16 **SEC. 127. SENSE OF CONGRESS ON AIRCRAFT CARRIER**
17 **PROCUREMENT SCHEDULES.**

18 (a) FINDINGS.—Congress finds the following:

19 (1) In the Congressional Budget Office report
20 titled “An Analysis of the Navy’s Fiscal Year 2016
21 Shipbuilding Plan”, the Office stated as follows: “To
22 prevent the carrier force from declining to 10 ships
23 in the 2040s, 1 short of its inventory goal of 11, the
24 Navy could accelerate purchases after 2018 to 1
25 every four years, rather than 1 every five years”.

1 (2) In a report submitted to Congress on March
2 17, 2015, the Secretary of the Navy indicated the
3 Department of the Navy has a requirement of 11
4 aircraft carriers.

5 (b) SENSE OF CONGRESS.—It is the sense of Con-
6 gress that—

7 (1) the plan of the Department of the Navy to
8 schedule the procurement of one aircraft carrier
9 every five years will reduce the overall aircraft car-
10 rier inventory to 10 aircraft carriers, a level insuffi-
11 cient to meet peacetime and war plan requirements;
12 and

13 (2) to accommodate the required aircraft car-
14 rier force structure, the Department of the Navy
15 should—

16 (A) begin to program construction for the
17 next aircraft carrier to be built after the U.S.S.
18 Enterprise (CVN–80) in fiscal year 2022; and

19 (B) program the required advance procure-

4 shall include, with respect to the P-8 Poseidon aircraft,
5 the following:

6 (1) A review of potential upgrades to the sen-
7 sors onboard the aircraft, including upgrades to in-
8 telligence sensors, surveillance sensors, and recon-
9 naissance sensors such as those being fielded on
10 MQ-4 Global Hawk aircraft platforms.

11 (2) An assessment of the ability of the Navy to
12 use long-range multispectral imaging systems on-
13 board the aircraft that are similar to such systems
14 being used onboard the MQ-4 Global Hawk aircraft.

15 **SEC. 129. DESIGN AND CONSTRUCTION OF REPLACEMENT**
16 **DOCK LANDING SHIP DESIGNATED LX(R) OR**
17 **AMPHIBIOUS TRANSPORT DOCK DESIGNATED**
18 **LPD-29.**

19 (a) IN GENERAL.—The Secretary of the Navy may
20 enter into a contract, beginning with the fiscal year 2017
21 program year, for the design and construction of the re-
22 placement dock landing ship designated LX(R) or the am-
23 phibious transport dock designated LPD-29 using
24 amounts authorized to be appropriated for the Depart-
25 ment of Defense for Shipbuilding and Conversion, Navy.

1 (b) USE OF INCREMENTAL FUNDING.—With respect
2 to the contract entered into under subsection (a), the Sec-
3 retary may use incremental funding to make payments
4 under the contract.

5 (c) CONDITION FOR OUT-YEAR CONTRACT PAY-
6 MENTS.—The contract entered into under subsection (a)
7 shall provide that any obligation of the United States to
8 make a payment under such contract for any fiscal year
9 after fiscal year 2017 is subject to the availability of ap-

18 the Secretary determines—

19 (1) is more operationally effective and surviv-

17 craft under the program if—

18 (i) the exercise of such option is at
19 the discretion of the Secretary; and

20 (ii) such option is not exercised until
21 the Secretary determines that there is a
22 high likelihood that the program will meet

4 **SEC. 241. SENSE OF CONGRESS ON DEVELOPMENT AND**
5 **FIELDING OF FIFTH GENERATION AIRBORNE**
6 **SYSTEMS.**

7 (a) FINDINGS.—Congress makes the following find-
8 ings:

9 (1) The term “fifth generation”, with respect to
10 airborne systems, means those airborne systems ca-
11 pable of operating effectively in highly contested bat-
12 tle spaces defined by the most capable currently
13 fielded threats, and those reasonably expected to be
14 operational in the foreseeable future.

15 (2) Continued modernization of Department of
16 Defense airborne systems such as fighters, bombers,
17 and intelligence, surveillance, and reconnaissance
18 (ISR) aircraft with fifth generation capabilities is re-
19 quired because—

20 (A) adversary integrated air defense sys-
21 tems (IADS) have created regions where fourth
22 generation airborne systems may be limited in
23 their ability to effectively operate;

24 (B) adversary aircraft, air-to-air missiles,
25 and airborne electronic attack or electronic pro-

1 tection systems are advancing beyond the capa-
2 bilities of fourth generation airborne systems;
3 and

4 (C) fifth generation airborne systems pro-
5 vide a wider variety of options for a given
6 warfighting challenge, preserve the technological
7 advantage of the United States over near-peer
8 threats, and serve as a force multiplier by in-
9 creasing situational awareness and combat ef-
10 fectiveness of fourth generation airborne sys-
11 tems.

