-glide vehicles and maneuvering ballistic missiles. The limitation on funds and the MTCR report were removed.

Conventional Prompt Global Strike weapons system (sec. 1688)

The Senate bill contained a provision (sec. 1672) that would require the Secretary of Defense to make a Milestone A decision for Conventional Prompt Global Strike no later than September 30, 2020, or 8 months after the successful completion of the Intermediate Range Flight 2 test.

The House amendment contained a similar provision (sec. 1659) that would make no more than 75 percent of funds be obligated or expended for research, development, test, and evaluation, for the conventional prompt global strike until the Chairman of the Joint Chiefs of Staff submits to the congressional defense committees a report on warfighter requirements and whether the program schedule supports such requirements.

The Senate recedes with an amendment that would combine the two provisions, merging the Senate provision into the House amendment.

Required testing by Missile Defense Agency of ground-based midcourse defense element of ballistic missile defense system (sec. 1689)

The Senate bill contained a provision (sec. 1661) that would require the Director of the Missile Defense Agency to administer a flight test of the ground-based mid-course defense element of the ballistic missile defense system not less frequently than once each fiscal year and allows certain exceptions.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Iron Dome short-range rocket defense system and Israeli cooperative missile defense program codevelopment and coproduction (sec. 1690)

The Senate bill contained a provision (sec. 1662) that would authorize not more than \$42.0 million for the Missile Defense Agency to provide to the Government of Israel to procure Tamir interceptors for the Iron Dome short-range rocket defense system through co-production of such interceptors in the United States, including certain conditions.

The House amendment contained a similar provision (sec. 1653) that would authorize not more than \$62.0 million for the Missile Defense Agency to provide to the Government of Israel to procure Tamir interceptors for the Iron Dome short-range rocket defense system through coproduction of such interceptors in the United States by industry of the United States, including certain conditions. The House provision would also authorize not more than \$150.0 million to procure the David's Sling weapon system and not more than \$120.0 million for the Arrow 3 Upper Tier interceptor program, including for coproduction of parts and components in the United States, subject to certain certifications.

The House recedes with an amendment that would combine the two provisions with certain technical corrections and clarifications. The certification concerning the requirement for a bilateral international agreement required by the provision may be waived if the Under Secretary certifies that the funds specified for the David's Sling weapon system and for the Arrow 3 Upper Tier interceptor program are provided to Israel solely for funding the procurement of long-lead components and critical hardware in accordance with a production plan and funding profile detailing Israeli contributions and if the long-lead procurement will be conducted in a manner that does not incur nonrecurring engineering activity or additional cost to United States suppliers. The agreement authorizes \$62.0 million to procure Tamir interceptors, the amount prescribed in the House amendment.

Limitations on availability of funds for lower-tier air and missile defense capability of the Army (sec. 1691)

The House amendment contained a provision that would limit the obligation or expenditure of fifty percent of the amount authorized to be appropriated in fiscal year 2017 for the Patriot Lower Tier Air and Missile Defense (LTAMDS) capability of the Army until certain conditions are met.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would reduce the limitation to twenty-five percent of the funds authorized to be appropriated for LTAMDS Research, Development, Test and Evaluation (RDT&E). The amendment would also amend the conditions the Department of Defense would need to meet to lift the limitation on funds.

The conferees note that the amended provision would not require either a Capabilities Development Document in 2017 or Low Rate Initial Production earlier than 2021, nor is it the conferees intent to mandate such actions.

The conferees agree on the vital importance of the expeditious fielding of a lower tier air and missile defense capability that meets the needs of our warfighters and seamlessly integrates with the nation's other deployed, or planned to be deployed, air and missile defense capabilities.

The conferees also note the Government Accountability Office's (GAO) recent report on the Army's strategy for modernizing the Patriot missile defense system found that throughput limitations under the Army's current maintenance schedule present an elevated risk of equipment failure. The conferees are concerned that potential delays in modernizing Patriot systems, components, and software will amplify these risks as units continue to train, deploy, and operate legacy Patriot equipment at a high tempo over an extended period.

Therefore, the conferees direct GAO to assess the Army's Patriot maintenance and recapitalization plans to ensure that operational needs are met. As part of its assessment, the conferees direct the GAO to review whether Patriot units are undergoing sufficient maintenance in between deployments, and the extent to which the Army has identified and assessed options for increasing its maintenance throughput, including associated costs and impacts on Patriot training and operations. The GAO also should assess whether and how the Army plans to mitigate the risk of equipment failure should Patriot modernization efforts be delayed. The GAO shall complete its review and report to congressional defense committees at an agreed upon date.

Pilot program on loss of unclassified, controlled technical information (sec. 1692)

The House amendment contained a provision (sec. 1660) that would require the Director of the Missile Defense Agency to carry out a pilot program to implement improvements to the data protection options in the programs of the Missile Defense Agency, particularly with respect to unclassified, controlled technical information and controlled unclassified information.

The Senate bill contained no similar provision.
The Senate recedes.

Plan for procurement of medium-range discrimination radar to improve homeland missile defense (sec. 1693)

The House amendment contained a provision (sec. 1663) that would require the Director of the Missile Defense Agency to plan to procure a medium range discrimination radar or equivalent sensor to improve homeland missile defense of Hawaii, and to issue a request for proposals for the medium-range discrimination radar no later than October 1, 2017.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would clarify that the Missile Defense Agency shall develop a plan to procure a medium-range discrimination radar or equivalent sensor to improve homeland missile defense for Hawaii and to field such radar or equivalent sensor by not later than December 31, 2021, and that the Director shall submit the plan to the congressional defense committees not later than 60 days after enactment.

