

Fiscal Year 2024 Military Construction Appropriations Act

*Summary of Senate Appropriations Committee's
Military Construction and Veterans Affairs Appropriations Bill for
Fiscal Year 2024*

*As of **26 June 2023***

Bill Status

	Passed in Committee	Passed in Chamber	Agreement	Final Passage	Signed into Law
House	June 13, 2023	N/A	N/A	N/A	N/A
Senate	June 22, 2023	N/A		N/A	

Executive Summary

This guide provides only a short summary and analysis of the many provisions in the bill. To obtain a complete understanding of any particular provision, users are encouraged to review the actual legislative language. The bill and accompanying report are available on the NGB-LL web page at <https://www.nationalguard.mil/Leadership/Joint-Staff/Personal-Staff/Legislative-Liaison/>.

Summary:

On June 22, 2023, the Senate Appropriations Committee passed the FY24 Military Construction and Veterans Affairs Appropriations Bill. In total, the legislation would provide \$135.3 billion in non-defense discretionary funding, as well as \$161.7 billion in mandatory funding. 441 billion in funding the DoD. The bill also includes \$19.1 billion in defense spending for military construction and family housing this year – an increase of \$70 million over fiscal year 2023. Of this, \$598.5 million is provided for Army National Guard military construction and \$304.4 million for Air National Guard military construction.

Army National Guard

(All Dollars in Thousands)

Army National Guard	FY24 President's Budget Request	HAC-M Mark	Delta from FY24 Request	SAC-M Mark	Delta From FY24 Request	Final Bill	Delta From FY24 Request
MILCON Total	\$340,186	\$369,261	\$29,075	\$598,572	\$258,386		
Minor Construction	\$63,000	\$73,000	\$10,000	\$70,000	\$7,000		
Planning & Design	\$34,286	\$42,361	\$8,075	\$34,286	--		
Sec. 124	--	\$10,400	\$10,400	\$89,500	\$89,500		
Sec. 133	--	\$134,881	\$134,881	--	--		

Air National Guard

(All Dollars in Thousands)

Air National Guard	FY24 President's Budget Request	HAC-M Mark	Delta from FY24 Request	SAC-M Mark	Delta From FY24 Request	Final Bill	Delta From FY24 Request
MILCON Total	\$178,722	\$189,322	\$10,600	\$304,426	\$125,704		
Minor Construction	\$63,122	\$73,122	\$10,000	\$63,122	--		
Planning & Design	\$35,600	\$36,200	\$600	\$35,600	--

Sec. 131	--	--	--	\$83,000	\$83,000		
Sec. 132	--	\$20,000	\$20,000	--	--		

Senate Provisions of Interest

Sec. 101. The Committee includes a provision that restricts payments under a cost-plus-a-fixed-fee contract for work, except in cases of contracts for environmental restoration at base closure sites.

Sec. 103. The Committee includes a provision that permits the use of funds for defense access roads.

Sec. 104. The Committee includes a provision that prohibits construction of new bases inside the continental United States for which specific appropriations have not been made.

Sec. 105. The Committee includes a provision that limits the use of funds for purchase of land or land easements.

Sec. 107. The Committee includes a provision that limits the use of minor construction funds to transfer or relocate activities among installations.

Sec. 118. The Committee includes a provision that provides transfer authority to the Homeowners Assistance Fund.

Section 124. Providing funds for certain projects identified in the respective military department's unfunded priority list for fiscal year 2024.

Sec. 128. The Committee includes a provision providing additional funding for Military Installation Resilience.

Sec. 129. The Committee includes a provision providing additional funding for Air Force natural disaster recovery.

Sec. 131. The Committee includes a provision providing additional funding for planning and design and authorized major construction projects at future foreign military training sites.

Section. 132. Providing funds for unspecified minor construction for demolition.

Section 133. Providing funds for cost to complete projects identified in the respective military department's unfunded priority list for fiscal year 2024.

Senate Report Language of Interest

Army Air Traffic Control Towers. The Committee continues to recognize the importance of Army Air Traffic Control Towers, which control aircraft approaching and departing the terminal area and aircraft and vehicular movement on the runways, taxiways, and all other movement areas. They are the nerve center for an air installation complex and are critical to operational success, however, some current Army towers are antiquated and unsafe. The Committee encourages the Army to allocate sufficient funding for these critical facilities in future budget requests.

Addressing Climate Risk in Strategic Basing. The Committee notes that the Air Force Climate Action Plan lists modernizing infrastructure and facilities as the prime objective in maintaining air and space dominance. A key metric for this objective is establishing a framework to evaluate the effects of climate change to inform resourcing and basing processes by fiscal year 2024.

Agile Common Hangars. The Committee is aware that agile common hangars may provide more capacity and capability than traditional facilities since they can support multiple platforms and requirements and eliminate the need to build new and unique facilities for each new aircraft. For example, at Tinker Air Force Base, agile common hangars could support both the legacy B-52 and the forthcoming B-21, replacing multiple facilities that would otherwise need to be built for each platform.

U.S. Space Command Headquarters. The Committee is concerned that the Department has not finalized a permanent location for the United States Space Command headquarters after nearly 5 years of consideration and with the associated impact on national security. Therefore, the Committee directs the Secretary to provide a report within 90 days of enactment of this act regarding any funds that have been obligated or expended in all previous fiscal years for the construction, renovation, or improvement of facilities, including all leases, for Space Command Headquarters.