12 (b) SENSE OF CONGRESS.—It is the sense of Con-
13 gress that development and fielding of fifth generation air-
14 borne system systems should include the following:

15 (1) Multispectral (radar, infrared, visual, emis-
16 sions) low observable (LO) design features, self-pro-
17 tection jamming, and other capabilities that signifi-
18 cantly delay or deny threat system detection, track-
19 ing, and engagement.

20 (2) Integrated avionics that autonomously fuse
21 and prioritize onboard multispectral sensors and
22 offboard information data to provide an accurate
23 realtime operating picture and data download for
24 postmission exploitation and analysis.

1 (3) Resilient communications, navigation, and
2 identification techniques designed to effectively
3 counter adversary attempts to deny or confuse
4 friendly systems.

5 (4) Robust and secure networks linking indi-
6 vidual platforms to create a common, accurate, and
7 highly integrated picture of the battle space for
8 friendly forces.

9 (5) Advanced onboard diagnostics capable of
10 monitoring system health, accurately reporting sys-
11 tem faults, and increasing overall system perform-
12 ance and reliability.

13 (6) Integrated platform and subsystem designs
14 to maximize lethality and survivability while enabling
15 decision superiority.

16 (7) Maximum consideration for the fielding of
17 unmanned platforms either employed in concert with
18 fifth generation manned platforms or as standalone
19 unmanned platforms, to increase warfighting effec-
20 tiveness and reduce risk to personnel during high
21 risk missions.

22 (8) Advanced air-to-air, air-to-ground, and
23 other weapons able to leverage fifth generation capa-
24 bilities.

1 (9) Comprehensive and high-fidelity live, vir-
2 tual, and constructive training systems, updated
3 range infrastructure, and sufficient threat-represent-
4 ative adversary training assets to maximize fifth
5 generation force proficiency, effectiveness, and readi-
6 ness while protecting sensitive capabilities.

3 “(C) If the Secretary determines that the reduced re-
4 liance on appropriated funding pursuant to subparagraph

14 tors for a representative market basket of goods.

15 “(3) The Secretary shall ensure that the defense com-
16 missary system implements the variable pricing program
17 by conducting price comparisons using the methodology

16 commissary system operating as a nonappropriated fund
17 entity or instrumentality is likely to incur a loss in any
18 fiscal year as a result of compliance with the savings re-
19 quirement established in subsection (i), the Secretary shall
20 authorize a transfer of appropriated funds available for
21 such purpose to the commissary system in an amount suf-
22 ficient to offset the anticipated loss. Any funds so trans-

24 such purpose.

1 “(3)(A) The Secretary may identify positions of em-
2 ployees in the defense commissary system who are paid
3 with appropriated funds whose status may be converted
4 to the status of an employee of a nonappropriated fund

4 “(a) MODULAR OPEN SYSTEM APPROACH REQUIRE-
5 MENT.—A major defense acquisition program that re-
6 ceives Milestone A or Milestone B approval after January
7 1, 2019, shall be designed and developed, to the maximum
8 extent practicable, with a modular open system approach
9 to enable incremental development and enhance competi-
10 tion, innovation, and interoperability.

11 “(b) DEFINITIONS.—In this chapter:

12 “(1) The term ‘modular open system approach’
13 means, with respect to a major defense acquisition
14 program, an integrated business and technical strat-
15 egy that—

16 “(A) employs a modular design that uses
17 major system interfaces between a major sys-
18 tem platform and a major system component,
19 between major system components, or between
20 major system platforms;

21 “(B) is subjected to verification to ensure
22 major system interfaces comply with, if avail-
23 able and suitable, widely supported and con-
24 sensus-based standards;

25 “(C) uses a system architecture that allows
26 severable major system components at the ap-

1 appropriate level to be incrementally added, re-
2 moved, or replaced throughout the life cycle of
3 a major system platform to afford opportunities
4 for enhanced competition and innovation while
5 yielding—

6 “(i) significant cost savings or avoid-
7 ance;

8 “(ii) schedule reduction;

9 “(iii) opportunities for technical up-
10 grades;

11 “(iv) increased interoperability, in-
12 cluding system of systems interoperability
13 and mission integration; or

14 “(v) other benefits during the
15 sustainment phase of a major weapon sys-
16 tem; and

17 “(D) complies with the technical data
18 rights set forth in section 2320 of this title.