Review of Missile Defense Agency budget submissions for ground-based midcourse defense and evaluation of alternative ground-based interceptor deployments (sec. 1694)

The House amendment contained a provision (sec. 1661) that would require the Director of Cost Assessment and Program Evaluation to submit to the congressional defense committees a report on the modernization requirements for the ground-based midcourse defense system. The provision would also require the Commander of United States Northern Command to certify the level of funding for the ground-based midcourse defense system, and an evaluation of transportable ground-based interceptors by the Director of the Missile Defense Agency.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would strike the certification required by the Commander of United States Northern Command, and make it clear that the industrial base requirements required by the report be those requirements generally understood by the Missile Defense Agency.

Semiannual notifications on missile defense tests and costs (sec. 1695)

The House amendment contained a provision (sec. 1664) that would require the Director of the Missile Defense Agency to submit to the congressional defense committees a notification on

certain matters related to each planned flight test, including intercept tests.

The Senate bill contained no similar provision.

The Senate recedes.

*Reports on unfunded priorities of the Missile Defense Agency
(sec. 1696)*

The House amendment contained a provision (sec. 1067) that would require the inclusion of ballistic missile defense information in the annual reports on requirements of the combatant commanders and the prioritized capabilities list for ballistic missile defense developed by the commander of the United States Strategic Command.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would modify the House provision with a requirement that not later than 10 days after the budget of the President for fiscal years 2018 and 2019 are submitted to Congress, the Director of the Missile Defense Agency shall submit to the Secretary of Defense and the Chairman of the Joint Chiefs of Staff, and to the congressional defense committees, a report on the unfunded priorities of the Missile Defense Agency.

SUBTITLE F—OTHER MATTERS

Protection of certain facilities and assets from unmanned aircraft (sec. 1697)

The House amendment contained a provision (sec. 1671) that would authorize the Secretary of Defense, and allow the Secretary to authorize the armed forces, to take actions that are necessary to mitigate the threat of an unmanned aircraft system or unmanned aircraft that poses an imminent threat to the safety or security of a covered facility or asset that is: (1) identified by the Secretary; (2) located in the United States; and (3) related to the nuclear deterrence mission of the Department of Defense (including nuclear command and control, integrated tactical warning and attack assessment, and continuity of government), the missile defense mission of the Department; or the national security space mission of the Department.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary, notwithstanding title 18 of the United States Code, to take actions that are necessary to mitigate the threat (as defined by the Secretary of Defense, in consultation with

the Secretary of Transportation) that an unmanned aircraft system or unmanned aircraft poses to the safety or security of a covered facility or asset. The amendment would also clarify the actions that would be authorized.

Harmful interference to Department of Defense Global Positioning System (sec. 1698)

The House amendment contained a provision (sec. 1673) that would amend the Federal Communications Commission (FCC) conditions on commercial terrestrial operations (47 U.S.C. 301 et seq.) by adding that the FCC shall not permit commercial terrestrial operations in the 1525-1559 megahertz band or the 1626.5-1660.5 megahertz band until 90 days after the FCC resolves concerns of widespread harmful interference by such operations in such band to Department of Defense Global Positioning System (GPS) devices. The provision would also require the Secretary of Defense to conduct a review of harmful interference of Department of Defense GPS devices and to notify congress if the Secretary determines the existence of widespread harmful interference.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment.

LEGISLATIVE PROVISIONS NOT ADOPTED

Availability of certain amounts to meet requirements in connection with United States policy on assured access to space

The Senate bill contained a provision (sec. 1611) that would allow for up to half of the funds made available for a replacement space launch propulsion system or new launch vehicle in fiscal years 2016, 2017, or any future fiscal year, be made available for meeting the requirements in connection with United States policy on assured access to space (section 2273(b), title 10, United States Code).

The House amendment contained no similar provision.

The Senate recedes.

Department of Defense-wide requirements for security clearances for military intelligence officers

The Senate bill contained a provision (sec. 1621) that would require the Secretary of Defense to ensure that each military intelligence officer serving as a unit or service intelligence officer, or in command of an intelligence unit or activity, has an active security clearance.

The House amendment contained no similar provision.
The Senate recedes.

The conferees note with displeasure the recent situation in which an officer serving as the Deputy Chief of Naval Operations for Information Warfare, N2/N6, Office of the Chief of Naval Operations, and Director of Naval Intelligence, was unable to fully perform the duties of the office to which he was appointed, with the advice and consent of the Senate, because his access to classified information was suspended. The conferees expect that in the future every officer serving as a unit or service intelligence officer, or in command of an intelligence unit or activity will have an active security clearance.

Limitation on availability of funds for intelligence management

The House amendment contained a provision (sec. 1621) that would limit the amount of authorized funds available to be obligated or expended for intelligence management until the Under Secretary of Defense for Intelligence provides a report to the appropriate congressional committees on counterintelligence activities described in the classified annex accompanying this Act.

The Senate bill contained no similar provision.
The House recedes.

Sense of Congress on initial operating capability of phase 2 of European Phased Adaptive Approach to missile defense

The House amendment contained a provision (sec. 1666) that would express the Sense of Congress that the United States is committed to the defense of deployed members of the Armed Forces of the United States and to the defense of the European allies of the United States by increasing the ballistic missile defense capability of the North Atlantic Treaty Organization.