Energy Resilience and Conservation Investment Program [ERCIP]. The Committee supports DoD's investments in energy efficiency, renewable energy systems, and energy resilience, including through ERCIP, and fully funds the budget request of \$634,250,000. Recognizing the complexity of and cost increases for ERCIP projects, the Committee provides an additional \$38,000,000 for cost-to-completes as appropriated in Section 124.

Defense Access Roads. The Defense Access Road [DAR] program is a valuable tool available to the Department to provide for public roadway improvements resulting from defense generated traffic, including increasing unit travel, military vehicle traffic and heavy haul trucks. The Committee encourages the Army National Guard to use authorities under the DAR program to protect and enhance roadways that are critical to national defense, including in rural States where DAR certified primary access roads currently do not meet safety standards.

Readiness Centers. The Committee continues to note that many Army National Guard units utilize outdated and substandard facilities which can negatively impact the unit's ability to meet readiness, recruiting and retention, and training objectives. Facilities with physical shortfalls of greater than 50 percent of authorized space, such as those in Jamestown, North Dakota, are particularly concerning. The Committee encourages the Army National Guard to allocate sufficient funding to address such facilities in future budget requests.

Lodging Facilities. The Committee continues to highlight lodging shortfalls near Army National Guard training centers that support training and readiness activities as well as support training for outside agencies. The Committee encourages the Army National Guard to allocate appropriate funding towards lodging requirements in future budget requests, particularly for installations with new training and readiness requirements.

Veterans Housing Rehabilitation and Modification Pilot Program. The Committee encourages VA to coordinate with the Department of Housing and Urban Development [HUD] to develop an outreach plan to increase awareness about this program among veterans, Veterans Service Organizations, and other eligible entities.

Wrongfully Discharged LGBTQ Veterans. The Committee supports the Department's decision to allow eligible discharged veterans to receive their due benefits through the Secretary's September 17, 2021, memorandum regarding "Benefits Eligibility for Lesbian, Gay, Bisexual, Transgender and Queer [LGBTQ] Former Service Members (VIEWS 5810856)." In supporting the goals of this memorandum, the Committee directs the Department to submit a report no later than 270 days after enactment of this act on the number of eligible veterans who have received their due benefits after this memorandum's release as well as efforts by the Department to conduct outreach towards these eligible veterans to ensure they are aware of the processes to receive their benefits.

Outreach to Remote Areas. The Committee encourages the Department to improve outreach, including travel to villages, to reach veterans not connected to the major metropolitan areas of the United States by a road system

Opioid Use Disorder/Alternative Treatments. Alternative treatments for pain management have been shown to be effective in reducing pain and reliance on prescription opioids. The Committee notes the directive language in the Joint Explanatory Statement accompanying Public Law 117–38 requiring the Department to track the use of osteopathic manipulative treatment to treat back and other pain. The Committee continues to encourage VA to expand the use of alternative treatments to pain management, such as acupuncture, in its delivery of healthcare services. The Committee also urges VA to integrate alternative treatments into VA medical centers and clinics through licensed professionals or on a contract basis.

Veterans Exposed to Open Burn Pits and Airborne Hazards. The Committee is supportive of the efforts of VA to research and study the health effects of open-air burn pits on veterans. In order to provide full and effective medical care, it is essential for the Department to better understand the impacts exposure during service has had on the health of veterans, including linkages to rare cancer not yet identified by VA as presumptive to military service. Therefore, the Committee includes \$15,000,000 to carry out responsibilities and activities of the Airborne Hazards and Burn Pits Center of Excellence.

PFAS Research. The Department, in coordination with DoD and in consultation with the Centers for Disease Control and Prevention, shall submit a report to the Committees on Appropriations of both Houses of Congress no later than 1 year after enactment of this act regarding the ability of the Department to (1) create distinct PFAS exposure cohorts based on location and date of PFAS exposure, including related to AFFF; (2) create a longitudinal record of service-related PFAS exposures per individual, including all current and former service members potentially exposed in such cohorts; (3) conduct appropriate medical surveillance to detect emerging health conditions among such personnel potentially exposed to PFAS; (4) support epidemiological research to determine which health outcomes have greater rates of prevalence or incidence among such personnel potentially exposed to PFAS; and, (5) support clinical care and public health activities by providing clinical care providers the ability to search such longitudinal records for individuals under their care and associate them to such exposure events

WOMEN VETERANS HEALTHCARE. Today, women make up 16.9 percent of the active-duty military forces and 19 percent of National Guard and Reserves. The number of women veterans using VA healthcare has continued to rise, with women accounting for over 30 percent of the increase in veterans enrolled over the past 5 years. VA must enhance its services and access to gender-specific care, including primary care providers, gynecologists, maternity care, mammography services, and mental health providers, including care related to experiences of military sexual trauma. Enhancing capacity to support pregnant and postpartum women veterans must also be a priority, which should include expansion of maternity care and lactation support for women veterans.

Toward this end, the Committee recommendation includes \$1,279,096,000 for fiscal year 2024, equal to the request, to support gender-specific healthcare services, as well as the program office and initiatives. VA is encouraged to use this funding to continue to expand this care so that all women veterans, including those in rural areas, have the access to care they deserve. The Committee also urges the Department to ensure that there are dedicated entrances, security, and women providers at all VA sites of care.