19 “(2) The term ‘major system platform’ means
20 the highest level structure of a major weapon system
21 that is not physically mounted or installed onto a
22 higher level structure and on which a major system
23 component can be physically mounted or installed.

24 “(3) The term ‘major system component’—

1 “(A) means a high level subsystem or as-
2 sembly, including hardware, software, or an in-
3 tegrated assembly of both, that can be mounted
4 or installed on a major system platform through
5 well-defined major system interfaces; and

6 “(B) includes a subsystem or assembly
7 that is likely to have additional capability re-
8 quirements, is likely to change because of evol-
9 ving technology or threat, is needed for inter-
10 operability, facilitates incremental deployment
11 of capabilities, or is expected to be replaced by
12 another major system component.

13 “(4) The term ‘major system interface’—

14 “(A) means a shared boundary between a
15 major system platform and a major system
16 component, between major system components,
17 or between major system platforms, defined by
18 various physical, logical, and functional charac-
19 teristics, such as electrical, mechanical, fluidic,
20 optical, radio frequency, data, networking, or
21 software elements; and

22 “(B) is characterized clearly in terms of
23 form, function, and the content that flows
24 across the interface in order to enable techno-

1 logical innovation, incremental improvements,
2 integration, and interoperability.

3 “(5) The term ‘program capability document’
4 means, with respect to a major defense acquisition
5 program, a document that specifies capability re-
6 quirements for the program, such as a capability de-
7 velopment document or a capability production docu-
8 ment.

9 “(6) The terms ‘program cost targets’ and
10 ‘fielding target’ have the meanings provided in sec-
11 tion 2448a(a) of this title.

12 “(7) The term ‘major defense acquisition pro-
13 gram’ has the meaning provided in section 2430 of
14 this title.

15 “(8) The term ‘major weapon system’ has the
16 meaning provided in section 2379(f) of this title.

17 **“§ 2446b. Requirement to address modular open sys-**
18 **tem approach in program capabilities de-**
19 **velopment and acquisition weapon sys-**
20 **tem design**

21 “(a) PROGRAM CAPABILITY DOCUMENT.—A program
22 capability document for a major defense acquisition pro-
23 gram shall identify and characterize—

24 “(1) the extent to which requirements for sys-
25 tem performance are likely to evolve during the life

1 cycle of the system because of evolving technology,
2 threat, or interoperability needs; and

3 “(2) for requirements that are expected to
4 evolve, the minimum acceptable capability that is
5 necessary for initial operating capability of the
6 major defense acquisition program.

7 “(b) ANALYSIS OF ALTERNATIVES.—The Director of
8 Cost Assessment and Performance Evaluation, in formu-
9 lating study guidance for analyses of alternatives for
10 major defense acquisition programs and performing such
11 analyses under section 139a(d)(4) of this title, shall en-
12 sure that any such analysis for a major defense acquisition
13 program includes consideration of evolutionary acquisi-
14 tion, prototyping, and a modular open system approach.

15 “(c) ACQUISITION STRATEGY.—In the case of a
16 major defense acquisition program that uses a modular
17 open system approach, the acquisition strategy required
18 under section 2431a of this title shall—

19 “(1) clearly describe the modular open system
20 approach to be used for the program;

21 “(2) differentiate between the major system
22 platform and major system components being devel-
23 oped under the program, as well as major system
24 components developed outside the program that will

1 be integrated into the major defense acquisition pro-
2 gram;

3 “(3) clearly describe the evolution of major sys-
4 tem components that are anticipated to be added,
5 removed, or replaced in subsequent increments;

6 “(4) identify additional major system compo-
7 nents that may be added later in the life cycle of the
8 major system platform;

9 “(5) clearly describe how intellectual property
10 and related issues, such as technical data
11 deliverables, that are necessary to support a modular
12 open system approach, will be addressed; and

14 integration and systems-level configuration manage-
15 ment to ensure mission and information assurance.

16 “(d) REQUEST FOR PROPOSALS.—The milestone de-
17 cision authority for a major defense acquisition program
18 that uses a modular open system approach shall ensure

7 ing naval ships traveling in New England waters.