The Senate bill contained no similar provision.

The conferees note that on July 9, 2016, the Heads of State and Government participating in the meeting of the North Atlantic Council in Warsaw, Poland, issued the "Warsaw Summit Communiqué." In that document, the Heads of State and Government stated that:

"At our Summit in Chicago in 2012, we declared the achievement of an Interim NATO BMD Capability as an operationally significant first step. At the Wales Summit, we welcomed the forward deployment of BMD-capable Aegis ships to Rota, Spain that could be made available to NATO. Today a new milestone in the development of NATO BMD has been reached and we

are pleased to declare the achievement of the NATO BMD Initial Operational Capability. This is a significant step toward the aim of NATO BMD that offers a stronger capability to defend our populations, territory, and forces across southern NATO Europe against a potential ballistic missile attack. The Aegis Ashore site in Deveselu, Romania represents a significant portion of this increase in capability, and the command and control (C2) of the Aegis Ashore site is being transferred to NATO. We also welcome that Turkey hosts a forward-based early-warning BMD radar at Kürecik and that Poland will be hosting an Aegis Ashore site at the Redzikowo military base. We are also pleased that additional voluntary national contributions have been offered by Allies, and we encourage further voluntary contributions, all of which will add robustness to the capability."

The Communique further stated that, "NATO missile defence is not directed against Russia and will not undermine Russia's strategic deterrence capabilities. NATO missile defence is intended to defend against potential threats emanating from outside the Euro-Atlantic area."

The House recedes.

The House amendment contained no similar provision.

The Senate recedes.

The conferees note that elsewhere in the conference agreement there is a requirement for the Secretary of Defense to conduct a pilot program to assess the feasibility and advisability of applying, innovative methodologies or engineering approaches to improve the defense of control systems against cyber attacks in order to increase the resilience of military installations against cybersecurity threats and prevent or mitigate the potential for high-consequence cyberattacks, and to inform future requirements development for such systems.

TITLE XVII—GUAM WORLD WAR II LOYALTY RECOGNITION ACT

Guam World War II Loyalty Recognition Act (secs. 1701-1707)

The House amendment contained a number of provisions (sec. 7301-7306) that would honor the suffering and loyalty of the residents of Guam during its occupation by Imperial Japanese forces during the Second World War and direct the federal government to adjudicate and facilitate the claims of compensable Guam victims and survivors of compensable Guam decedents.

Specifically, the House amendment contained a provision (sec. 7302) that would express the eternal gratitude of the United States to the residents of Guam for their loyalty and courage under threat of death and great bodily harm at the hands of occupying forces. It also contained a provision that would direct the Secretary of the Treasury to establish a special fund for the payment of claims to compensable Guam victims and their survivors (sec. 7303), a provision that would require the Secretary of the Treasury to compensate compensable victims and survivors of compensable Guam decedents following certification from the Foreign Claims Settlement Commission (sec. 7304), and a provision that would direct the Foreign Claims Settlement Commission to adjudicate claims and to determine eligibility for claims under the aforementioned section 7304 (sec. 7305). Finally, it contained a provision that would direct the Secretary of the Interior to establish a grant program designed to educate and to memorialize the occupation of Guam while honoring the loyalty of its inhabitants (sec. 7306) and a provision that would authorize appropriations for the aforementioned sections 7304 and 7305 for any fiscal year beginning after the date of the enactment, with \$5,000,000 authorized per fiscal year for section 7306 (sec. 7307).

The Senate recedes.

SUBTITLE B—CLARIFYING THE ROLES OF SMALL BUSINESS ADVOCATES

Scope of review by procurement center representatives (sec. 1811)

The Senate bill contained a provision (sec. 884) that would codify for Department of Defense contracts the longstanding exemption contained in Federal Acquisition Regulation 19.000(b) that small business set-asides are not applied to overseas contracts.

The House amendment contained a similar provision (sec. 1811) that would amend section 15(l) of the Small Business Act (15 U.S.C. 644(l)) to reverse a regulatory change made by the Small Business Administration during enactment of the Small Business Jobs Act of 2010 (Public Law 111-240) and to ensure that procurement center representatives review consolidated contracts or task orders that are fully or partially set aside or reserved for small business.

The Senate recedes with an amendment that would clarify that procurement center representatives of the Small Business Administration shall not review contracts awarded pursuant to status of forces agreements or contracts of the Department of Defense awarded and performed overseas. The amendment also would stipulate that contracts excluded from procurement center representative review shall not be included in any calculation of the Department's attainment of the small business goals established in 15(g) of the Small Business Act (15 USC 644(g)).

Duties of the Office of Small and Disadvantaged Business Utilization (sec. 1812)

The House amendment contained a provision (sec. 1813) that would amend section 15(k) of the Small Business Act (15 U.S.C. 644(k)) to revise the duties of the Offices of Small and Disadvantaged Business Utilization in Federal agencies. The offices would be authorized to provide assistance to service-disabled veteran-owned small businesses and participants in the Historically Underutilized Business Zone program which are not included in the current list of small business programs. The offices also would review annual summaries of Government credit card purchases to ensure compliance with the Small Business Act.

The Senate bill contained no similar provision.
The Senate recedes.

Improving contractor compliance (sec. 1813)

The House amendment contained a provision (sec. 1814) that would amend sections 15 and 45 of the Small Business Act (15 U.S.C. 644 and 15 U.S.C. 657r), and section 831(e)(1) of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510), to promote the availability of existing programs that assist small contractors attempting to comply with Federal regulations. The Small Business Administration would develop a list of no-cost compliance assistance programs for small contractors which would be distributed through the Small Business Administration and Federal agency small-business offices to small contractors. This section would also require that any mentor-protégé agreement approved by the Small Business Administration or the Department of Defense address the provision of compliance assistance to the protégé firm.

The Senate recedes.

Improving education on small business regulations (sec. 1814)

The conferees direct the Secretary of Defense to ensure that the Department of Defense, its components, and the Services are providing timely evaluations of past performance and giving due credit to the evaluations previously conducted, even those conducted by a different component, Service, or agency, consistent with current law and regulation. No later than 60 days after enactment of the National Defense Authorization for Fiscal Year 2017, the conferees direct the Secretary to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives on the Department's progress meeting these objectives.

Amendments to the Mentor-Protege Program of the Department of Defense (sec. 1823)

The House amendment contained a provision (sec. 1831) that would amend section 831 of the National Defense Authorization Act for Fiscal Year 1991 (Public Law 101-510), to require the Small Business Administration to determine whether a prospective protege firm is affiliated with its proposed mentor prior to

approval of a mentor-protege agreement. The same requirement would be removed from the Department of Defense.

The Senate bill contained no similar provision.

The Senate recedes with a technical amendment that would better organize the eligibility requirements. The conferees note that the changes in this provision will allow for determinations of small business status to be made in the same manner as such determinations are for purposes of federal contracting. The change does not alter the Department's control of its mentor-protege program, nor the statutory provision that prohibits the Small Business Administration from considering support provided by a mentor to a protege firm under this program as evidence of affiliation. However, the provision would prevent instances of confusion, and the potential for fraud, by preventing competing determinations of small business status.

This section would also amend section 3(a) of the Small Business Act (15 U.S.C. 632(a)) to authorize the Small Business Administration to establish different size standards for various types of agricultural enterprises. The Secretary would continue to determine whether individuals are veterans or service-disabled veterans and would be responsible for verification of applicant firms.

Challenges to the status of a VOSB or SDVOSB based upon issues of ownership or control would be decided by the administrative judges at the Office of Hearings and Appeals of the Small Business Administration. This section would not affect the Department of Defense.

TITLE XXI—ARMY MILITARY CONSTRUCTION

Summary

The budget request included authorization of appropriations of \$503.5 million for military construction and \$526.7 million for family housing for the Army in fiscal year 2017.

The conference agreement includes authorization of appropriations of \$553.9 million for military construction and \$483.2 million for family housing for the Army in fiscal year 2017.

The agreement includes authorization for three projects from the Army's unfunded requirements list: \$10.6 million for a Company Operations Facility at Fort Gordon, Georgia; \$6.9 million for a Fire Station at Fort Leonard Wood, Missouri; and \$23.0 million for a Vehicle Maintenance Shop at Fort Belvoir, Virginia.

The conferees note that the budget request included \$143.6 million for Family Housing New Construction at Camp Humphries, Republic of Korea. Furthermore, the conferees are aware that this is the first phase of proposed military family housing construction at Camp Humphries, with a \$153.0 million second phase planned for fiscal year 2019. Given the requirements that have been established by the Commander of U.S. Forces Korea to house command sponsored families on installation and the timelines for the relocation of U.S. Forces Korea and Eighth Army to Camp Humphries, the conferees believe that combining the two phases into a single project will result in efficiencies in terms of the financial cost of the project and the construction

timeline. Therefore, the agreement recommends a total authorization of \$297.0 million for Family Housing New Construction at Camp Humphries, Republic of Korea. However, the conferees support the authorization of appropriations for fiscal year 2017 only in an amount equivalent to the ability of the military department to execute in the year of authorization of appropriations. Therefore, the agreement recommends \$100.0 million, a reduction of \$43.6 million, for this project in fiscal year 2017.

In addition, the conference agreement authorizes \$35.0 million for the Army's unspecified minor construction program, an increase of \$10.0 million above the budget request.

TITLE XXII—NAVY MILITARY CONSTRUCTION

Summary

The budget request included authorization of appropriations of \$1.03 billion for military construction and \$394.9 million for family housing for the Navy and Marine Corps in fiscal year 2017.

The conference agreement includes authorization of appropriations of \$1.2 billion for military construction and \$394.9 million for family housing for the Navy and Marine Corps in fiscal year 2017.