8 (5) Congress rejected the Navy's proposal to
9 close New London Navy Yard in 1912, following an
10 impassioned effort by Congressman Edwin W. Hig-
11 gins, who stated that "this action proposed is not
12 only unjust but unreasonable and unsound as a mili-
13 tary proposition".

14 (6) The outbreak of World War I and the
15 enemy use of submarines to sink allied military and
16 civilian ships in the Atlantic sparked a new focus on
17 developing submarine capabilities in the United
18 States.

19 (7) October 18, 1915, marked the arrival at the
20 New London Navy Yard of the submarines G-1, G-
21 2, and G-4 under the care of the tender USS Ozark
22 and the arrival of submarines E-1, D-1, and D-3
23 under the care of the tender USS Tonopah. Novem-
24 ber 1, 1915, marked the arrival of the first ship

1 built as a submarine tender, the USS Fulton (AS-
2 1).

3 (8) On June 21, 1916, Commander Yeates Stir-
4 ling assumed the command of the newly designated
5 Naval Submarine Base New London, the New Lon-
6 don Submarine Flotilla, and the Submarine School.

7 (9) In the 100 years since the arrival of the
8 first submarines to the base, Naval Submarine Base
9 New London has grown to occupy more than 680
10 acres along the east side of the Thames River, with
11 more than 160 major facilities, 15 nuclear sub-
12 marines, and more than 70 tenant commands and
13 activities, including the Submarine Learning Center,
14 Naval Submarine School, the Naval Submarine Med-
15 ical Research Laboratory, the Naval Undersea Med-
16 ical Institute, and the newly established Undersea
17 Warfighting Development Center.

18 (10) In addition to being the site of the first
19 submarine base in the United States, Connecticut
20 was home to the foremost submarine manufacturers
21 of the time, the Lake Torpedo Boat Company in
22 Bridgeport and the Electric Boat Company in Grot-
23 on, which later became General Dynamics Electric
24 Boat.

1 (11) General Dynamics Electric Boat, its tal-
2 ented workforce, and its Connecticut-based and na-
3 tionwide network of suppliers have delivered more
4 than 200 submarines from its current location in
5 Groton, Connecticut, including the first nuclear-pow-
6 ered submarine, the USS Nautilus (SSN 571), and
7 nearly half of the nuclear submarines ever built by
8 the United States.

9 (12) The Submarine Force Museum, located
10 adjacent to Naval Submarine Base New London in
11 Groton, Connecticut, is the only submarine museum
12 operated by the United States Navy and today
13 serves as the primary repository for artifacts, docu-
14 ments, and photographs relating to the bold and
15 courageous history of the Submarine Force and
16 highlights as its core exhibit the Historic Ship Nau-
17 tilus (SSN 571) following her retirement from serv-
18 ice.

19 (13) Reflecting the close ties between Con-
20 necticut and the Navy that began with the gift of
21 land that established the base, the State of Con-
22 necticut has set aside \$40,000,000 in funding for
23 critical infrastructure investments to support the
24 mission of the base, including construction of a new
25 dive locker building, expansion of the Submarine

1 Learning Center, and modernization of energy infra-
2 structure.

3 (14) On September 29, 2015, Connecticut Gov-
4 ernor Dannel Malloy designated October 2015
5 through October 2016 as Connecticut's Submarine
6 Century, a year-long observance that celebrates 100
7 years of submarine activity in Connecticut, including
8 the Town of Groton's distinction as the Submarine
9 Capital of the World, to coincide with the centennial
10 anniversary of the establishment of Naval Sub-
11 marine Base New London and the Naval Submarine
12 School.

13 (15) Whereas Naval Submarine Base New Lon-
14 don still proudly proclaims its motto of "The First
15 and Finest".

16 (16) Congressman Higgins' statement before
17 Congress in 1912 that "Connecticut stands ready, as
18 she always has, to bear her part of the burdens of
19 the national defense" remains true today.

20 (b) SENSE OF CONGRESS.—Congress—

21 (1) commends the longstanding dedication and
22 contribution to the Navy and submarine force by the
23 people of Connecticut, both through the initial deed
24 of gift that established what would become Naval
25 Submarine Base New London and through their on-

1 going commitment to support the mission of the
2 base and the Navy personnel assigned to it;

3 (2) honors the submariners who have trained
4 and served at Naval Submarine Base New London
5 throughout its history in support of the Nation's se-
6 curity and undersea superiority;

7 (3) recognizes the contribution of the industry
8 and workforce of Connecticut in designing, building,
9 and sustaining the Navy's submarine fleet; and

10 (4) encourages the recognition of Connecticut's
11 Submarine Century by Congress, the Navy, and the
12 American people by honoring the contribution of the
13 people of Connecticut to the defense of the United
14 States and the important role of the submarine force
15 in safeguarding the security of the United States for
16 more than a century.