The conference agreement includes authorization for two projects from the Navy's unfunded requirements list: \$27.0 million for Chambers Field Magazine Recap Phase 1 at Norfolk, Virginia, and \$73.0 million for SEAWOLF Class Service Pier at Bangor, Washington

The agreement includes authorization for three projects from the Marine Corps' unfunded requirements list: \$118.9 million for an Aircraft Maintenance Hangar Increment 1 at Miramar, California; \$34.7 million for a Communication Complex & Infrastructure Upgrade at Miramar, California; \$40.0 million for F-35 Parking Apron at Miramar, California. With respect to the Aircraft Maintenance Hangar, we support the authorization for appropriations in an amount equivalent to the ability of the military department to execute in the year of the authorization for appropriations. For this project, the conferees believe that the Department of the Navy has exceeded its ability to fully expend the funding requested for fiscal year 2017. As such, the agreement recommends incremental funding with an authorization of appropriations in the amount of \$79.4 million, a reduction of \$39.5 million, for this project. Furthermore, the conferees note that these three projects at Miramar were included in the Marine Corps' unfunded requirements list due to a late development and the need to align F-35C squadron operational dates with plans to stand up the first F-35C compatible aircraft carrier on the west coast of the United States.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

SUBTITLE A—NATIONAL SECURITY PROGRAMS AUTHORIZATIONS

National Nuclear Security Administration (sec. 3101)

The Senate bill contained a provision (sec. 3101) that would authorize a total of \$12.9 billion for the Department of Energy in fiscal year 2017 for the National Nuclear Security Administration to carry out programs necessary to national security.

The Senate recedes.

The Department of Energy's (DOE) National Nuclear Security Administration (NNSA) is pursuing a revised strategy for its Chemistry and Metallurgy Research Replacement (CMRR) project after spending \$500.0 million on the design of the original project and cancelling the Nuclear Facility subproject in 2014. The revised project, which is now broken down into 4 subprojects, includes renovating two existing facilities, the RLUOB and the PF-4 facility, at NNSA's Los Alamos site and installing plutonium research equipment in those facilities to support NNSA's plutonium pit production and defense plutonium work in the near term. NNSA is also studying the possibility that, in the future, it may need to expand the capacity for plutonium chemistry and research beyond that provided by the 4 subprojects. In addition, NNSA is looking at a modular approach of constructing one or more identical buildings to support future plutonium pit manufacturing requirements beyond what can be currently produced in PF-4. In accordance with DOE Order 413.3B and the Secretary's guidance on project management, NNSA

is currently conducting an analysis of alternatives for the proposed modular approach.

The conferees are pleased that NNSA has adopted a strategy that maximizes the space within existing facilities to the greatest extent practicable while continuing to examine options to support future work. However, while the conferees recognize the complexity and importance of the CMRR project and defense-related plutonium activities in general, the conferees remain concerned that NNSA has not adequately estimated the cost and schedule, nor properly specified project requirements, for either the CMRR project or the proposed modular approach to ensure that the two projects together will provide the capabilities needed to support NNSA's plutonium strategy, including legislatively directed pit production levels.

To enable the conferees to monitor any future cost increases and schedule delays associated with these projects, the conferees direct NNSA to brief the congressional defense committees, no later than October 1, 2017, on the status of its actions taken to address the recommendations contained within a recent Government Accountability Office report numbered GAO-16-585 and titled "DOE Project Management: NNSA Needs to Clarify Requirements for Its Plutonium Analysis Project at Los Alamos". This briefing should be accompanied by a written briefing document.

This briefing should clarify the relationship between the requirements for the CMRR project and the proposed modular approach and NNSA's plutonium strategy. The briefing should identify any gaps between the capabilities these projects will deliver and the requirements of the plutonium strategy and provide information on NNSA plans to address any such gaps. The briefing should also address the degree to which these projects can provide plutonium capabilities to support other DOE activities outside of the Office of Defense Programs. Finally, the briefing should provide an update on the analysis of alternatives for the proposed modular approach, including the specific requirements identified, the analysis conducted for each alternative identified, and the proposed path forward, if known.

The conferees note that the intention of this provision is not to enforce a single financial accounting system upon the various management and operating contractors of the nuclear security enterprise. The amendment removes the requirement of a specific analytical approach. However, the conferees note that section 3161 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) directs the use of national international standards and nuclear industry best practices, including probabilistic or quantitative risk assessment if sufficient data exist, while maintaining adequate health and safety protection, at facilities of the Office of Environmental Management of the Department of Energy. The provision would require a military judge to be detailed to all special courts-martial and would provide the military justice system with an option for a judge-alone trial by special court-martial, with confinement limited to 6 months or less, as reflected in the proposed changes to Article 19, UCMJ.

same unit as an enlisted accused; and to conform to the proposed amendments to Article 29, UCMJ, concerning impaneling of members.

The House amendment contained a similar provision (sec. 6402).

The House recedes with an amendment that would establish that sentencing in courts-martial in which members convict the accused for any offense would be by military judge alone unless, after the findings are announced and before any matter is presented in the sentencing phase, the accused requests sentencing by members. The amendment retains the requirement for sentencing by members in capital cases for which the court-martial may sentence the accused to death.

The Department of Defense Military Justice Review Group recommended that sentencing should be by military judge alone in all cases except in capital cases for which the court-martial may sentence the accused to death. There may be non-capital cases in which an accused prefers that his or her sentence should be determined by members. The conferees determined that it would be appropriate to allow an accused found guilty by a court-martial with a military judge and members the option to select members for sentencing. The conferees further direct that the Military Justice Review Panel established elsewhere in this Act shall gather and analyze data on the frequency and sentencing outcomes in non-capital cases in which an accused requests sentencing by members and to include this information in the report to the Committees on Armed Services of the Senate and the House of Representatives required under this Act.

The conference agreement includes this provision.

Detailing, qualifications, and other matters relating to military judges (sec. 5184)

The Senate bill contained a provision (sec. 5184) that would amend section 826 of title 10, United States Code, (Article 26, Uniform Code of Military Justice (UCMJ)) to conform the section to the current practice of detailing a military

judge to every general and special court-martial; to provide for cross-service detailing of military judges; to require a chief trial judge in each armed force; and to provide appropriate criteria for service as a military judge. The provision would also authorize the President to establish uniform regulations concerning minimum tour lengths for military judges with provisions for early reassignment as necessary.

The House amendment contained a similar provision (sec. 6404).

The House recesses.

Military magistrates (sec. 5185)

The Senate bill contained a provision (sec. 5178) that would amend chapter 47 of title 10, United States Code, to add a new section 826a (Article 26a of the Uniform Code of Military Justice (UCMJ)) to establish the minimum qualifications for military magistrates, and to provide that military magistrates may be assigned under service regulations to perform duties other than those described under Articles 19 and 30a.

The Senate bill contained a provision (sec. 5185) that would amend section 827 of title 10, United States Code, (Article 27, Uniform Code of Military Justice (UCMJ)) to provide that an individual who has served as a preliminary hearing officer, court member, military judge, military magistrate, or appellate judge on a case may not later serve as trial counsel on that case. The provision would require that all defense counsel detailed to general or special courts-martial must be qualified under Article 27(b), and all trial counsel and assistant trial counsel detailed to special courts-martial, and all assistant trial counsel detailed to general courts-martial, must be determined to be competent to perform such duties under regulations prescribed by the President. The provision would also require, to the greatest extent practicable, at least one defense counsel detailed for a court-martial in a case in which the death penalty may be adjudged shall be learned in the law applicable to capital cases.

It would further amend Article 29 to clarify that a newly-detailed court-martial member or military judge may consider the record of previously admitted evidence through the use of an electronic or other similar recording.

The provision would require the convening authority to consult with a judge advocate before referral of charges to special courts-martial. The provision would clarify that formal corrections to the charges and specifications may be made before referral for trial in special courts-martial as well as in general courts-martial.

The House amendment contained a similar provision (sec. 6504).

The House recesses.

Service of charges and commencement of trial (sec. 5206)

The provision would clarify that a convening authority or a military judge may order depositions only if the requesting party demonstrates that, due to exceptional circumstances, it is in the interest of justice that the testimony of a prospective witness be preserved for use at a court-martial, military commission, court of inquiry, or other military court or board. The provision would clarify parties who may request a deposition, and require that, whenever practicable, depositions be taken before an impartial judge advocate. The provision would provide that: (1) representation of the parties with respect to a deposition shall be by counsel detailed in the same manner as trial counsel and defense counsel are detailed under Article 27; and (2) the accused shall have the right to be represented by civilian or military counsel in the same manner as such counsel are provided for in Article 38(b). The provision would clarify situations in which depositions may be used in military proceedings with a more direct reference to the military rules of evidence. The provision would amend the section to provide that testimony by deposition may be presented in capital cases only by the defense.

The House amendment contained an identical provision (sec. 6609).

The provision would eliminate the language concerning tie votes on challenges, motions, and other questions, which is applicable only to special courts-martial without a military judge, and which would no longer be necessary given the provision in Article 16, UCMJ, that would eliminate these members-only courts-martial.

The House amendment contained an identical provision (sec. 6613).

The conference agreement includes this provision.

Findings and sentencing (sec. 5236)

The Senate bill contained a provision (sec. 5236) that would amend section 853 of title 10, United States Code,

(Article 53, Uniform Code of Military Justice (UCMJ)) to require sentencing by a military judge in all non-capital general and special courts-martial. The provision would require that, in cases where the accused may be sentenced to death, the members shall participate in the sentence determination.

The House amendment contained no similar provision.

The House recedes with an amendment to conform to the provision under Article 25, UCMJ, as amended in a separate provision in this Act, that would provide an accused the option to request sentencing by members.

Plea agreements (sec. 5237)

The Senate bill contained a provision (sec. 5237) that would amend chapter 47 of title 10, United States Code to add a new section 853a (Article 53a, Uniform Code of Military Justice (UCMJ)) that would authorize: (1) construction and negotiation of charge and sentence agreements; (2) military judges to determine whether to accept a proposed plea agreement; and (3) the operation of sentence agreements with respect to the military judge's sentencing authority. The new Article 53a would provide that the military judge shall accept any lawful sentence agreement submitted by the parties, except that: (1) in the case of an offense with a sentencing parameter under Article 56, the military judge may reject the agreement only if it proposes a sentence that is both outside the sentencing parameter and plainly unreasonable; and (2) in the case of an offense without a sentencing parameter, the military judge may reject the agreement only if it proposes a sentence that is plainly unreasonable.

The House amendment contained a similar provision (sec. 6614) that did not include the authority for the military judge to reject a sentencing provision that the military judge determines is plainly unreasonable.

The provision would provide all victims who testify at a court-martial with access to records of trial.

The House amendment contained a similar provision (sec. 6615).

The House recedes with a technical amendment.

TITLE LVIII—SENTENCES

Sentencing (sec. 5301)

The Senate bill contained a provision (sec. 5261) that would amend section 856 of title 10, United States Code, (Article 56, Uniform Code of Military Justice (UCMJ)) to replace the court-martial practice of "unitary" sentencing with "segmented" sentencing where, if confinement is adjudged for guilty findings, the amount of confinement for each guilty finding would be determined separately. The provision would also authorize segmented sentencing for fines. The provision would authorize sentencing parameters and criteria to provide guidance to military judges in determining an appropriate sentence and would authorize the United States to appeal a sentence to the Court of Criminal Appeals. The provision would incorporate Article 56a, authorizing a sentence of confinement for life without the eligibility of parole any time a life sentence is authorized, into Article 56, UCMJ, without substantive change.