18 **ING OF THE MV-22 MISHAP IN MARANA, ARI-**
19 **ZONA, ON APRIL 8, 2000.**

20 It is the sense of Congress that—

21 (1) in the report accompanying H.R. 1735 of
22 the 114th Congress (House Report 114–102), the
23 Committee on Armed Services of the House of Rep-
24 resentatives encouraged the Secretary of Defense to
25 “publicly clarify the causes of the MV-22 mishap at

1 Marana Northwest Regional Airport, Arizona, in a
2 way consistent with the results of all investigations
3 as soon as possible”;

4 (2) the Deputy Secretary of Defense Robert O.
5 Work did an excellent job reviewing the investiga-
6 tions of such mishap and concluded that there was
7 a misrepresentation of facts by the media which in-
8 correctly identified pilot error as the cause of the
9 mishap which the Deputy Secretary publicly made
10 known in March 2016; and

11 (3) Congress is grateful for the successful con-
12 clusion to this tragic situation.

13 **SEC. 1090. COST OF WARS.**

14 The Secretary of Defense, in consultation with the
15 Commissioner of the Internal Revenue Service and the Di-
16 rector of the Bureau of Economic Analysis, shall post on
17 the public Internet website of the Department of Defense
18 the costs to each United States taxpayer of each of the

19 Services of the Senate and House of Representatives a
20 separate report on the alternative designs and operational
21 concepts analyzed under subsection (a)(1). Each such re-
22 port shall include an assessment of the merits and suffi-
23 ciency of such designs and concepts, the potential for fu-
24 ture experimentation (such as a follow-on pilot program),
25 and the recommendation of the Chairman and Chief of

1 Staff, as the case may be, regarding the Reconnaissance
2 Strike Group.

4 fore submittal of the reports required under subsection
5 (b), the Chairman of the Joint Chiefs of Staff and the
6 Chief of Staff of the Army shall each select a Federally

8 evaluate each report. The review and evaluation of each

16 **DEPARTMENT OF DEFENSE.**

17 (a) FINDINGS.—Congress finds the following:

18 (1) National security space capabilities are a
19 vital element of the national defense of the United
20 States.

21 (2) The advantages of the United States in na-
22 tional security space are now threatened to an un-
23 precedented degree by growing and serious
24 counterspace capabilities of potential foreign adver-

1 saries, and the space advantages of the United
2 States must be protected.

3 (3) The Department of Defense has recognized
4 the threat and has taken initial steps necessary to
5 defend space, however the organization and manage-
6 ment may not be strategically postured to fully ad-
7 dress this changed domain of operations over the
8 long term.

9 (4) The defense of space is currently a priority
10 for the leaders of the Department, however the
11 space mission is managed within competing prior-
12 ities of each of the Armed Forces.

13 (5) Space elements provide critical capabilities
14 to all of the Armed Forces in the joint fight, how-
15 ever the disparate activities throughout the Depart-
16 ment have no single leader that is empowered to
17 make decisions affecting the space forces of the De-
18 partment.

19 (b) SENSE OF CONGRESS.—It is the sense of Con-
20 gress that, to modernize and fully address the growing
21 threat to the national security space advantage of the
22 United States, the Secretary of Defense must evaluate the
23 range of options and take further action to strengthen the
24 leadership, management, and organization of the national

1 security space activities of the Department of Defense, in-
2 cluding with respect to—

3 (1) unifying, integrating, and de-conflicting ac-
4 tivities to provide for stronger prioritization, ac-
5 countability, coherency, focus, strategy, and integra-
6 tion of the joint space program of the Department;

7 (2) streamlining decision-making, limiting un-
8 necessary bureaucracy, and empowering the appro-
9 priate level of authority, while enabling effective
10 oversight;

11 (3) maintaining the involvement of each of the
12 Armed Forces and adapting the culture and improv-
13 ing the capabilities of the workforce to ensure the
14 workforce has the appropriate training, experience,
15 and tools to accomplish the mission; and

16 (4) reviewing authorities and preparing for a
17 conflict that could extend to space.

18 (c) RECOMMENDATIONS.—Not later than 180 days

20 of Defense and the Director of the Office of Management