The House amendment contained a similar provision (sec. 6701) that did not include sentencing parameters.

The Senate recedes with an amendment to conform to the provision under Article 25, UCMJ, as amended in a separate provision in this Act, that would provide an accused the option to request sentencing by members. In cases in which the accused has elected sentencing by members the court-martial will announce a single sentence for all the offenses for which an accused was found guilty.

Effective date of sentences (sec. 5302)

The Senate bill contained a provision (sec. 5262) that would amend section 857 of title 10, United States Code, (Article 57, Uniform Code of Military Justice (UCMJ)) to consolidate portions of Article 57 and 57a that govern deferment of sentences, and portions of Articles 57 and 71 that govern when sentences become effective into Article 57, as modified. The provision would make a conforming change to remove from Article 71 the authority for a convening authority to suspend a sentence under Article 71(d). The provision would strike Articles 57a and 71, because the authorities in those two Articles would be included in Article 57, as modified.

The House amendment contained a similar provision (sec. 6702).

The Senate recedes with a technical amendment.

Sentence of reduction in enlisted grade (sec. 5303)

The Senate bill contained a provision (sec. 5263) that would amend section 858a of title 10, United States Code, (Article 58a, Uniform Code of Military Justice (UCMJ)) to authorize reduction of enlisted members to the grade of E-1 whenever the approved sentence of a court-martial includes a punitive discharge, confinement, or hard labor without confinement.

The House amendment contained a similar provision (sec. 6703).

The Senate recedes.

TITLE LIX—POST-TRIAL PROCEDURE AND REVIEW OF COURTS-MARTIAL

Post-trial processing in general and special courts-martial (sec. 5321)

The Senate bill contained a provision (sec. 5281) that would amend section 860 of title 10, United States Code, (Article 60, Uniform Code of Military Justice (UCMJ)) to provide for the distribution of the trial results and to authorize post-trial motions to be filed with the military judge in general and special courts-martial.

The House amendment contained an identical provision (sec. 6801).

The conference agreement includes this provision.

Limited authority to act on sentence in specified post-trial circumstances (sec. 5322)

The Senate bill contained a provision (sec. 5282) that would amend chapter 47 of title 10, United States Code, to add a new section 860a (Article 60a, Uniform Code of Military Justice (UCMJ)) to consolidate current limitations on the convening authority's post-trial authority in most general and special courts-martial, subject to a narrowly limited suspension authority and a revised authority to adjust an adjudged sentence in cases where an accused provides substantial assistance in the investigation or prosecution of another person.

The provision would retain and clarify existing limitations on the convening authority's post-trial actions in general and special courts-martial in which: (1) the maximum sentence of confinement for any offense is more than 2 years; (2) adjudged confinement exceeds 6 months; (3) the sentence includes dismissal or discharge; or (4) the accused is found guilty of designated sex-related offenses. Under current law, the convening authority in such cases is prohibited from modifying the findings of the court-martial, or reducing, commuting, or suspending a punishment of death, confinement of more than 6 months, or a punitive discharge.

The provision would provide a limited suspension authority in specified circumstances. For the convening authority to exercise this authority, the military judge would be required to make a specific suspension recommendation in the Statement of Trial Results. The suspension authority would be limited to punishments of confinement in excess of 6 months and punitive discharges. The provision would retain, with clarifying amendments, the key features of current law with respect to the convening authority's power to reduce the sentence of an accused who assists in the prosecution or investigation of another person. As amended, the provision would authorize the President to prescribe rules providing for a convening authority to exercise this power after entry of judgment. This provision would allow for the reduction of a sentence of an accused who provides substantial assistance in the prosecution of another person, even well after his own trial is over and appellate review is complete.

The provision would allow the accused and a victim of the offense to submit matters to the convening authority for consideration.

The provision would require the decision of the convening authority to be forwarded to the military judge. If the convening authority modified the sentence of the court-martial, the convening authority would be required to explain the reasons for the modification. An explanation for the convening authority's decision would only be required when the convening authority modifies the sentence. No approval of the findings or sentence would be required. The decision of the convening authority would be forwarded to the military judge, who would incorporate any change in the sentence into the entry of judgment. In a case where the accused provides substantial assistance and a designated convening authority reduces the sentence of the accused after entry of judgment, the convening authority's action would be forwarded to the chief trial judge, who would be responsible for ensuring appropriate modification of the entry of judgment. Because a modification might happen

during or after the completion of appellate review, the modified entry of judgment would be forwarded to the Judge Advocate General for appropriate action.

The House amendment contained a similar provision (sec. 6802).

The Senate recedes with a technical amendment.

Post-trial actions in summary courts-martial and certain general and special courts-martial (sec. 5323)

The Senate bill contained a provision (sec. 5283) that would amend chapter 47 of title 10, United States Code, to add a new section 860b (Article 60b of the Uniform Code of Military Justice (UCMJ)) that would clarify the convening authority's post-trial authorities and responsibilities with respect to the findings and sentence of summary courts-martial and a limited number of general and special courts-martial which, because of the offenses charged and the sentence adjudged, would not be covered under Article 60a, UCMJ. Consistent with existing law, the convening authority in such cases would be authorized to act on the findings and the sentence, and could order rehearings, subject to certain limitations. The procedural requirements under Article 60b, including consideration of matters submitted by the accused and victim, would be the same as provided in Article 60a. In summary courts-martial, the convening authority would be required to act on the sentence, and would have discretion to act on the findings, as under current law.

The House amendment contained a similar provision (sec. 6803).

The House recedes.

Entry of judgment (sec. 5324)

The Senate bill contained a provision (sec. 5284) that would amend chapter 47 of title 10, United States Code, to create a new section 860c (Article 60c of the Uniform Code of Military Justice (UCMJ)) that would require the military judge to enter the judgment of the court-martial into the record in all general and special courts-martial, and would mark the conclusion of trial proceedings. The judgment would reflect the Statement of Trial Results, any action by the convening authority on the findings or sentence, and any post-trial rulings by the military judge. The judgment also would indicate the time when the accused's case becomes eligible for direct appeal to a service court of criminal appeals under Article 66, or for review by the Judge Advocate General under Article 65. This requirement for an entry of judgment is modeled after

Federal Rules of Criminal Procedure 32(k). The findings and sentence of a summary court-martial, as modified by any post-trial action by the convening authority under Article 60b, would constitute the judgment of the court-martial.

The House amendment contained a similar provision (sec. 6804).

The House recedes with a technical amendment.

Waiver of right to appeal and withdrawal of appeal (sec. 5325)

The Senate bill contained a provision (sec. 5285) that would amend section 861 of title 10, United States Code, (Article 61, Uniform Code of Military Justice (UCMJ)) to conform the section with proposed amendments to Articles 60, 65, and 69 concerning post-trial processing.

The House amendment contained a similar provision (sec. 6805).

The Senate recedes.

Appeal by the United States (sec. 5326)

The Senate bill contained a provision (sec. 5386) that would amend section 862 of title 10, United States Code, (Article 62, Uniform Code of Military Justice (UCMJ)) to authorize the government to appeal a decision when, upon defense motion, the military judge sets aside a panel's finding of guilty because of legally insufficient evidence, except in cases where such an appeal would violate Article 44's prohibitions on double jeopardy. The provision would align the rule of construction with the similar rule applicable to interlocutory appeals in federal civilian courts. The provision would amend Article 62 to conform to the proposed revisions to the review and appeal provisions under Articles 66 and 69.

The House amendment contained a similar provision (sec. 6806).

The Senate recedes with a technical amendment.

Rehearings (sec. 5327)

The Senate bill contained a provision (sec. 5287) that would amend section 863 of title 10, United States Code, (Article 63, Uniform Code of Military Justice (UCMJ)) to remove the sentence limitation at a rehearing in cases in which an accused changes a plea from guilty to not guilty, or otherwise fails to comply with the terms of a pretrial agreement, or after a sentence is set aside based on a government appeal.

The House amendment contained a similar provision (sec. 6807).

The Senate recedes.

The House amendment contained a similar provision (sec. 6808).

The House recedes with a technical amendment.

Transmittal and review of records (sec. 5329)

The Senate bill contained a provision (sec. 5289) that would amend section 865 of title 10, United States Code, (Article 65, Uniform Code of Military Justice (UCMJ)) to require that the record of trial be forwarded to appellate defense counsel for review whenever the case is eligible for an appeal under Article 66, and to require a review by the Judge Advocate General of all general and special court-martial cases not eligible for direct appeal under Article 66. The provision would require the Judge Advocate General to forward cases to the Court of Criminal Appeals for mandatory review if the judgment includes a sentence of death. The provision would require a review of all general and special courts-martial cases that are eligible for an appeal under Article 66, but where appeal has been waived, withdrawn, or not filed.

The House amendment contained a similar provision (sec. 6809) that did not include requirements regarding cases eligible for direct appeal.

The Senate recedes with an amendment that would provide for an automatic appeal in all cases in which the adjudged sentence includes death, dismissal, dishonorable discharge, or bad-conduct discharge, or confinement for 2 years or more.

Courts of Criminal Appeals (sec. 5330)

The Senate bill contained a provision (sec. 5290) that would amend section 866 of title 10, United States Code, (Article 66, Uniform Code of Military Justice (UCMJ)) to

establish an appeal as of right in non-capital cases under the UCMJ, similar to the federal civilian appellate courts, and expand the opportunity for direct review of courts-martial convictions by the service courts of criminal appeals. The provision would provide statutory standards for factual sufficiency review, sentence appropriateness review, and review of excessive post-trial delay. The provision would provide the courts of criminal appeals with express authority to order a hearing, rehearing or remand for further proceedings as may be necessary to address a substantial issue.

The House amendment contained a similar provision (sec. 6810).

The Senate recedes with a clarifying amendment. The provision would establish appeal as of right in non-capital cases in which the sentence adjudged includes a confinement for more than six months and the case is not subject to automatic review. The provision would also provide for automatic review in cases in which the sentence adjudged includes death, dismissal, a dishonorable or bad-conduct discharge, or confinement for two years or more. The provision would also provide for consideration of appeal of a sentence by the United States.

The Senate bill contained a provision (sec. 5291) that would amend section 867 of title 10, United States Code, (Article 67, Uniform Code of Military Justice (UCMJ)) to conform the section with proposed creation of an "entry of judgment" in Article 60c, UCMJ, and related amendments to Articles 60 and 66, UCMJ.
